Internal Risk Factors

- 1. Our Company has received an inspection report vide a letter dated October 8, 2015 from the Reserve Bank of India inter alia alleging violation of the RBI directions, guidelines and circulars. In case RBI decides to take action against our Company our reputation may suffer and our ability to conduct business may be severely affected. Any punitive action by RBI could in turn result in material adverse effect on our business, prospect and results of operations.**

Our Company has received an inspection report vide a letter dated October 8, 2015 from the RBI, in relation to an inspection of our Company carried out under Section 45N of the Reserve Bank of India Act, 1934, during April 22, 2015 to May 6, 2015, wherein the RBI made certain observations, such as (i) our Company did not carry out proper asset classification and incorrectly assessed the NPAs; (ii) our Company renewed the privately placed NCDs without compliance with RBI circular dated June 27, 2013 on ‘Raising Money Through Private Placement by NBFCs-Debentures;’ (iii) our Company did not issue an offer document or a prospectus during the year 2013-2014 in relation to issuance of NCDs; (iv) our Company was unable to provide branch-wise assets to cover bank borrowings and NCDs separately; (v) premature closure of debentures were shown as personal loans by our Company; (vi) our Company failed to review all the policies as was required and the corporate governance framework was not found to be satisfactory and that the functioning of the committees of the board had scope for improvement; and (vii) our Company did not frame a ‘grievance redressal policy or mechanism’, regulatory reporting relating to branch information were not made to the RBI and a ‘fair practise code’ was not submitted.

Our Company vide a letter dated November 14, 2015 responded to the RBI in relation to its observations and as was required, intimated the regulator about the compliance actions undertaken by our Company. Our Company in its letter stated the corrective measures undertaken or justified explanations to the RBI observations such as (i) details of actual sanction and redemption dates for the loans during the review period was provided and the matter of asset classification and NPA assessment was addressed; (ii) our Company assured the RBI about discontinuation of the practise to renew privately placed debentures in compliance of its directions for the review period of 2012-13 and on account of an administrative warning in relation to which our Company was fined an amount of ₹5 lakhs on July 16, 2015; (iii) our Company assured the RBI that earlier pursuant to the provisions of the Companies Act, 1956, no specific offer document was required for private placement of NCDs, the Company had issued the same on the basis of application-cum-offer letter.

However, pursuant to the Companies Act, 2013 comprehensive offer documents were issued in relation to all private placement of NCDs; (iv) our Company clarified and provided details of branch wise asset cover for bank borrowings and NCDs; (v) our Company assured the RBI about discontinuation of the practise to granting personal loans in lieu of premature closing of the debentures, in compliance with the RBI directions for the review period of 2013-14 and on account of an administrative warning to our Company; (vi) Compliance details of review of corporate governance policies and measures undertaken along with details of various committees of the Board were intimated to the RBI (vii) In response to the RBI observations, a copy of the 'grievance redressal policy' forming part of the Company's 'fair practise code' was forwarded to the RBI.

In case our Company's actions result in violation of RBI's directions and RBI passes an adverse order, it may restrict our Company from undertaking the business of NBFC. Further, we may be subject to similar inspections in the future and any adverse actions may affect our business and operations.

2. *We and our Directors are subject to certain legal proceedings and any adverse decision in such proceedings may have a material adverse effect on our business and results of operations.*

We and our Directors are subject to certain legal proceedings including civil suits, consumer litigations, recovery proceedings etc. We incur cost in defending these proceedings before a court of law. Moreover, we are unable to assure you that we or our Directors shall be successful in any or all of these actions. In the event we or our Directors suffer any adverse order, our reputation may suffer and may have an adverse impact on our business and results of operations. Further, our Company has initiated certain criminal proceeding against certain of our employees and third parties in relation to our business operations. For further details of the legal proceedings that we are subject to, please refer to the chapter titled "**Outstanding Litigations**" on page 198.

3. *We do not currently own our logo 'Muthootu Mini' and it has been licensed to us. Termination, non-renewal or renewal on unfavourable terms of this licensing agreement or any negative impact on the 'Muthootu Mini' brand may adversely affect our business, reputation, goodwill, financial condition and results of operations*

The "Muthootu Mini" logo is registered with the Registrar of Trademarks in India under Class 36 in the name of our group company Mini Muthootu Nidhi (Kerala) Limited, a Muthootu Mini Group company. The trademark has been licensed to us for use on a nonexclusive, non-assignable basis by way of an assignment letter dated May 2, 2009. We cannot assure you that we will continue to have the uninterrupted use and enjoyment of the "Muthootu Mini" logo if we are unable to confirm with the requirements under the assignment letter. Further, renewal of the agreement may be on terms and conditions that are unfavourable to us. Termination or withdrawal of the permission, may adversely affect our business, reputation, goodwill, financial condition and results of operations.

Further, all the other companies owned by our Promoters also use the "Muthootu Mini" name and logo. If any of the actions of our Promoters or companies owned by them negatively affect the "Muthootu Mini" brand, our reputation, business and financial condition may in turn be adversely affected.

4. *Our business is capital intensive and any disruption or restrictions in raising financial resources would have a material adverse effect on our liquidity and financial condition.*

Our liquidity and ongoing profitability is largely dependent upon our timely access to and the costs associated in raising resources. Our funding requirements historically have been met from a combination of borrowings such as term loans and working capital limits from banks, issuance of secured, redeemable non-convertible debentures on private placement basis and issuance of secured and unsecured redeemable non-convertible debentures by way of public placements. Thus, our business depends and will continue to depend on our ability to access diversified low cost funding sources.

Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition.

The crisis in the global credit market that began in mid-2007 destabilized the then prevailing lending model by banks and financial institutions. The capital and lending markets were highly volatile and access to liquidity had been significantly reduced. In addition, it became more difficult to renew loans and facilities as many potential lenders and counterparties also faced liquidity and capital concerns as a result of the stress in the financial markets. If any event of similar nature and magnitude occurs again in the future, it may result in increased borrowing costs and difficulty in accessing debt in a cost-effective manner. Moreover, we are a NBFC-ND-SI, and do not have access to public deposits.

The RBI has issued guidelines DBOD.BP.BC.No. 106/21.04.172/2011-12 on May 18, 2012 whereby it has instructed banks to (i) reduce their regulatory exposure on a single NBFC having gold loans to the extent of 50.00% or more of its financial assets from 10.00% to 7.50% of their capital funds; and (ii) have an internal sub-limit as decided by the Boards of the respective banks on their aggregate exposure to all such NBFCs having gold loans to the extent of 50% or more of their financial assets, taken together, which sub-limit should be within the internal limits fixed by banks for their aggregate exposure to all NBFCs taken together.

The RBI vide its circular RBI/2012-13/560 DNBD(PD) CC No. 330/03.10.001/2012-13 dated June 27, 2013 and RBI/2013-14/115 DNBS(PD) CC No.349/03.10.001/2013-14 dated July 2, 2013 issued certain guidelines with respect to raising money through private placement by NBFCs in the form of non-convertible debentures. These guidelines include restrictions on the number of investors in an issue to 49 investors, minimum subscription amount for a single investor of ₹25 lakhs and in multiples of ₹10 lakhs thereafter, prohibition on providing loan against its own debentures, etc. This has resulted in limiting the Company's ability to raise fresh debentures on private placement basis.

A significant portion of our debt matures each year. Out of our total outstanding non-convertible debentures ₹1,50,571.10 lakhs issued by our Company as of September 30, 2015, non-convertible debentures amounting up to ₹57,214.79 lakhs will mature during the next 12 months. In order to retire these instruments, we either will need to refinance this debt, which could be difficult in the event of volatility in the credit markets, or raise equity capital or generate sufficient cash to retire the debt.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. As an NBFC, we also face certain restrictions on our ability to raise money from international markets, which may further constrain our ability to raise funds at attractive rates.

Any disruption in our primary funding sources at competitive costs and would have a material adverse effect on our liquidity and financial condition.

5. *Our financial performance is primarily dependent on interest rate risk. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our company.*

Our results of operations are substantially dependent upon the level of our Net Interest Margins. Income from operations is the largest component of our total income, and constituted 100%, 99.95%, 99.88%, 99.75%, 99.77% of our total income for the six month period ended on September 30, 2015 and in Financial Years 2015, 2014, 2013, 2012, respectively. Interest rates are sensitive to many factors beyond our control, including the RBI's monetary policies, domestic and international economic and political conditions and other factors.

Over the last several years, the Government of India has substantially deregulated the financial sector. As a result, interest rates are now primarily determined by the market, which has increased the interest rate risk exposure of all banks and financial intermediaries in India, including us.

Our policy is to attempt to balance the proportion of our interest earning assets, which bear fixed interest rates, with interest bearing liabilities. A significant portion of our liabilities, such as our NCDs carry fixed rates of interest and the remaining are linked to the respective banks' benchmark prime lending rate/base rate. As of September 30, 2015, 83.64% of our borrowings were at fixed rates of interest. Moreover, we do not hedge our exposure to interest rate changes. We cannot assure you that we can adequately manage our interest

rate risk in the future or can effectively balance the proportion of our fixed rate loan assets and liabilities. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any re pricing of our liabilities compared with the re pricing of our assets.

In a rising interest rate environment, if the yield on our interest earning assets does not increase at the same time or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline at the same time or to the same extent as the yield on our interest earning assets, our net interest income and net interest margin would be adversely affected.

6. *We face increasing competition in our business which may result in declining interest margins. If we are unable to compete successfully, our market share may also decline.*

Our principal business is providing Gold Loan to retail customers in India secured by used household gold jewellery. Historically, the Gold Loan industry in India has been largely unorganised and dominated by local jewellery pawn shops and money lenders, with little involvement from public sector or private sector banks. Gold Loan financing was availed predominantly by lower income group customers with limited or no access to other forms of credit, however, such income group has gained increased access to capital through organised and unorganised money lenders, which has increased our exposure to competition. The demand for Gold Loans has also increased due to relatively lower and affordable interest rates, increased need for urgent borrowing or bridge financing requirements, the need for liquidity for assets held in gold and increased awareness and acceptance of Gold Loan financing.

All of these factors have resulted in increased competition from other lenders in the Gold Loan industry, including commercial banks and other NBFCs, who also have access to funding from customers' savings and current deposits. We are reliant on higher cost loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively will depend, to some extent, on our ability to raise low cost funding in the future. If we are unable to compete effectively with other participants in the Gold Loan industry, our business, financial condition and results of operations may be adversely affected.

Furthermore, as a result of increased competition in the Gold Loan industry, Gold Loans are becoming increasingly standardised. Variable interest rates, variable payment terms and waiver of processing fees are also becoming increasingly common. We cannot assure you that we will be able to react effectively to these or other market developments or compete effectively with new and existing competitors. Increasing competition may have an adverse effect on our business, market share and results of operations.

7. *We may not be able to realise the full value of our pledged gold jewellery in case of a default, which exposes us to a potential loss.*

We may not be able to realise the full value of our pledged gold jewellery, due to, among other things, defects in the quality of gold. We have in place a strict internal policy on determining the quality of gold prior to disbursement of the Gold Loan. However, we cannot assure that methods followed by us are fool proof and the impurity levels in the gold can be accurately assessed.

In the case of a default, we may auction the pledged gold. We cannot assure you that we will be able to auction such pledged gold jewellery at prices sufficient to cover the amounts under default. Moreover, there may be delays associated with the auction process. Any failure to recover the expected value of pledged gold could expose us to a potential loss. Any such losses could adversely affect our financial condition and results of operations.

Further we also extend loans secured by gold jewellery provided as collateral by the customer. An economic downturn or sharp downward movement in the price of gold could result in a fall in collateral value. In the event of any decrease in the price of gold, customers may not repay their loans and the value of collateral gold jewellery securing the loans may have decreased significantly in value, resulting in losses which we may not be able to support.

Although we use a technology based risk management system and follow strict internal risk management guidelines on portfolio monitoring, which include periodic assessment of loan to security value on the basis of conservative market price levels, limits on the amount of margin, ageing analysis and predetermined loan closure call thresholds, no assurance can be given that if the price of gold decreases significantly, our financial condition and results of operations would not be adversely affected. The impact on our financial position and results of operations of a decrease in gold values cannot be reasonably estimated because the market and competitive response to changes in gold values is not pre determinable.

8. Our ability to lend against the collateral of gold jewellery has been restricted on account of guidelines issued by RBI, which may have a negative impact on our business and results of operation.

RBI vide notification DNBS.CC.PD.No. 365/03.10.01/2013-14 dated January 8, 2014 has stipulated all NBFCs to maintain a loan to value (LTV) ratio not exceeding 75% for loans granted against the collateral of gold jewellery and further prohibits lending against bullion/primary gold and gold coins. This notification will limit our ability to provide loan on the collateral of gold jewellery and thereby putting us at a disadvantage vis-à-vis unregulated money lenders offering similar products. Further, RBI by way of notification DNBS.CC.PD.No. 265/03.10.01/2011-12 dated March 21, 2012, has mandated NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier 1 capital of 12%. Such restrictions imposed by RBI may erode our margins, impact our growth and business prospects.

RBI vide notification DNBR.CC.PD.No.036/03.10.01/2014-15 dated May 21, 2015, further tightened the norms for lending against the security of gold ornaments by pegging the maximum lendable value (LTV) to 30 day moving average closing price of 22 carat gold quoted by India Bullion and Jewellers Association Limited (formerly known as Bombay Bullion Association Limited).

9. As on March 31, 2012 our CRAR fell below the RBI prescribed minimum CRAR of 15%. We corrected the position during 2012-13, 2013-14 and 2014-15 and achieved a CRAR of 16.63% as on March 31, 2013, 20.77% as on March 31, 2014, 28.75% as on March 2015 and 29.98% for the six month period ended on September 30, 2015. Inability to maintain CRAR in the future may invite action from RBI and could restrict our future business growth, which may materially affect our business.

As per extant RBI norms, from March 31, 2011, all systemically important NBFCs are required to maintain a minimum Capital to Risk-Weighted Assets Ratio of at least 15% of their risk-weighted assets. Further, RBI has introduced minimum Tier I capital requirement of 12% to be effective from April 1, 2014 for NBFCs primarily for whom loans against gold jewellery comprise more than 50% of their financial assets, including us. Our Company's CRAR for the year ended March 31, 2012 fell below the minimum rate prescribed by RBI. While we have put in place measures to ensure that the CRAR does not fall below this prescribed minimum, inability to maintain CRAR in the future may invite action from RBI including penalty and suspension of our certificate of registration as a NBFC and any such action taken may have an adverse effect on our business, market share and results of operations.

Further, our capital adequacy ratio has increased from 16.63% and 20.77% as of March 31, 2013 and March 31, 2014, respectively to 28.75% as on March 31, 2015 and 29.98% for the six month period ended September 30, 2015, with Tier I capital comprising of 15.75% and 20.41%, 22.16% and 21.69% respectively. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios and Tier I capital requirements with respect to our business of Gold Loans. There can be no assurance that we will be able to maintain adequate capital adequacy ratio or Tier I capital by raising additional capital in the future on terms favourable to us, or at all. Failure to maintain adequate capital adequacy ratio or Tier I capital may adversely affect the growth of our business. Further, any regulatory change in capital adequacy requirements imposed by the RBI may have an adverse effect on our results of operation.

10. We may not be able to successfully sustain our growth strategy. Inability to effectively manage our growth and related issues could materially and adversely affect our business and impact our future financial performance.

We have expanded our operations since 2009. We have experienced considerable growth in terms of our

loans portfolio and the number of our branches and employees. Our income from operations increased from ₹909.30 lakhs in the Financial Year ended March 31, 2009 to ₹35,271.05 lakhs in the Financial Year ended March 31, 2015, and ₹19,093.44 Lacs for the six months period ending on September 30, 2015, thereby achieving compounded annual growth rate (“CAGR”) of 77.72%. In this same period, the value of loans advanced by us against pledged gold increased from ₹6,936.63 lakhs for the Financial Year ended March 31, 2009 to ₹1,75,862.64 lakhs for the Financial Year ended March 31, 2015 and ₹1,89,373.52 for the six months period ending on September 30, 2015, at a CAGR of 66.32%.

Our growth strategy includes growing our loan book, expanding network of branches and expanding the range of products and services. We cannot assure you that we will be able to execute our growth strategy successfully or continue to achieve or grow the levels of net profit earned in recent years, or that we will be able to expand further our loan book. Furthermore, there may not be sufficient demand for our services or they may not generate sufficient revenues relative to the costs associated with offering such services. Even if we were able to introduce new services successfully, there can be no assurance that we will be able to achieve our intended return on such investments. If we grow our loan book too rapidly or fail to make proper assessments of credit risks associated with borrowers, a higher percentage of our loans may become non-performing, which would have a negative impact on the quality of our assets and our financial condition.

Further principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. It also includes undertaking permission from various authorities, including RBI and various regulatory compliances. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high risk credit and impose significant costs on us.

11. Our indebtedness and the conditions and restrictions imposed by our financing agreements could restrict our ability to conduct our business and operations in the manner we desire.

As of October 31, 2015, we had an outstanding debt of ₹1,31,367.24 lakhs. We may incur additional indebtedness in the future. Many of our financing agreements include various restrictive conditions and covenants restricting certain corporate actions, and our Company is required to take the prior approval of the lender before carrying out such activities. For instance, our Company, *inter alia*, is required to obtain the prior written consent in the following instances:

- to declare and/or pay dividend to any of its shareholders whether equity or preference, during any financial year unless our Company has paid to the lender the dues payable by our Company in that year;
- to undertake or permit any merger, amalgamation or compromise with its shareholders, creditors or effect any scheme of amalgamation or reconstruction or disposal of whole of the undertaking;
- to create or permit any charges or lien, sell or dispose of any encumbered assets;
- to alter its capital structure, or otherwise acquire any share capital;
- to effect a change of ownership or control, or management of our Company;
- to enter into long term contractual obligations directly affecting the financial position of our Company;
- to borrow or obtain credit facilities from any bank or financial institution;
- to undertake any guarantee obligations on behalf of any other company;
- to make any share capital investments or advance loans or funds to any other concern including group companies;
- Repayment of dues of promoter/group companies;
- To undertake any new project/further expansion or acquire fixed assets except those indicated in the funds flow statement submitted to the bank from time to time and approved by the bank;
- Sell, assign, mortgage or otherwise dispose of any of the fixed assets charged to the Banks;
- Change of practice with regard to remuneration of the directors;

Our indebtedness could have several important consequences, including our cash flows being used towards

repayment of our existing debt, which will reduce the availability of our cash flow to fund our working capital, capital expenditures and other general corporate requirements. Moreover, our ability to obtain additional financing in the future at reasonable terms may be restricted or our cost of borrowings may increase due to sudden adverse market conditions, including decreased availability of credit or fluctuations in interest rates, particularly because a significant proportion of our financing arrangements are in the form of borrowings from banks. There could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements and we may be more vulnerable to economic downturns, which may limit our ability to withstand competitive pressures and may reduce our flexibility in responding to changing business, regulatory and economic conditions.

12. A major part of our branch network is concentrated in southern India and any disruption or downturn in the economy of the region would adversely affect our operations.

As of October 31, 2015, 96.67% of our branches i.e., 988 branches are located in the southern states of Andhra Pradesh, Telangana, Goa, Karnataka, Kerala and Tamil Nadu and the union territory of Puducherry and these constituted about 96% of our total Gold Loan portfolio as of October 31, 2015. For details please refer to “**Our Business**” on page 81. Any disruption, disturbance or breakdown in these states could adversely affect the result of our business and operations. Our concentration in these southern states of India exposes us to adverse economic or political circumstances that may arise in that region as compared to other NBFCs and commercial banks that may have diversified national presence and may have an adverse effect on our business, market share and results of operations.

Further, RBI by way of circular dated September 16, 2013 has made it mandatory for NBFC having more than 1,000 branches to obtain prior approval of RBI. This would result in delay in us branching out of the southern states of Andhra Pradesh, Telangana, Karnataka, Kerala and Tamil Nadu into rest of India resulting in continuing exposure for us to adverse economic or political circumstances that may arise in that region which, may have an adverse effect on our business, market share and results of operations.

We had made an application *vide* a letter dated March 1, 2014, for seeking approval from the RBI for opening additional branches. RBI *vide* its letter dated April 1, 2014 has conveyed its inability to grant approval for the additional branches, at this point of time. There is no guarantee that RBI may grant permissions for any further applications made by our Company for opening of new branches. In the absence of such permissions, our future growth prospects may be materially affected.

13. Our bank funding is concentrated amongst a few lenders and impairment of our relationship with any, or all, of such lenders or our inability to secure loans on favourable terms from such lenders in the future, may have a material adverse effect on our business, results of operations and financial condition.

As on October 31, 2015, we have working capital limits of ₹2,400 lakhs from Dhanalaxmi Bank Limited, ₹5,000 lakhs from Federal Bank Limited, ₹16,500 lakhs from the South Indian Bank Limited, ₹5,000 lakhs from State Bank of India and ₹4,000 lakhs from State Bank of Travancore. We may have difficulty in obtaining funding on acceptable terms from these or other lenders and other sources which we have not accessed so far. Any impairment of our relationship with any, or all, of our lenders or our inability to secure loans on favourable terms from such lenders in future may have a material adverse effect on our business, results of operations and financial condition.

14. Our Gold Loans are due within one year of disbursement, and a failure to disburse new loans may result in a reduction of our loan portfolio and a corresponding decrease in our interest income.

The Gold Loans we offer are short term loans and are due within one year of disbursement. The relatively short term nature of our loans means that we are not assured of long term interest income streams compared to other products like home loans, business loans, etc. that offer loans with longer terms. In addition, our existing customers may not obtain new loans from us upon maturity of their existing loans, particularly if competition increases. The short term nature of our loan products and the potential instability of our interest income could materially and adversely affect our results of operations and financial position.

15. Inaccurate appraisal of gold by our personnel may adversely affect our business and financial condition

Accurate appraisal of pledged gold is a significant factor in the successful operation of our business and such appraisal requires a skilled and reliable workforce. Assessing gold jewellery quickly is a specialised skill that requires assessing jewellery for gold content and quality manually without damaging the jewellery. Our Company provides training for our personnel for assessing jewellery for gold content and quality. However, in spite of rigorous training there is no guarantee that the gold ornaments appraised are accurately. Inaccurate appraisal of gold content, by our workforce may result in the gold ornament being overvalued and pledged for a loan that is higher in value than the actual value of gold content, which could adversely affect our reputation and business. We also run the risk of spurious gold being incorrectly assessed and approved for disbursement. Further, we are subject to the risk of inaccurate or fraudulent estimation of the value of pledged gold by our gold appraisers. Any such inaccuracies or fraud in relation to our appraisal of gold may adversely affect our reputation, business and financial condition.

16. We depend on customer supplied information when evaluating customer credit worthiness

In deciding whether to extend credit or enter into other transactions with customers and counter parties, we may rely on information furnished to us by or on behalf of our customers, including the financial information from which we create our credit assessments. We may also rely on customer representations as to the accuracy and completeness of customer supplied information. Any relevant changes in this information may not be made available to us. The information that we have gathered may not be sufficient to create a complete customer risk profile. Because we rely on such customer supplied information, some or all of certain customers' risk profiles may be wilfully or inadvertently wrong or misleading, which may lead us to enter into transactions that may adversely affect our financial condition and results of operations.

17. The implementation of our KYC norms as well as our measures to prevent money laundering may not be completely effective, which could adversely affect our reputation and in turn have an adverse impact on our business and results of operations

Our implementation of anti-money laundering measures required by the RBI, including KYC policies and the adoption of anti-money laundering and compliance procedures in all our branches, may not be completely effective. There can be no assurance that attempts to launder money using us as a vehicle will not be made. If we were identified to be associated with money laundering operations, our reputation may be adversely affected, which in turn could have an adverse impact on our business and results of operations

18. Our customer base comprises entirely of individual borrowers, who generally are more likely to be affected by declining economic conditions than large corporate borrowers. Any decline in the repayment capabilities of our borrowers, may result in increase in defaults, thereby adversely affecting our business and financial condition.

Individual borrowers typically are less financially resilient than larger corporate borrowers, and as a result, they are typically more adversely affected by declining economic conditions. In addition, a significant majority of our customer base belongs to the low to medium income group. Furthermore, unlike many developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about individuals, particularly our focus customer segment of the low to medium income group. It is therefore difficult to carry out precise credit risk analyses on our customers. While we follow certain procedures to evaluate the credit profile of our customers before we sanction a loan, we generally rely on the quality of the pledged gold rather than on a stringent analysis of the credit profile of our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to maintain sufficient credit assessment policies, particularly for individual borrowers, could adversely affect our loan portfolio, which could in turn have an adverse effect on our financial condition and results of operations.

19. Our branches are vulnerable to theft and burglary. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer and this may result in adverse effect on our financial condition and results of operations.

Storage of pledged gold jewellery as part of our business entails the risk of theft/burglary and resulting loss to our reputation and business. The short tenure of the loans advanced by us and our practice of processing loan repayments within short timelines require us to store pledged gold on our premises at all points in time. Some of our branches have had instances of burglaries in the past. With regard to all cases of theft/burglaries, we may not be able to recover the entire amount of the loss suffered and may receive only a partial payment of the insurance claim. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer. Further, the actual recovery of the insured amount from the insurer requires the undertaking of certain procedures, and any delay in recovery could adversely affect our reputation and results of operation.

20. *We are subject to the risk of fraud by our employees, agents and customers*

We are exposed to the risk of fraud and other misconduct by employees and customers. While we carefully recruit all of our employees and screen all our employees who are responsible for disbursement of Gold Loans and custody of gold, there have in the past been acts of fraud with respect to Gold Loans and cash related misappropriation committed by our employees. Our customers have also committed such acts of fraud and misappropriation. We are required to report cases of internal fraud to the RBI, which may take appropriate action. While we have risk monitoring policies in place, we cannot guarantee you that such acts will not be committed in the future, and any such act could adversely affect our reputation, business and results of operations.

21. *We are subject to the risk of unknowingly receiving stolen goods as collateral from customers which may result in loss of collateral for the loan disbursed*

We have in place a policy in place to satisfy ownership of the gold jewellery and have taken adequate steps to ensure that the KYC guidelines stipulated by RBI are followed and due diligence of the customer is undertaken prior to the disbursement of loans. However, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse is generally available to our Company in the event of such seizure, except the recovery of the loss from the customer. Any seizure of the gold ornaments by the authorities shall result in us losing the collateral for the loan disbursed and could adversely affect our reputation, business and results of operations.

22. *Our insurance may not be adequate to protect us against all potential losses to which we may be subjected to and if we were to incur a significant liability for which we were not fully insured, it could adversely affect our business, results of operations and financial conditions.*

We maintain insurance cover for our gold stock and cash with our branches, and cash in transit, against theft, loss or damage by fire as well as against natural calamities including earthquake and floods. As on October 31, 2015, our Company has a total insurance cover of ₹2,79,872.35 lakhs. While we exercise due care in taking out adequate cover, given the nature of fluctuating gold prices, the amount of our insurance coverage may be less than the replacement cost of all covered property and may not be sufficient to cover all financial losses that we may suffer should a risk materialise. There are many events that could significantly affect our operations, or expose us to third party liabilities, for which we may not be adequately insured. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our business, results of operations and financial condition.

23. *We may experience difficulties in expanding our business into additional geographical markets in India, which may adversely affect our business prospects, financial conditions and results of operations.*

While the Gold Loans markets in the south Indian states of Kerala, Tamil Nadu, Karnataka and Andhra Pradesh, Telangana remains and is expected to remain our primary strategic focus, we also evaluate attractive growth opportunities in other regions in India and have expanded our operations in the northern and western states of India. We may not be able to leverage our experience in the states that we are present in to expand our operations in other regions, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, customer attitude, sentimental attachments towards gold jewellery, behaviour and preferences in these cities where we may plan to expand our operations may differ from those in south Indian states of Kerala, Tamil Nadu, Andhra Pradesh,

Telangana and Karnataka and our experience in these states of Kerala, Tamil Nadu, Andhra Pradesh, Telangana and Karnataka may not provide us with benefits in other geographies. In addition, as we enter new markets and geographical areas, we are likely to compete not only with other large banks and financial institutions in the Gold Loan business, but also the local unorganised or semi-organised lenders, who are more familiar with local conditions, business practices and customs, have stronger relationships with customers and may have a more established brand name within local communities.

If we plan to further expand our geographical footprint, our business may be exposed to various additional challenges, including obtaining necessary governmental approvals, identifying and collaborating with local business partners with whom we may have no previous working relationship; successfully gauging market conditions in new markets; attracting potential customers; being susceptible to local laws in new geographical areas of India; and adapting our marketing strategy and operations to suit regions where different languages are spoken. Our inability to expand our current operations in additional geographical markets may adversely affect our growth, business prospects, financial conditions and results of operations.

24. System failures or inadequacy and security breaches in computer systems may adversely affect our operations and result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.

We are vulnerable to risks arising from the failure of employees to adhere to approved procedures, failures of security systems, computer system disruptions, communication systems failure and data interception during transmission through external communication channels and networks. Failure to prevent or detect such breaches in security or data and communications errors may adversely affect our operations.

Despite our internal controls, policies and procedures, certain matters such as fraud and embezzlement cannot be eliminated entirely given the cash nature of our business. If we fail to maintain and continue to enhance our internal controls, policies and systems, we may be unable to prevent fraud, security breaches or system failures.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services. If any of these systems do not operate properly or are disabled, or if there are other shortcomings or failures in our internal processes or systems, financial loss, disruption of our business, regulatory intervention or damage to our reputation may result. In addition, our ability to conduct business may be adversely affected by a disruption in the infrastructure that supports our businesses and the localities in which we are located. Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Constant connectivity between our branches across India and our corporate office is key to the functioning of our business. Each of our branches accesses the corporate data centre through the Internet, and all data is stored centrally in the corporate data centre. Data is replicated at our disaster recovery centres in Mumbai and Pune. Our disaster recovery system is fully operational and we continue to engage in technical exercises to test and improve our disaster plan.

25. Our ability to access capital also depends on our credit ratings. Any downgrade in our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, would negatively affect our net interest margin and our business.

The cost and availability of capital is also dependent on our short term and long term credit ratings. We have been assigned a rating of “IND BBB”: Outlook Stable rating by IND-RA for this Issue and “CARE BBB-” (upgraded from CARE BB+) rating by CARE for long term bank facilities of ₹60,000 lakhs. Further our Company has been rated in the past with a “CARE BB+” rating by CARE for Secured Redeemable Non-Convertible Debentures of ₹20,000 lakhs, which CARE had upgraded to BBB-vide letter dated June 9, 2015 for outstanding amount of ₹19,558 lakhs as of March 31, 2015. Also, “IND BB+” rating by IND-RA for Secured and Unsecured Redeemable Non-Convertible Debentures of ₹25,000 lakhs, “IND BBB” rating (upgraded from IND BB+) by IND-RA for Secured and Unsecured Redeemable Non-Convertible Debentures

of ₹30,000 lakhs and “IND BB+” rating by IND-RA for Secured and Unsecured Redeemable Non-Convertible Debentures of ₹25,000 lakhs.

Ratings reflect a rating agency’s opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any downgrade of our credit ratings would increase borrowing costs and constrain our access to debt and bank lending markets and, as a result, would adversely affect our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement of financing arrangements. For details regarding ratings received by our Company, please refer to “**Our Business - Our Borrowings and Credit Ratings**” on page 95.

26. We may be subject to regulations in respect of provisioning for non-performing assets (“NPA”). If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. These provisioning requirements may require us to reserve lower amounts than the provisioning requirements applicable to financial institutions and banks in other countries. The provisioning requirements may also require the exercise of subjective judgments of management. The RBI in its notification (RBI/2014-15/299 DNBR (PD) CC.No. 024/03.10.001/2014-15) dated March 27, 2015 has amended the regulatory framework governing NBFCs pertaining to provision for standard assets. The requirement to make a provision for standard assets has been increased from 0.25% to 0.40% of the outstanding, in a phased manner over a period of next three years.

There are multiple factors that affect the level of NPAs in our Company. Prominent among them are fall in value of gold, increase in the LTV ratio for gold loan etc.

The level of our provisions may not be adequate to cover further increases in the amount of our nonperforming assets or a decrease in the value of the underlying gold collateral. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, or if we are required to increase our provisions, this could have an adverse effect on our financial condition, liquidity and results of operations and may require us to raise additional capital. For further details, please refer to “**Our Business - Non-performing Assets (NPAs)**” on page 93.

27. We are subject to supervision and regulation by the RBI as a non-deposit-taking systemically important NBFC. In case of any adverse change in the regulations, we may have to comply with stricter regulations and guidelines issued by regulatory authorities in India which may adversely affect our business, results of operation and financial condition.

We are regulated principally by and have reporting obligations to the RBI. We are also subject to the corporate, taxation and other laws in effect in India. The regulatory and legal framework governing us may continue to change as India’s economy and commercial and financial markets evolve. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India’s Gold Loan industry. Moreover, new regulations may be passed that restrict our ability to do business.

Further, the RBI has recently amended the Prudential Norms vide notification no. DNBR. 009/CGM (CDS)-2015 dated March 27, 2015. The amendments now make it compulsory for NBFCs that are primarily engaged in lending against gold jewellery, to maintain a loan to value ratio not exceeding 75% for loans granted against the collateral of gold jewellery and to disclose in their balance sheet the percentage of such loans to their total assets. The amendments also require that such NBFCs having gold loans at least 50% of their financial assets maintain a minimum Tier I capital of 12% from April 1, 2014 and stipulate that they shall not grant any advance against bullion/primary gold and gold coins. The RBI has also reviewed its guidelines on the Fair Practice Code for all NBFCs, which among other things, cover general principles relating to adequate disclosures on the terms and conditions of loans and adopting non-coercive recovery methods. These amendments further require NBFCs engaged in extending loans against jewellery to put in place adequate internal policies to ensure, among other things, proper assessment procedures for the jewellery received as collateral, internal control mechanisms for ascertaining the ownership of gold jewellery, procedures in

relation to storage and safeguard and insurance of gold jewellery and adequate measures for prevention of fraudulent transactions.

The RBI vide RBI/2014-15/605 DNBR.CC.PD.No.036/03.10.01/2014-15 dated May 21, 2015 amended its previous circular No. RBI/2013-14/260 DNBS.CC.PD.No.356/03.10.01/2013-14 dated January 8, 2014 and notification No. DNBS(PD).263/CGM (NSV)-2013 and DNBS(PD).264/CGM (NSV)-2013 both dated September 16, 2013. The RBI vide its recent amendment has prescribed that the valuation of gold jewellery for arriving at the Loan-To-Value (LTV) shall be done at the average of the closing price of 22 carat gold for the preceding 30 days as quoted by the Bombay Bullion Association Ltd. Further, RBI decided that NBFCs may also use the historical spot gold price data publicly disseminated by a commodity exchange regulated by the Forward Markets Commission. The RBI vide its circular dated September 16, 2013 had earlier implemented the following (i) Verification of the ownership of gold by NBFC before disbursement, (ii) Standardization of value of gold accepted as collateral in arriving at LTV ratio, (iii) Prior approval of RBI for opening branches in excess of 1,000 in number, (iv) Appropriate Infrastructure for Storage of Gold Ornaments (v) requirement of copy of the PAN Card of the borrower for all transaction above ₹5 lakhs (vi) High value loans of ₹1 lakhs and above must only be disbursed by cheque, (vii) Documentation across all branches must be standardized, (viii) NBFCs shall not issue misleading advertisements like claiming the availability of loans in a matter of 2-3 minutes.

The RBI vide its circular RBI/2014-15/475 DNBR (PD) CC No.021/03.10.001/2014-15 dated February 20, 2015, issued certain guidelines with respect to raising money through private placement by NBFCs in the form of non-convertible debentures. These guidelines provide for the minimum subscription amount for a single investor to be ₹20,000, requirement of issuance of private placement of NCDs to be in two categories (i) those with maximum subscription of less than ₹1 crore and (ii) those with minimum subscription of ₹1 crore and above, per investor. The guidelines levies a restriction of a limit of 200 subscribers for every financial year, for issuance of NCDs with a maximum subscription of less than ₹1 crore, and for such subscription to be fully secured. Further an NBFC is not permitted to extend loans against the security of its own debentures (issued either by way of private placement or public issue). This may result in limiting the Company's ability to raise fresh debentures on private placement basis.

The RBI in its notification RBI/2014-15/520 DNBR (PD) CC.No.024/03.10.001/2014-15 dated March 27, 2015 and RBI/2014-15/299 DNBR (PD) CC.No.002/03.10.001/2014-15 dated November 10, 2014 has amended the regulatory framework governing NBFCs to address concerns pertaining to risks, regulatory gaps and arbitrage arising from differential regulations and aims to harmonise and simplify regulations to facilitate a smoother compliance culture among NBFCs. As per this amendment, the requirement of minimum NOF has been amended to the following milestones (a) ₹100 lakhs by the end of March 2016 and (b) ₹200 lakhs by the end of March 2017. Any failure to achieve the prescribed ceiling within the stipulated time period shall result in cancellation of certificate of registration. Moreover under the amendment, the threshold for defining systemic significance for NBFCs-ND has been revised in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakhs and above as per the last audited balance sheet. Moreover, as per this amendment, all NBFCs-ND with assets of ₹50,000 lakhs and above, irrespective of whether they have accessed public funds or not, shall comply with the prudential regulations as applicable to NBFCs-ND-SI. We cannot assure you that this notification and its applicability to us will not have a material and adverse effect on our future financial conditions and results of operations.

Compliance with many of the regulations applicable to our operations may involve significant costs and otherwise may impose restrictions on our operations. We cannot assure you that we will not be subject to any adverse regulatory action in the future. Further, these regulations are subject to frequent amendments and depend upon government policy. Our present operations may not meet all regulatory requirements or subsequent regulatory amendments. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and the business of our Company could be adversely affected. There can be no assurance that changes in these regulations and the enforcement of existing and future rules by governmental and regulatory authorities will not adversely affect our business, results of operation and financial condition.

- 28. Our ability to borrow from various banks may be restricted on account of guidelines issued by the RBI imposing restrictions on banks in relation to their exposure to NBFCs. Any limitation on our ability to borrow from such banks may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.**

Under RBI Master Circular DBR.BP.BC.No.5/21.04.172/2015-16 on bank finance to NBFCs issued on July 1, 2015, the exposure (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC engaged in lending against collateral of gold jewellery (i.e. such loans comprising 50% or more of its financial assets) should not exceed 10%, of the bank's capital funds. Banks may, however, assume exposures on a single NBFC up to 15%, of their capital funds, provided the exposure in excess of 10% is on account of funds on-lent by the NBFC to the infrastructure sector. Further, banks may also consider fixing internal limits for their aggregate exposure to all NBFCs put together and should include internal sub-limit to all NBFCs providing Gold Loans (i.e. such loans comprising 50% or more of their financial assets), including us.

This limits the exposure that banks may have on NBFCs such as us, which may restrict our ability to borrow from such banks and may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.

- 29. Attrition rate in our business is quite high and in order to be successful, we must attract, retain and motivate key employees, and failure to do so could adversely affect our business. Failure to hire key executives or employees could have a significant impact on our operations.**

In order to be successful, we are required to attract, train, motivate and retain highly skilled employees, especially branch managers and gold assessment technical personnel. If we cannot hire additional personnel or retain existing qualified personnel, our ability to expand our business will be impaired and our revenue could decline. Hiring and retaining qualified and skilled managers and sales representatives are critical to our future, and competition for experienced employees in the Gold Loan industry can be intense. In addition, we may not be able to hire and retain enough skilled and experienced employees to replace those who leave, or may not be able to re-deploy and retain our employees to keep pace with continuing changes in technology, evolving standards and changing customer preferences. The failure to hire key executives or employees could have a significant impact on our operations.

- 30. We have entered into certain transactions with related parties. Any transaction with related parties may involve conflicts of interest.**

We have entered into transactions with several related parties, including our Promoters, Directors and related entities. We can give no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. The transactions we have entered into and any future transactions with our related parties have involved or could potentially involve conflicts of interest.

For details regarding our related party transactions entered into by us as on March 31, 2015, please refer to “**Financial Statements**” on page 112.

- 31. We have not entered into any definitive agreements to utilise a substantial portion of the net proceeds of the Issue.**

We intend to use the Net Proceeds for the purposes described in “**Objects of the Issue**” on page 62. Our management will have broad discretion to use the Net Proceeds and you will be relying on the judgment of our management regarding the application of these Net Proceeds. Our funding requirements are based on current conditions and are subject to change in light of changes in external circumstances or in our financial condition, business or strategy. Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time. Any such change in our plans may require rescheduling of our current plans or discontinuing existing plans and an increase or decrease in the fund requirements for the objects, at the discretion of the management. Pending utilisation for the purposes

described above, we intend to temporarily invest the funds in interest bearing liquid instruments including deposits with banks and investments in liquid (not equity) mutual funds. Such investments would be in accordance with the investment policies approved by our Board from time to time.

32. *Our Promoters, Directors and related entities have interests in a number of entities, which are in businesses similar to ours and this may result in potential conflicts of interest with us.*

Certain decisions concerning our operations or financial structure may present conflicts of interest among our Promoters, other shareholders, Directors, executive officers and the holders of Equity Shares. Our Promoters, Directors and related entities have interests in the following entities that are engaged in businesses similar to ours:

- 1) Mini Muthootu Nidhi Kerala Limited
- 2) Cochin Mini Muthootu Nidhi Limited
- 3) Muthootu Mini Nidhi Limited

Commercial transactions in the future between us and related parties could result in conflicting interests. A conflict of interest may occur directly or indirectly between our business and the business of our Promoters which could have an adverse effect on our operations. Conflicts of interest may also arise out of common business objectives shared by us, our Promoters, Directors and their related entities. Our Promoters, Directors and their related entities may compete with us and have no obligation to direct any opportunities to us. There can be no assurance that these or other conflicts of interest will be resolved in an impartial manner.

33. *Most of our branch premises are acquired on lease. Any termination of arrangements for lease of our branches or our failure to renew the same in a favourable, timely manner, could adversely affect our business and results of operations.*

As on October 31, 2015 we have 1,022 branches in ten states and one union territory. Most of our branches are located on leased premises. If any of the owners of these premises does not renew an agreement under which we occupy the premises, attempts to evict us or seeks to renew an agreement on terms and conditions non-acceptable to us, we may suffer a disruption in our operations or increased costs, or both in those locations, which may adversely affect our business and results of operations.

34. *We are required to comply with the requirements of certain labour laws which may impose additional costs on us.*

Our branches are required to be registered under the relevant shops and establishments laws and verifications under Standards of Weights and Measures Act, 1976 of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays, leave and overtime compensation. Some of our branches have not applied for such registration and other branches have pending applications for registration. If we fail to obtain or retain any of these approvals, exemptions or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any conditions, our certificate of registration may be suspended or cancelled and we may not be able to carry on such activities.

In addition, our employees are required to be registered under the provisions of certain labour laws such as the Employees' State Insurance Act, 1948, the Payment of Gratuity Act, 1972 the Kerala Shops and Commercial Establishments Act, 1960, the Kerala Labour Welfare Fund Act, 1975, and the Employees Provident Fund and Miscellaneous Provisions Act, 1952. We are also required to maintain certain records under the provisions of these laws, which add to our costs. Certain claims have also been raised against us for non-compliance with the provisions of the Minimum Wages Act, 1948. If we are subject to penalties under these labour laws or if we do not obtain the requisite approvals, our business, financial condition and results of operations may be adversely affected.

35. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.

NBFCs in India are subject to strict regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as a NBFC with the RBI, we are required to maintain certain statutory and regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure by us to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

In addition, our branches are required to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. Some of our branches have not applied for such registration while other branches still have applications for registration pending. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities.

36. This Draft Prospectus includes certain unaudited financial information, which have been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.

This Draft Prospectus includes certain unaudited financial information in relation to our Company, for the six month period ended September 30, 2015 in respect of which the Statutory Auditors of our Company have issued their Limited Review Report dated November 12, 2015. As this financial information has been subject only to limited review as required clause 29 of the erstwhile Debt Listing Agreement and by Regulation 52 (2) (a) of the Listing Regulations, and also as described in the Standard on Review Engagements (“SRE”) 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Institute of Chartered Accountants of India, and not to an audit, any reliance by prospective investors on such unaudited financial information should accordingly, be limited. Moreover, our financial results for any given fiscal quarter or period, including the six month period ended September 30, 2015, may not be directly comparable with our financial results for any full fiscal or for any other fiscal quarter or period. Accordingly, prospective investors to the Issue are advised to read such unaudited financial information in conjunction with the audited financial information provided elsewhere in this Draft Prospectus.

RISKS PERTAINING TO THIS ISSUE

37. We are required to create a debenture redemption reserve (DRR) equivalent to 25% of the value of the NCD offered through this Issue out of profits available for distribution of dividends. In the absence of sufficient profits, we may not be able to transfer adequate amounts to the DRR.

Sub rule 7 of Rule 18 of the Companies (Share Capital and Debenture) Rules, 2014 read with Section 71 of the Act states that any company that intends to issue debentures must create a DRR to which adequate amounts shall be credited out of the profits of the company available for payment of dividend until the debentures are redeemed. The quantum of DRR to be created before the redemption liability actually arises in normal circumstances should be ‘adequate’ which has been prescribed to be 25% of the value of debentures issued through public issue, for NBFCs, like our Company (NBFCs which are registered with the RBI under section 45-IA of the RBI Act), till the debentures are redeemed and cancelled. Accordingly our Company is required to create a DRR of 25% of the value of debentures issued through the public issue. No DRR is required for Debentures placed privately. As further clarified by the DRR Circular, the amount to be credited as DRR will be carved out of the profits of the Company only and there is no obligation on the part of the Company to create DRR if there is no profit or no adequate profit for the year to pay dividends for the particular year. Accordingly, if we are unable to generate adequate profits, the DRR created by us may not be adequate to meet the 25% of the value of the NCDs issued. As the profits generated by our Company and available for distribution as dividend was inadequate to create a DRR of 25% value of the debentures issued

through the public issues, our Company has not created the prescribed adequate DRR. Current balance in the DRR is 11.26% of the amounts outstanding as of October 31, 2015.

38. *Changes in interest rates may affect the price of our NCDs.*

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity, markets' risk perception and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

39. *You may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs. Failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the Secured NCDs could expose you to a potential loss.*

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors *inter alia* including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all.

Further, in case of Secured NCDs, although our Company will create appropriate security in favour of the Debenture Trustee for the Secured Debenture Holders on the assets adequate to ensure 100.00% asset cover for the Secured NCDs, which shall be free from any encumbrances, the realisable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the Secured NCDs. A failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the Secured NCDs could expose you to a potential loss.

40. *There is no assurance that the NCDs issued pursuant to this Issue will be listed on BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the NCD issued pursuant to this issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issue of NCDs to be submitted. There could be a failure or delay in listing the NCDs in BSE.

41. *There may be no active market for the NCDs on the retail debt market/capital market segment of the BSE. As a result the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.*

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors *inter alia* including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares, (iii) the market for listed debt securities, (iv) general economic conditions, and, (v) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

42. *There may be a delay in making refund to Applicants.*

We cannot assure you that the monies refundable to you, on account of (i) withdrawal of your applications, or (ii) oversubscription, (iii) technical rejections (iv) partial allotment or (v) failure to obtain the final approval from the BSE for listing of the NCDs, will be refunded to you in a timely manner. We however, shall refund such monies, with any interest due and payable thereon as prescribed under applicable statutory and/or regulatory provisions.

- 43. Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders. In such a scenario, the Debenture Holders holding Secured NCDs will rank pari passu with other creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation**

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the Debenture Holders holding Secured NCDs will rank pari passu with other creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation.

- 44. Payments to be made on the NCDs will be subordinated to certain tax and other liabilities preferred by law. In the event of bankruptcy, liquidation or winding up, there may not be sufficient assets remaining to pay amounts due on the NCDs.**

The Secured NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding up, our Company's assets will be available to pay obligations on the Secured NCDs only after all of those liabilities that rank senior to these Secured NCDs have been paid as per section 530 of the Companies Act, 1956 or section 327 of the Companies act 2013, whichever applicable. In the event of bankruptcy, liquidation or winding up, there may not be sufficient assets remaining to pay amounts due on the Secured NCDs.

- 45. The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.**

We intend to use the proceeds of the Issue, after meeting the expenditures of and related to the Issue, for our various financing activities including but not limiting to lending and investments, to repay our existing loans and our business operations including for our capital expenditure and working capital requirements. For further details, please refer to the "**Objects of the Issue**" at page 62. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

- 46. There are certain risks in connection with the Unsecured NCDs.**

The Unsecured NCDs will be in the nature of Subordinated Debt and hence the claims of the holders thereof will be subordinated to the claims of other secured and other unsecured creditors of our Company. Further, since no charge upon the assets of our Company would be created in connection with the Unsecured NCDs, in the event of default in connection therewith, the holders of Unsecured NCDs may not be able to recover their principal amount and/or the interest accrued thereon, in a timely manner, for the entire value of the Unsecured NCDs held by them or at all. Accordingly, in such a case the holders of the Unsecured NCDs may lose all or a part of their investment therein.

External Risk Factors

- 47. Our results of operations have been, and may continue to be, adversely affected by Indian and international financial market and economic conditions.**

Our business is highly dependent on Indian and international markets and economic conditions. Such conditions in India include fluctuations in interest rates; changes in consumer spending; the level of consumer confidence; housing prices; corporate or other scandals that reduce confidence in the financial markets, among others. International markets and economic conditions include the liquidity of global financial markets, the level and volatility of debt and equity prices and interest rates, investor sentiment, inflation, the availability and cost of capital and credit, and the degree to which international economies are expanding or experiencing recessionary pressures. The independent and/or collective fluctuation of these conditions can

directly and indirectly affect demand for our lending finance and other financial products, or increase the cost to provide such products. In addition, adverse economic conditions, such as declines in housing values, could lead to an increase in mortgage and other home loan delinquencies and higher write-offs, which can adversely affect our earnings.

Global financial markets were and continue to be extremely volatile and were materially and adversely affected by a significant lack of liquidity, decreased confidence in the financial sector, disruptions in the credit markets, reduced business activity, rising unemployment, declining home prices and erosion of consumer confidence. These factors have contributed to and may continue to adversely affect our business, financial condition and results of operations.

48. *Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.*

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks and NBFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders' funds and the market price of our NCDs.

49. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business*

Terrorist attacks and other acts of violence or war may negatively affect our business and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, any deterioration in relations between India and its neighbouring countries might result in investor concern about stability in the region, which could adversely affect our business.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our NCDs.

50. *Natural calamities could have a negative impact on the Indian economy, particularly the agriculture sector, and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. For example the erratic progress of the monsoon in 2015 affected sowing operations for certain crops. Further, prolonged spells of below normal rainfall or other natural calamities could have a negative impact on the Indian economy thereby, adversely affecting our business.

51. *Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, our ability to raise financing for onward lending and the price of our NCDs.

52. *Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry*

There is no assurance that the liberalization policies of the government will continue in the future. Protests against privatization could slow down the pace of liberalization and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current economic policies of the government may change at a later date. The pace of economic liberalization could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our Company's business.

Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalization policies including relaxing restrictions on the private sector over the past several years. The Government has also announced policies and taken initiatives that support continued economic liberalization.

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

53. *Companies operating in India are subject to a variety of central and state government taxes and surcharges.*

Tax and other levies imposed by the central and state governments in India that affect our tax liability include: (i) central and state taxes and other levies; (ii) income tax; (iii) value added tax; (iv) turnover tax; (v) service tax; (vi) stamp duty; and (vii) other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. For example, a new tax code is proposed to be introduced in the Indian Parliament.

The statutory corporate income tax in India, which includes a surcharge on the tax and an education cess on the tax and the surcharge, is currently 33.99%. The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

Our Strengths

We feel that the following competitive strengths position us well for continued growth:

We are a non-deposit taking systemically important NBFC in the Gold Loan sector in South India associated with Muthootu Mini Group which has a long operating history and large customer base.

Our group has been engaged in gold loan financing since 1986. We have, over the years, been successful in expanding our brand name, as well as our customer base to different geographical locations in India. Our total number of Gold Loan customers experienced a slight decline from 2,75,895 as of March 31, 2014 to 2,42,525 customers, as of March 31, 2015 and increased again to 3,64,635 customers as of October 31, 2015. We attribute our growth, in part, to our market penetration, particularly in areas which we believe are less served by organized lending institutions, which is reflected in the fact majority of our branches are located in rural and semi-urban areas as of October 31, 2015 and simple and streamlined procedural formalities which our customers need to complete in order to complete a loan transaction with us, which enables us to attract new and retain existing customers. We also attribute our growth to customer loyalty. We believe that a large portion of our customer base returns to us when they are in need of funds.

Flexible loan schemes, efficient customer service and short response time

We believe the growth in our Gold Loan portfolio is partly due to the flexible Gold Loan schemes that we offer to our customers and efficient customer service. Depending on the individual needs, we provide our customers multiple options with respect to the loan amount, advance rate per gram of gold and interest rate. We also allow customers to prepay their loans without penalty.

We provide our customers with a simple and transparent process to avail Gold Loans and other services with trained staff members at all our branch locations. We endeavour to staff our branches with persons belonging to the same locality as our customers which enables us to know our customers and their specific requirements better and enables us to meet up to their expectations in an efficient manner. In addition, we strive to complete our Gold Loan transactions within a short timeframe, which we believe provides us with a competitive edge. Efficient technology support, skilled workforce and clear policies on internal processes enable us to achieve the above objective. Although disbursement time may vary depending on the loan size and the number of items pledged, we can generally disburse a loan within a short span of the time the gold is tendered to the branch staff.

Furthermore, since our loans are all collateralized by gold jewellery, there are minimal documentary and credit assessment requirements, which shorten our turnaround time.

Extensive branch network across rural and semi-urban areas in South India

In the past we have rapidly expanded our branch network across rural and semi-urban areas in South India, which we believe has provided us with an advantage over our competitors. Our total number of branches grew from 224 branches as of March 31, 2011 to 577 branches as of March 31, 2012 and to 959 branches as of March 31, 2013. After reaching a peak level of 1,053 Branches, in the phase of consolidation, we have pruned our branch network to 1,022 branches as on October 31, 2015. This was done by either merging branches in areas where we had more than one operation, in close proximity, or closing off branches, which were a drag on the profits. As of October 31, 2015 we have our branches in the states of Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Telangana, Goa, Delhi, Haryana, Uttar Pradesh, Maharashtra and the union territory of Puducherry. For further details please refer to “**Our Business – Branch Network**” on page 90. About 70% of our branches are in rural and semi-urban areas in South India. We believe that the presence of these rural branches has contributed to a robust growth in our revenue, over the last few years, from Gold Loan business.

Advanced technology systems and established processes

We believe that we have implemented a state of the art technology platform across our operations. We have invested in our technology systems and processes to improve overall productivity and ensure good management of customer credit quality and security quality. Our IT infrastructure has been developed and implemented in the Financial Year 2008 and links our network of branches across the country with the corporate office. We have a core banking platform with real time data transmission and updates, and have managed to minimise errors, ensure faster data transmission and risk monitoring. Our management has also benefited from availability of real time information. We upload data at each branch to facilitate online information access for faster decision making. In addition, our technology platform has helped us develop an effective system based risk assessment and internal control system and internal audit. We also have a disaster recovery system located outside of Kerala which replicates data on a real time basis. Our centralized technology aids us in offsite surveillance of all our branches. Our technology also helps reduce the time it takes to complete Gold Loan transactions.

Our Company has put in place well defined and efficient process that enables us to achieve uniformity in our operations across all our branches. Our processes are developed at the corporate office level by professionals who have extensive experience in the areas of banking and financial services with supervision from our management. Well defined processes and an efficient technology platform, enables us to keep a better check over our entire branch network and helps us in detecting shortcomings.

We believe that our advanced technology systems and established processes enable us to respond to market opportunities and challenges swiftly, improve the quality of service to our customers and improve our risk management capabilities.

Strong support system, including appraisal, internal audit and inventory control and safety systems

Our ability to appraise the quality of the gold jewellery to be pledged in a short period of time is critical to our business.

Assessing the gold jewellery quickly and accurately is a specialized skill that involves an assessment for gold content and quality manually without damaging the jewellery. We undertake the assessment activity in-house using tested methods of appraisal of gold.

Once the Gold Loan is made, we have a system in place for continuous monitoring of the pledged gold by internal audit and risk management teams. In accordance with our internal audit policy, all of our branches are subject to inspection between 120 days and 150 days depending upon management perception of the risk associated with the branch. High value gold loans of ticket size of ₹1 lakh and above are verified by Regional Managers during their branch visits and vigilance audits can be conducted at any branch at any time between two audits. At the time of conducting an inspection, a quality check on the inventory is also carried out, which involves physical security checks and checks on the quality of pledged gold. All our branches are fitted with strong rooms which are reinforced concrete cement structures built per industry standards and practices to ensure high level of security.

Experienced management team and skilled personnel

Our Promoter, Mr. Roy M. Mathew is a third generation entrepreneur and has over three decades of experience in Gold Loan business. Our senior and operating level management teams have extensive experience in the areas of banking and financial services and we believe that their considerable knowledge of and experience in the industry enhances our ability to operate effectively. Our staff, including professionals, covers a variety of disciplines, including gold appraisal, internal audit, technology, accounting, marketing and sales. Our management has experience in identifying market trends and suitable locations for expanding and setting up branches to suit our target customers. Our workforce also consists of appraisers who are skilled in the evaluation of the worth and authenticity of the gold that is pledged with us and we conduct periodic training programs to augment their knowledge and efficiency in performing this task

Strategy

Our business strategy is designed to capitalize on our competitive strengths and enhance our leadership position in the Gold Loan industry. Key elements of our strategy include:

Further growth in gold loan business in rural and semi-urban markets to tap into the potentially large market for gold loans

Indian gold loan market expanded considerably in recent years. The recent developments in the gold loan market have both positive and negative implications. In a country, where loans are required to be raised for meeting some sudden medical exigency or an educational loan or a business loan by a small and medium enterprise owner, the gold loans extended by the NBFCs are very handy and flexible, though costlier than such loans disbursed by banks. At a time, when financial inclusion is a major policy goal, the services rendered by the gold loans NBFCs, which are a part of the organised loan market are contributing in a reasonable measure to cater to the borrowing requirements of a needy section of the society. Secondly, gold is an idle asset in the hands of individuals and there is a huge unlocked economic value in the Indian economy, which is said to have anywhere between 18,000 to 20,000 tonnes of gold. Just a small fraction of about three percent of this idle gold stock is being used for raising gold loans, at present (*Source: RBI Report of the Working Group to study the issues related to gold imports and gold loan NBFCs in India Feb 2013*).

We intend to increase our presence in under-served rural and semi-urban markets, where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not available in a timely manner at reasonable rates of interest, or at all. A typical Gold Loan customer expects high loan-to-value ratios, rapid and accurate appraisals, easy access, low levels of documentation, quick approval and disbursement and safekeeping of their pledged gold. We believe we meet these criteria, and thus our focus is to expand our Gold Loan business.

Diversifying our business into metros and select Tier 1 cities across India

In addition to our continuing focus on rural and semi-urban markets in the states that we are present, we intend to open branches in metros and select Tier 1 cities where we believe our business has high growth potential. Subject to necessary approvals we intend to open new branches in the states of Andhra Pradesh, Telangana, Delhi, Goa, Haryana, Karnataka, Uttar Pradesh and Union territory of Puducherry during the current Financial Year in addition to Kerala and Tamil Nadu. We carefully assess the market, location and proximity to target customers when selecting branch sites to ensure that our branches are set up close to our target customers. We believe our customers appreciate this convenience and it enables us to reach new customers.

Expanding the visibility of the Muthoottu Mini Brand to attract new customers

Our brand is key to the growth of our business. We started focusing on brand building exercise in 2011. Our logo was re-designed and the tag- line '*stands by you always*' was introduced. We believe that we have built a recognizable brand in the rural and semi-urban markets of India, particularly in the southern states of Kerala, Tamil Nadu, Karnataka and Andhra Pradesh, Telangana. We intend to continue to build our brand through advertising and public relations campaigns and undertaking other marketing efforts on radio, television and outdoor advertising.

Undertaking new business initiatives to diversify our revenue stream by leveraging our branch network and customer base.

Gold Loan and Personal Loan as on October 31, 2015 account for 98.37% and 1.53% of total loans of our Company, respectively. These contribute to over 99.90% of our total revenues, making us very dependent on this single income stream, interest on loans. With a view to diversify our incomes and be less dependent on interest alone, we have initiated negotiations to broaden our fee based income. We are in the process of finalizing corporate agency agreements with life, health and general insurance companies for marketing their life insurance plans, health insurance products and other non-life products. We entered into Memorandum of Understanding dated April 12, 2013 with Doha Broking & Finance Co. Limited for carrying out online trading in equity derivative and commodity segments using our Depository Participant platform. Further, our Company recently procured registration with the IRDA, to act as a corporate agent for procuring and soliciting insurance business both in the life insurance and general insurance category. The license no. LVG 10402404 was assigned to our Company and is valid till February 8, 2018. Our Company intends to capitalise on the huge client base and large branch network, to offer these additional products and services.

Strengthening our risk management, loan appraisal and technology systems to have an error less streamlined growth in business

Risk management is viewed by us as a crucial element for the expansion of our Gold Loan business. We therefore continually focus on improving our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk. We propose to make significant investments in personnel, technology and infrastructure in order to improve process efficiencies and mitigate business risks. We have recruited individuals who have significant risk management experience and plan to retain this focus in hiring additional risk management personnel. Going forward, we plan to continue to adapt our risk management procedures to take account of trends we have identified, including our loan loss experience. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Gold Loan financing business without experiencing significant increases in non-performing assets.

Since we plan to expand our geographic reach as well as our scale of operations, we intend to further develop and strengthen our technology platform to support our growth and improve the quality of our services. We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business.

Date: December 9, 2015

Muthoottu Buildings,

Kozhencherry,

Pathanamthitta – 689 641,

Kerala, India

The following tax benefits will be available to the debenture holders as per the existing provisions of law. The tax benefits are given as per the prevailing tax laws and may vary from time to time in accordance with amendments to the law or enactments thereto. The debenture holder is advised to consider the tax implications in respect of subscription to the debentures after consulting his tax advisor as alternate views are possible. We are not liable to the debenture holder in any manner for placing reliance upon the contents of this statement of tax benefits.

A. IMPLICATIONS UNDER THE INCOME TAX ACT, 1961 (“LT ACT”)

i. To the Resident Debenture Holder

1. Interest on NCD received by debenture holders would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 193 of the I.T. Act. However, no income tax is deductible at source in respect of the following:

- (a) In case the payment of interest on debentures to Debenture Holder being a resident individual or a Hindu undivided family (“HUF”) does not or is not likely to exceed Rs. 5,000.00 in the aggregate during the Financial Year and the interest is paid by an account payee cheque.
- (b) On any security issued by a company in a dematerialized form and is listed on recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 and the rules made there under (with effect from June 01, 2008).
- (c) When the Assessing Officer issues a certificate on an application by a Debenture Holder on satisfaction that the total income of the Debenture Holder justifies no/lower deduction of tax at source as per the provisions of Section 197(1) of the I.T. Act; and that certificate is filed with the Company before the prescribed date of closure of books for payment of debenture interest.
- (d) (i) When the resident Debenture Holder with Permanent Account Number (“PAN”) (not being a company or a firm) submits a declaration as per the provisions of Section 197A(1A) of the I.T. Act in the prescribed form 15G verified in the prescribed manner to the effect that the tax on his estimated total income of the financial year in which such income is to be included in computing his total income will be NIL. However under Section 197A(1B) of the I.T. Act, “form 15G cannot be submitted nor considered for exemption from tax deduction at source if the dividend income referred to in Section 194 of the I.T. Act, interest on securities, interest, withdrawal from NSS and income from units of mutual fund or of Unit Trust of India as the case may be or the aggregate of the amounts of such incomes credited or paid or likely to be credited or paid during the previous year in which such income is to be included exceeds the maximum amount which is not chargeable to income tax”.

To illustrate, as on April 01, 2015, the maximum amount of income not chargeable to tax in case of individuals (other than senior citizens and super senior citizens) and HUFs is Rs. 250,000.00; in the case of every individual being a resident in India, who is of the age of 60 years or more but less than 80 years at any time during the Financial Year (Senior Citizen) is Rs. 300,000.00; and in the case of every individual being a resident in India, who is of the age of 80 years or more at any time during the Financial Year (Super Senior Citizen) is Rs. 5,00,000.00 for Financial Year 2015-16.

Further, section 87A of the I.T. Act provides a rebate of 100% of income-tax or an amount of Rs. 2,000.00 whichever is less to a resident individual whose total income does not exceed Rs. 500,000.00.

(ii) Senior citizens, who are 60 or more years of age at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non-deduction of tax at source in accordance with the provisions of Section 197A(1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is NIL.

(iii) In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form No. 15G with PAN / Form No. 15H with PAN / Certificate issued under Section 197(1) have to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any tax withholding.

2. In case where tax has to be deducted at source while paying debenture interest, the Company is not required to deduct surcharge, education cess and secondary and higher education cess.
3. As per Section 2(29A) of the I.T. Act, read with Section 2(42A) of the I.T. Act, a listed debenture is treated as a long term capital asset if the same is held for more than 12 months immediately preceding the date of its transfer. Under Section 112 of the I.T. Act, capital gains arising on the transfer of long term capital assets being listed securities are subject to tax at the rate of 20% of capital gains calculated after reducing indexed cost of acquisition or 10% of capital gains without indexation of the cost of acquisition. The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition/indexed cost of acquisition of the debentures from the sale consideration.

However as per the third proviso to Section 48 of I.T. Act, benefit of indexation of cost of acquisition under second proviso of Section 48 of I.T. Act, is not available in case of bonds and debenture, except capital indexed bonds. Thus, long term capital gains arising out of listed debentures would be subject to tax at the rate of 10% computed without indexation.

In case of an individual or HUF, being a resident, where the total income as reduced by such long-term capital gains is below the maximum amount which is not chargeable to income-tax, then, such long-term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such long-term capital gains shall be computed at the rate mentioned above.

4. Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act. The provisions relating to maximum amount not chargeable to tax described at para 3 above would also apply to such short term capital gains.
5. In case the debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act.

i) To the Non Resident Debenture Holder

1. A non-resident Indian has an option to be governed by Chapter XII-A of the I.T. Act, subject to the provisions contained therein which are given in brief as under:
 - (a) As per Section 115E of the I.T. Act, interest income from Debentures acquired or purchased with or subscribed to in convertible foreign exchange will be taxable at 20%, whereas, long term capital gains on transfer of such Debentures will be taxable at 10% of such capital gains without indexation of cost of acquisition. Short-term capital gains will be taxable at the normal rates of tax in accordance with and subject to the provisions contained therein.
 - (b) As per Section 115F of the I.T. Act, long term capital gains arising to a non-resident Indian from transfer of debentures acquired or purchased with or subscribed to in convertible foreign exchange will be exempt from capital gain tax if the net consideration is invested within six months after the date of transfer of the debentures in any specified asset or in any saving certificates referred to in section 10(4B) of the I.T. Act in accordance with and subject to the provisions contained therein. If only part of such net consideration is invested within the prescribed period, then such gains would be chargeable to tax on a proportionate basis.

- (c) As per Section 115G of the I.T. Act, it shall not be necessary for a non-resident Indian to file a return of income under Section 139(1) of the I.T. Act, if his total income consists only of investment income as defined under Section 115C and/or long term capital gains earned on transfer of such investment acquired out of convertible foreign exchange, and the tax has been deducted at source from such income under the provisions of chapter XVII-B of the I.T. Act in accordance with and subject to the provisions contained therein.
 - (d) Under Section 115H of the I.T. Act, where a non-resident Indian becomes a resident in India in any subsequent year, he may furnish to the Assessing Officer a declaration in writing along with return of income under Section 139 for the assessment year for which he is assessable as a resident, to the effect that the provisions of Chapter XII-A shall continue to apply to him in relation to the investment income (other than on shares in an Indian company) derived from any foreign exchange assets in accordance with and subject to the provisions contained therein. On doing so, the provisions of Chapter XII-A shall continue to apply to him in relation to such income for that assessment year and for every subsequent assessment year until the transfer or conversion (otherwise than by transfer) into money of such assets.
2. In accordance with and subject to the provisions of Section 115-I of the I.T. Act, a Non-Resident Indian may opt not to be governed by the provisions of Chapter XII-A of the I.T. Act. In that case,
 - (a) Long term capital gains on transfer of listed debentures would be subject to tax at the rate of 10% computed without indexation.

If the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of capital gains tax exempted earlier would become chargeable to tax as long term capital gains in the year in which such residential house is

INDUSTRY

Indian Economy

Growth

Consumption and investment growth trailing GDP

Source: Central Statistics Office, CRISIL Research

India's economic growth fell sharply in fiscal 2012 and the rise since then has been sluggish. Though private consumption is looking up, it has risen at a slow pace, with growth averaging 6.3% during fiscals 2013 to 2015. At the same time, investment pick-up in the economy has been much slower, bringing down its share in GDP to 29.8% in fiscal 2015 from 33.6% in fiscal 2012. While high inflation and poor income visibility hindered consumption, policy uncertainty leading to delay in project clearances and shortages in fuel supply brought down efficiency of investments. Sluggish demand conditions and huge existing unutilized capacities in the manufacturing sector further held back fresh investments.

Now, with a new government at the Centre taking steps to debottleneck decision-making, and with the windfall from the fall in global oil and commodity prices, optimism has returned. India's economy is on a gradual uptrend. The slump in global oil and commodity prices has helped keep inflation and the fiscal and current account deficits in check. The government initiated several steps to clear infrastructure bottlenecks and improve ease of doing business, which should benefit the economy in the medium term. In addition, with softening inflationary pressures, the Reserve Bank of India (RBI) has reduced its policy interest rates by 125 basis points so far in 2015, to 6.75% from 8%. This paves the way for softer interest rates in the economy.

Despite many positives, the investment cycle in India is yet to show any sustainable signs of pick-up. In addition, large non-performing assets in the banking sector have fostered risk aversion, muted monetary transmission and credit growth. Large stock of bad loans have also impaired banks' ability to finance growth. The investment outlook for fiscal 2016, therefore, hinges on increased public investments as well as some pick-up in demand. In such a scenario, the ability of the government to kick-start investments through fiscal measures is crucial. It's here that infrastructure – specifically roads, power transmission/distribution and railways – comes into the picture because spending on it has a significant multiplier effect of creating demand for steel, cement, capital goods and commercial vehicles and spurring investments in the manufacturing space as well.

More recently, GDP growth stood at 7.0% y-o-y in Q1 FY16 was lower than Q4 FY15 and came in below consensus expectations. Consumption growth at 7.4% was slightly lower than Q4 FY15 while investments (4.9%) saw a marginal pickup. That said, investment growth continues to be on a fragile footing while consumption too is showing a modest recovery. Yet another year of weak monsoons has continued to dent consumption demand, especially rural demand where wage growth has already slowed. More disappointingly, net exports were a drag on growth. On the supply side, as expected, agriculture growth was below trend at 1.9% while the non-agriculture sector rose by 8.0%.

Nevertheless, low inflation and easy monetary conditions have remained supportive of growth in FY16. Commodity prices continue to decline and are a positive for consumer oriented sectors such as auto. We expect oil prices to average at \$ 53.5/barrel in FY16 and \$ 51.5/barrel in FY17. We expect GDP growth to rise to 7.4% with consumption growth at 6.6% in FY16. This, we believe, will improve capacity utilization rates and lead to revival of private

investments by the second half of FY17.

On the external front, India appears as a bright spot among emerging markets. It is now the fastest growing economy among BRICS nations (Brazil, Russia, India, China, and South Africa) and is no longer seen as part of the "fragile five" (the others being Turkey, Indonesia, Brazil, and South Africa). India's strengthening economy now makes it better prepared to face the volatility in capital flows arising from interest rates hikes by the US Federal Reserve.

Inflation and monetary policy

Consumer price inflation (CPI) so far this fiscal remains benign. Retail inflation dropped to 4.6% average in April-October 2015 compared with 6.9% a year ago. Inflation has come down sharply this year for three reasons: the decline in global crude oil and commodity prices, sluggish domestic demand conditions, and softening food inflation. Of these, the biggest contributor to the decline in CPI inflation has been food prices. But while nearly all food components are seeing a decline, inflation in pulses has spiked, to the sharpest in a decade. However, given sluggish domestic demand conditions, core inflation has remained low, but sticky around 5.3%.

Despite the inflation pick-up in recent months, we believe the CPI will remain within RBI's target of 5.8% by January 2016. We maintain our CPI inflation forecast at an average of 5.4% in 2015-16, down from 6% last fiscal. Lower crude oil prices, proactive measures taken by the government to contain food inflation and combat the adverse impact of a weak monsoon, and fiscal discipline are expected to converge and keep inflation low.

The government and the RBI agreed on a new monetary policy framework to target inflation at 6% by January 2016 and at 4% with a band of +/- 2% in subsequent years. This will increase transparency and clarity on central bank action and also anchor inflation expectations in the economy. While the inflation target this fiscal is achievable, squeezing inflation to 4% in the medium term sustainably is a tall order. This will require the government to take concrete measures to address structural rigidities such as raising agriculture productivity, improving storage infrastructure and progress towards a national market among other things.

The RBI has reduced the policy repo rate by 125 bps since it first started lowering the rate in January this year. With inflation within target, continued windfall from lower global oil and commodity prices, postponement of the rate hike by the Fed, and the need to push up pace of domestic demand recovery prompted the RBI's move. The onus is now on the government to remove impediments to transmission while following a prudent fiscal path, and for banks to pass on the rate cut. The RBI's policy will remain accommodative but it will maintain caution in terms of demand-side pressures on inflation that could arise from the Seventh Pay Commission payout expected in the next two fiscals. Plus the RBI has also set the CPI inflation target at ~5% by end 2016-17 and reiterated it at 4% by end 2017-18. Therefore, the pause from hereon could be a prolonged one unless there is a significant positive surprise on inflation.

G-Sec yields

The yield on the 10-year benchmark 8.40% 2024 bond averaged 7.76% at end of fiscal 2015. The yields remained a bit rigid in the first five months of this fiscal, but started declining at a faster pace from September onwards led by the cumulative impact of a policy repo rate reduction, RBI's active liquidity management operations, and lower inflation. In September alone, the RBI reduced the policy repo rate by 50 bps to 6.75%, while the yield on the 10 year Gsec benchmark 7.72% 2025 bond fell 25 bps (this has been the benchmark 10 year bond since July 2015). As a result, the yield ended the month of September at 7.54%. Yields have perked up slightly since then, but have remained range bound. Going ahead, we expect the 10-year G-sec yield to settle around 7.5% by March 2016 from 7.7% at March 2015.

Our forecast factors in no more rate cut by the RBI in the current fiscal, continued efforts to manage liquidity, a low inflation outlook, and an under-control fiscal deficit amid benign crude oil prices. There have been some other important developments on the government bonds front. Firstly, RBI has allowed FPIs to invest in state government bonds, the limit for which is to be increased in phases to reach 2% of the outstanding stock by March, 2018. Secondly, RBI has started selling government bonds with 40-year maturity, the longest ever, from October 23. Till now, the 30-year bond was the longest duration security issued by the Central government. The 40-year bonds will help elongate the maturity of the portfolio, which is preferred to limit the rollover risk and is followed in advanced economies. This is a welcome move for insurance firms and provident funds, which generally seek to hedge long-term liabilities.

Non-Banking Financial Institution structure in India

Indian financial system includes banks and non-bank financial institutions. Though banking system remains dominant in financial services, non-banking financial institutions have grown in importance by carving a niche for themselves in the under-penetrated regions and unbanked segments.

SECTION I: NBFCs- an important part of the credit system

Financing needs in India have risen in sync with the notable growth recorded by the economy over the past decade. Non-banking financial companies (NBFCs) have played a major role in meeting this need, complementing banks and other financial institutions.

To their credit, NBFCs help fill the gaps in availability of financial services with respect to products as well as customer and geographical segments. A strong linkage at the grassroots level makes them a critical cog in catering to the unbanked masses in rural and semi-urban reaches, thereby enabling the government and regulators to achieve the mission of financial inclusion.

Classification of NBFCs

NBFCs are classified on the basis of liabilities in to two broad categories – a) deposit taking and b) non-deposit taking. Deposit taking NBFCs (NBFC – D) are subject to requirements of capital adequacy, liquid assets maintenance, and exposure norms etc.

Further, in 2015, non-deposit taking NBFCs with asset size of Rs 5 billion and above were labelled as ‘systemically important non-deposit taking NBFCs’ (NBFC – ND – SI) and separate prudential regulations were made applicable to them.

Gold loan Industry

Possessing gold has always been a symbol of prosperity in India and the yellow metal is always a safe haven that hedges against inflation. Gold is purchased either as jewellery, bars or coins and is also a readily acceptable collateral by lenders, as it is highly liquid. Ironically enough, for the huge gulf between urban and rural households, most of the gold in India is held by people in rural areas, and is mostly the only asset they possess though in small quantity. In cases of crop failure or a medical exigency, people in rural areas raise cash quickly from pawn-brokers and money-lenders, given a lack of access to banking facilities.

Regulatory curbs halted the exponential growth of gold loan disbursements

Unorganised lenders had initially dominated the gold loan market, commanding a nearly 75% share. Though moneylenders and pawn brokers understand the psyche of local borrowers well and offer immediate liquidity without any formalities/ documentation, the absence of regulatory oversight leaves customers vulnerable to exploitation. Organised lenders (banks & NBFCs) thus moved to seize this vast untapped market through an aggressive focus, garnering a significant market share from unorganised lenders, growing at a 76% CAGR between 2008-09 and 2011-12.

The rapid growth in the NBFCs' gold loan offtake alarmed the Reserve Bank of India (RBI), given the significant amount of public funds (deposits) borrowed by the NBFCs and the high concentration of gold loans in their books

(gold loans accounted for 90% of the loan book).

The RBI thus moved to tighten regulations on gold loans, through several measures including: 1) a cap on the loan-to-value (LTV) ratio; 2) guidelines on fair practice codes; 3) guidelines on collateral auctions and 4) a curb on lending against bullion or gold coins. These measures, along with a dip in the gold prices led to a slowdown in the overall gold loan book, which expanded by 22% in 2012-13 to Rs 1,998 billion. While NBFC AUMs grew by a paltry 4%, growth was driven by banks, which focused more on secured lending avenues in a scenario of slowdown in corporate credit.

In September 2013, the RBI issued new norms for NBFCs:

- 1) Adoption of a uniform valuation methodology
- 2) Prior approval for any expansion exceeding 1000 branches.
- 3) Disbursement of loans exceeding Rs 0.1 million and above only through cheques.

RBI also raised the permissible LTV ratio up to 75% in January 2014 from 60% earlier. Banks were also asked to cap the LTV ratio at 75% and also standardise procedures for valuing collateral. Post these changes, both banks and NBFCs came at a level playing field.

In 2013-14, a 3% fall in gold prices along with the restrictions imposed by the RBI led to a 4% dip in gold loan AUMs. Growth was again driven by banks, while NBFC AUMs declined by 18%. In 2014-15 however, despite a 6% decline in gold prices, gold loan AUMs grew by 5%. NBFC AUMs recovered 10%, driven by greater demand for gold loans.

Smoother and faster disbursements give NBFCs the competitive edge

NBFCs and banks operate on differing philosophy and approach in the gold loan market, as is reflected in their interest rates, ticket sizes and loan tenures for different lenders.

NBFCs focus more on the gold loans business and have, therefore, built their service offerings by investing significantly in manpower, systems and processes and branch expansion. This has helped them attract and serve more customers.

NBFCs also ask for fewer documents, which enables a faster turnaround, while adequate systems ensure quick disbursals. For example, NBFCs have dedicated personnel to value the gold jewels at the branches.

Banks, on the other hand, take a more vigilant approach. They view gold loans as a safer means to meet their priority sector lending targets, especially agricultural loans. Even for non-agricultural gold loans, they mostly target organised segment or their existing customers, as they are unable to offer flexible and rapid disbursals that specialised NBFCs

can. Among banks too, south-based banks — Indian Overseas Bank, Indian Bank, South Indian Bank — have a higher share in non-agricultural gold loan disbursements, given the region's proclivity for gold loans.

While the RBI's curbs had helped banks eat into NBFCs' hold on the gold loan market in 2012-13, the latest regulations provided a level playing field for both classes of lenders, thus helping NBFCs to gradually recover market share in 2014-15.

South-based NBFCs dominate the gold loan NBFC market

This is an obvious consequence of a more evolved gold loan market in the region: India's top 3 gold loan NBFCs are based in the south and control more than 80% of the NBFC market (AUMs) as of March, 2015 (See chart below).

However, many smaller NBFCs have reduced focus on the business, given the RBI's stringent norms and the fall in gold prices.

South remains key market; even as other regions emerge

Demand for gold is skewed towards the Southern states (see chart below), as households here account for the largest share of accumulated gold stock in the form of ornaments, coins, bars, etc.

Regional Gold demand

Moreover, gold holders in the south are more open to pledging gold to raise funds than people in the other regions.

For instance, Tamil Nadu, Kerala, Andhra Pradesh, Karnataka and Pondicherry together account for about 62% of gold loan AUMs. Although attempts by NBFCs to expand in certain pockets of northern and western India have lowered the share of the southern markets from 71% earlier, it still remains a stronghold.

Though the south will continue to dominate, more growth is expected to emerge from the other underpenetrated regions such as in northern and western India. Growth will also be aided by the changing consumer perception about gold loans, and rising funding requirements.

However, NBFCs will still have to contend with public sentiment against pledging gold and the distrust against financiers as they look to expand beyond the south.

NBFC profitability witnessing a gradual improvement

As the RBI's regulations had led to intensified competition from banks, NBFCs lowered interest rates in a bid to acquire customers. This dragged down gross margins. An increase in defaults also increased credit costs of NBFCs, hitting their net margins too.

In 2014-15, NBFCs' return on managed assets was stable. Yields declined as competition in specific markets added pressure on interest rates. Negative realisations on the auction of collateral also affected yields. However, gross spreads improved marginally owing to a decline in the cost of funds.

Decline in gold prices have led to an increase in NPAs

Historically, the emotional value attached to gold and its rising prices kept defaults under control. However, gross NPAs rose significantly by 105 bps in 2012-13, as gold prices plummeted. Delinquencies also rose for loans where the collateral's value fell below the repayment (principal and accumulated interest) due. Moreover, changing regulations forced NBFCs to slow down on collateral auctions which also contributed to the rise in NPAs. With gold prices tending downwards for most part of the subsequent years and little progress on the auctioning front, NPAs have remained high.

Gold price trend

Source: CRISIL Research

In 2014-15, gross NPAs increased marginally by about 18 bps led by a decline in gold prices. On the other hand, better clarity on the auctioning process helped financiers auction the collateral on bad loans (including the backlog in the previous years).

We expect gross NPAs to increase in 2015-16 as NBFCs move to 150-day recognition. It is expected to decline in 2016-17 despite a shift towards 120-day recognition, as an expected rise in domestic gold prices will limit defaults.

Our Strengths

We feel that the following competitive strengths position us well for continued growth:

We are a non-deposit taking systemically important NBFC in the Gold Loan sector in South India associated with Muthootu Mini Group which has a long operating history and large customer base.

Our group has been engaged in gold loan financing since 1986. We have, over the years, been successful in expanding our brand name, as well as our customer base to different geographical locations in India. Our total number of Gold

Loan customers experienced a slight decline from 2,75,895 as of March 31, 2014 to 2,42,525 customers, as of March 31, 2015 and increased again to 3,64,635 customers as of October 31, 2015. We attribute our growth, in part, to our market penetration, particularly in areas which we believe are less served by organized lending institutions, which is reflected in the fact majority of our branches are located in rural and semi-urban areas as of October 31, 2015 and simple and streamlined procedural formalities which our customers need to complete in order to complete a loan transaction with us, which enables us to attract new and retain existing customers. We also attribute our growth to customer loyalty. We believe that a large portion of our customer base returns to us when they are in need of funds.

Flexible loan schemes, efficient customer service and short response time

We believe the growth in our Gold Loan portfolio is partly due to the flexible Gold Loan schemes that we offer to our customers and efficient customer service. Depending on the individual needs, we provide our customers multiple options with respect to the loan amount, advance rate per gram of gold and interest rate. We also allow customers to prepay their loans without penalty.

We provide our customers with a simple and transparent process to avail Gold Loans and other services with trained staff members at all our branch locations. We endeavour to staff our branches with persons belonging to the same locality as our customers which enables us to know our customers and their specific requirements better and enables us to meet up to their expectations in an efficient manner. In addition, we strive to complete our Gold Loan transactions within a short timeframe, which we believe provides us with a competitive edge. Efficient technology support, skilled workforce and clear policies on internal processes enable us to achieve the above objective. Although disbursement time may vary depending on the loan size and the number of items pledged, we can generally disburse a loan within a short span of the time the gold is tendered to the branch staff.

Furthermore, since our loans are all collateralized by gold jewellery, there are minimal documentary and credit assessment requirements, which shorten our turnaround time.

Extensive branch network across rural and semi-urban areas in South India

In the past we have rapidly expanded our branch network across rural and semi-urban areas in South India, which we believe has provided us with an advantage over our competitors. Our total number of branches grew from 224 branches as of March 31, 2011 to 577 branches as of March 31, 2012 and to 959 branches as of March 31, 2013. After reaching a peak level of 1,053 Branches, in the phase of consolidation, we have pruned our branch network to 1,022 branches as on October 31, 2015. This was done by either merging branches in areas where we had more than one operation, in close proximity, or closing off branches, which were a drag on the profits. As of October 31, 2015 we have our branches in the states of Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Telangana, Goa, Delhi, Haryana, Uttar Pradesh, Maharashtra and the union territory of Puducherry. For further details please refer to “**Our Business – Branch Network**” on page 90. About 70% of our branches are in rural and semi-urban areas in South India. We believe that the presence of these rural branches has contributed to a robust growth in our revenue, over the last few years, from Gold Loan business.

Advanced technology systems and established processes

We believe that we have implemented a state of the art technology platform across our operations. We have invested in our technology systems and processes to improve overall productivity and ensure good management of customer credit quality and security quality. Our IT infrastructure has been developed and implemented in the Financial Year 2008 and links our network of branches across the country with the corporate office. We have a core banking platform with real time data transmission and updates, and have managed to minimise errors, ensure faster data transmission and risk monitoring. Our management has also benefited from availability of real time information. We upload data at each branch to facilitate online information access for faster decision making. In addition, our technology platform has helped us develop an effective system based risk assessment and internal control system and internal audit. We also have a disaster recovery system located outside of Kerala which replicates data on a real time basis. Our centralized technology aids us in offsite surveillance of all our branches. Our technology also helps reduce the time it takes to complete Gold Loan transactions.

Our Company has put in place well defined and efficient process that enables us to achieve uniformity in our operations across all our branches. Our processes are developed at the corporate office level by professionals who have extensive experience in the areas of banking and financial services with supervision from our management. Well defined processes and an efficient technology platform, enables us to keep a better check over our entire branch network and helps us in detecting shortcomings.

We believe that our advanced technology systems and established processes enable us to respond to market opportunities and challenges swiftly, improve the quality of service to our customers and improve our risk management capabilities.

Strong support system, including appraisal, internal audit and inventory control and safety systems

Our ability to appraise the quality of the gold jewellery to be pledged in a short period of time is critical to our business. Assessing the gold jewellery quickly and accurately is a specialized skill that involves an assessment for gold content and quality manually without damaging the jewellery. We undertake the assessment activity in-house using tested methods of appraisal of gold.

Once the Gold Loan is made, we have a system in place for continuous monitoring of the pledged gold by internal audit and risk management teams. In accordance with our internal audit policy, all of our branches are subject to inspection between 120 days and 150 days depending upon management perception of the risk associated with the branch. High value gold loans of ticket size of ₹1 lakh and above are verified by Regional Managers during their branch visits and vigilance audits can be conducted at any branch at any time between two audits. At the time of conducting an inspection, a quality check on the inventory is also carried out, which involves physical security checks and checks on the quality of pledged gold. All our branches are fitted with strong rooms which are reinforced concrete cement structures built per industry standards and practices to ensure high level of security.

Experienced management team and skilled personnel

Our Promoter, Mr. Roy M. Mathew is a third generation entrepreneur and has over three decades of experience in Gold Loan business. Our senior and operating level management teams have extensive experience in the areas of banking and financial services and we believe that their considerable knowledge of and experience in the industry enhances our ability to operate effectively. Our staff, including professionals, covers a variety of disciplines, including gold appraisal, internal audit, technology, accounting, marketing and sales. Our management has experience in identifying market trends and suitable locations for expanding and setting up branches to suit our target customers. Our workforce also consists of appraisers who are skilled in the evaluation of the worth and authenticity of the gold that is pledged with us and we conduct periodic training programs to augment their knowledge and efficiency in performing this task

Strategy

Our business strategy is designed to capitalize on our competitive strengths and enhance our leadership position in the Gold Loan industry. Key elements of our strategy include:

Further growth in gold loan business in rural and semi-urban markets to tap into the potentially large market for gold loans

Indian gold loan market expanded considerably in recent years. The recent developments in the gold loan market have both positive and negative implications. In a country, where loans are required to be raised for meeting some sudden medical exigency or an educational loan or a business loan by a small and medium enterprise owner, the gold loans extended by the NBFCs are very handy and flexible, though costlier than such loans disbursed by banks. At a time, when financial inclusion is a major policy goal, the services rendered by the gold loans NBFCs, which are a part of the organised loan market are contributing in a reasonable measure to cater to the borrowing requirements of a needy section of the society. Secondly, gold is an idle asset in the hands of individuals and there is a huge unlocked economic value in the Indian economy, which is said to have anywhere between 18,000 to 20,000 tonnes of gold. Just a small fraction of about three percent of this idle gold stock is being used for raising gold loans, at present (*Source: RBI Report of the Working Group to study the issues related to gold imports and gold loan NBFCs in India Feb 2013*).

We intend to increase our presence in under-served rural and semi-urban markets, where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not available in a timely manner at reasonable rates of interest, or at all. A typical Gold Loan customer expects high loan-to-value ratios, rapid and accurate appraisals, easy access, low levels of documentation, quick approval and disbursement and safekeeping of their pledged gold. We believe we meet these criteria, and thus our focus is to expand our Gold Loan business.

Diversifying our business into metros and select Tier 1 cities across India

In addition to our continuing focus on rural and semi-urban markets in the states that we are present, we intend to open branches in metros and select Tier 1 cities where we believe our business has high growth potential. Subject to necessary approvals we intend to open new branches in the states of Andhra Pradesh, Telangana, Delhi, Goa, Haryana, Karnataka, Uttar Pradesh and Union territory of Puducherry during the current Financial Year in addition to Kerala and Tamil Nadu. We carefully assess the market, location and proximity to target customers when selecting branch sites to ensure that our branches are set up close to our target customers. We believe our customers appreciate this convenience and it enables us to reach new customers.

Expanding the visibility of the Muthootu Mini Brand to attract new customers

Our brand is key to the growth of our business. We started focusing on brand building exercise in 2011. Our logo was re-designed and the tag- line '*stands by you always*' was introduced. We believe that we have built a recognizable brand in the rural and semi-urban markets of India, particularly in the southern states of Kerala, Tamil Nadu, Karnataka and Andhra Pradesh, Telangana. We intend to continue to build our brand through advertising and public relations campaigns and undertaking other marketing efforts on radio, television and outdoor advertising.

Undertaking new business initiatives to diversify our revenue stream by leveraging our branch network and customer base.

Gold Loan and Personal Loan as on October 31, 2015 account for 98.37% and 1.53% of total loans of our Company, respectively. These contribute to over 99.90% of our total revenues, making us very dependent on this single income stream, interest on loans. With a view to diversify our incomes and be less dependent on interest alone, we have initiated negotiations to broaden our fee based income. We are in the process of finalizing corporate agency agreements with life, health and general insurance companies for marketing their life insurance plans, health insurance products and other non-life products. We entered into Memorandum of Understanding dated April 12, 2013 with Doha Broking & Finance Co. Limited for carrying out online trading in equity derivative and commodity segments using our Depository Participant platform. Further, our Company recently procured registration with the IRDA, to act as a corporate agent for procuring and soliciting insurance business both in the life insurance and general insurance category. The license no. LVG 10402404 was assigned to our Company and is valid till February 8, 2018. Our Company intends to capitalise on the huge client base and large branch network, to offer these additional products and services.

Strengthening our risk management, loan appraisal and technology systems to have an error less streamlined growth in business

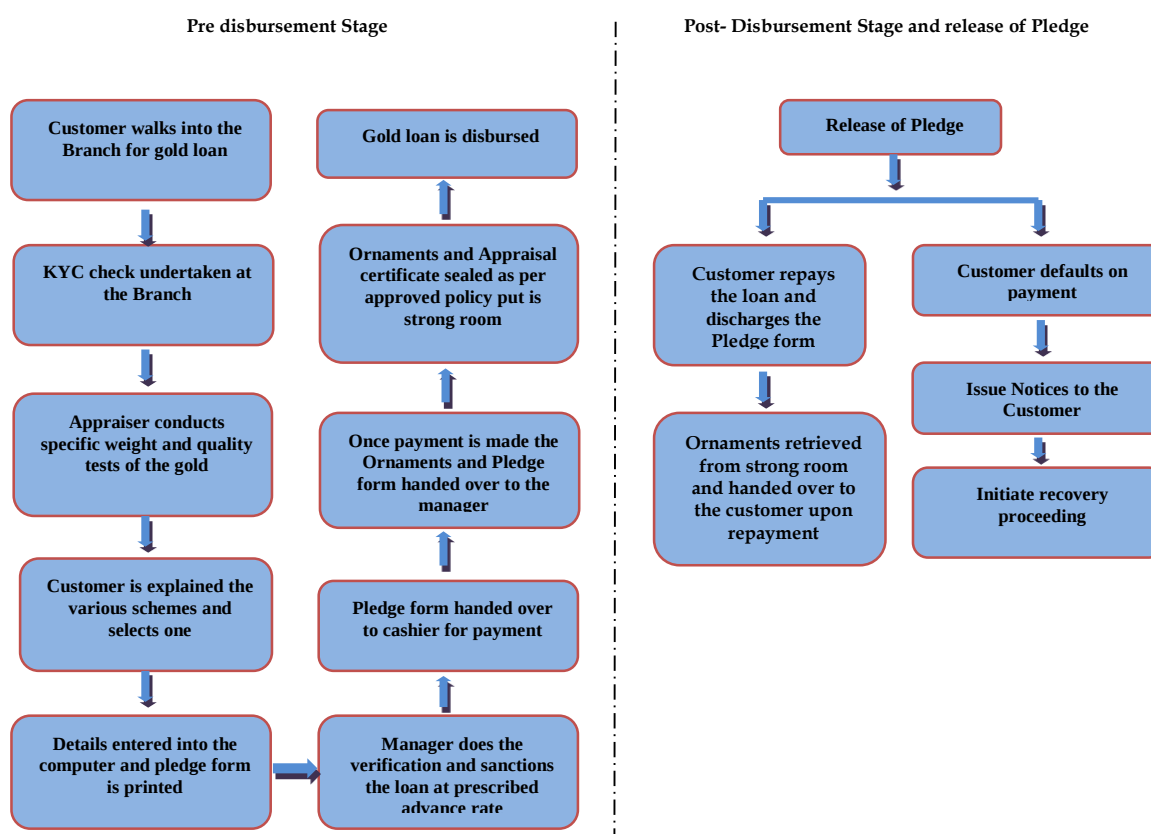

Risk management is viewed by us as a crucial element for the expansion of our Gold Loan business. We therefore continually focus on improving our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk. We propose to make significant investments in personnel, technology and infrastructure in order to improve process efficiencies and mitigate business risks. We have recruited individuals who have significant risk management experience and plan to retain this focus in hiring additional risk management personnel. Going forward, we plan to continue to adapt our risk management procedures to take account of trends we have identified, including our loan loss experience. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Gold Loan financing business without experiencing significant increases in non-performing assets.

Since we plan to expand our geographic reach as well as our scale of operations, we intend to further develop and strengthen our technology platform to support our growth and improve the quality of our services. We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business.

GOLD LOAN BUSINESS

Our core business is disbursement of Gold Loans, which are typically small ticket loans secured by the pledge of used household gold jewellery. Loan amounts advanced by us are typically within the range of ₹682 to ₹29,30,000 per loan transaction and typically remain outstanding approximately for an average tenor of 93 to 116 days. As of the six month period ending on September 30, 2015, March 31, 2015, March 31, 2014 and March 31, 2013, we had approximately 3,59,452 gold loan accounts, 2,42,525 gold loan accounts, 2,75,895 gold loan accounts and 3,74,830 gold loan accounts respectively, aggregating to balance of ₹1,89,373.52 lakhs, ₹1,75,862.64 lakhs, ₹1,76,881.15 lakhs and ₹1,81,589.13 lakhs, respectively. For the six month period ending on September 30, 2015 and in the Financial Years 2015, 2014, 2013 and 2012, our Gold Loan portfolio yield representing interest income on gold loans as a percentage of average outstanding of gold loans, for the same period were 19.72%, 18.82%, 19.21%, 22.78%, and 24.13%, respectively, per annum. In the current financial year up to October 31, 2015, and for Financial Years 2014, 2013, 2012 and 2011, income from interest earned on our Gold Loans constituted 97.82%, 96.45%, 97.33%, 98.83%, and 98.94%, respectively, of our total income. We are able to offer a variety of Gold Loan schemes to our customers to suit their individual needs. As of October 31, 2015 we have various new and different schemes in place. The schemes differ in relation to the amount advanced per evaluated gram of gold, the interest rate concessions offered for the particular tenor and the amount of the loan.

Gold Loan disbursement process

The principal form of security that we accept is used household gold jewellery. We do not accept bullion, gold biscuits, gold bars, new mass produced gold jewellery or medallions, and we restrict acceptance of jewellery from other money lenders. While these restrictions narrow the pool of assets that may be provided to us as security, we believe that it provides us with the following key advantages:

- It filters out spurious jewellery that may be pledged by jewellers and goldsmiths. We find that household, used jewellery is less likely to be spurious or fake.
- The emotional value attached by each household to the pledged jewellery acts as a strong incentive for timely repayment of loans and revoking the pledge.

- As we only accept the pledge of household jewellery, the value of the pledged gold is typically only as much as the worth of gold that is owned by an average Indian household. This prevents our exposure to large sized loans where the chances of default and subsequent losses are high.

The amount that we finance against the pledged gold jewellery is typically based on a fixed rate per gram of gold content in the jewellery. We value the gold jewellery brought by customers based on our corporate policies and guidelines. As per the policy we grant gold loans on 22 Carat gold ornaments. However in case the jewels that are being pledged are less than 22 carat, the branches are required to convert the carat of gold jewels to the equivalent of 22 Carat. Under no-circumstances gold ornaments below 19 carat are accepted by our Company. The rates per gram is fixed by us on weekly intervals, based on the extant RBI guidelines and the 30 day average closing gold rate for 22 carat fixed by India Bullion and Jewellers Association Limited (formerly known as Bombay Bullion Association Limited). The actual loan amount varies according to the type of jewellery pledged. While jewellery can be appraised based on a variety of factors, such as total weight, weight of gold content, production cost, style, brand and value of any gemstones, we appraise the gold jewellery solely based on its gold content. Our Gold Loans are, therefore, generally well collateralized because the actual value of the gold jewellery is higher than our appraised value of the gold jewellery when the loan is disbursed. The amount we lend against an item and the total value of the pledged gold we hold fluctuates according to the market price of gold. An increase in the price of gold will not automatically result in an increase in the value of our Gold Loan portfolio unless the rate per gram is revised by our Corporate Office. It only results in a favourable movement in the value of the security, pledged with us. Similarly, since adequate margins are built in at the time of the loan disbursement and owing to the short tenure of these loans, on average, a decrease in the price of gold generally has little impact on our interest income. However, a sustained decrease in the market price of gold could cause a decrease in the growth rate of Gold Loans in our loan portfolio.

All our Gold Loans have a maximum term of 12 months. However, customers may redeem the loan at any time. As per the current policy of the Company, interest is paid only at the time the principal is repaid. In the event that a loan is not repaid on time and after providing due notice to the customer, the unredeemed pledged gold is disposed of, on behalf of the customer in satisfaction of the principal and interest charges. Any surplus arising out of the disposal of the pledged gold is refunded to the customer or is appropriated towards any other liability by the borrower. In the event that the recoverable amount is more than the realizable value of the pledged gold, the customer remains liable for the shortfall.

The processes involved in approving and disbursing a Gold Loan are divided into three phases:

- Pre disbursement;
- Post disbursement; and
- Release of the pledge.

When a loan is repaid, we give the customer the option to pledge the security again and obtain another loan.

Pre-disbursement process

Pre disbursement processes include all the actions that are carried out from the moment a customer enters any of our branches for procuring a Gold Loan, up until the customer receives the loan amount and include the following:

Gold Loan appraisal of a customer involves the following steps

- Customer identification* - Gold Loans are sanctioned only to genuine borrowers. Gold Loan can be sanctioned to the members of staff only with prior approval of Competent Authority, as advised by the Corporate Office. The Manager/Sanctioning Authority should take all precautions to confirm that the applicant, pledging the ornaments, is the true owner of those ornaments.
- KYC documentation* – For mandatory compliance of KYC norms, as mandated by RBI and easy identification of each borrower at a later date, a photograph and Proofs of Identity and address acceptable to the Company, are always obtained. Each branch has been provided with a webcam, which may be used to take the photograph, which is then uploaded into the system, also.
- Security appraisal* – Once the manager is satisfied regarding ownership of the ornaments, the ornaments would then be appraised by the manager himself and/or other staff members who are assigned with the responsibility of appraising the gold jewellery. The ornaments being tendered are not appraised by any person who is not

associated with our Company nor are the ornaments sent out of the concerned branch for appraisal. We use the services of our in-house gold appraisers in case of large value loans. These gold appraisers are professionally qualified for appraising the quality of gold and usually have multiple years of experience in appraising gold.

The process of measuring the “fineness”, or purity, of gold is referred to as ‘assaying’. There are different methods of assaying the fineness of gold. The most commonly used methods at our branches are touch stone, nitric acid and sound tests. Indian ornaments often contain stones of different types, some of which may be precious. But as a matter of policy, all types of stones are ignored and their weight reduced from gross weight when advancing against ornaments. Sufficient margin is, therefore, retained for the approximate weight of such Stones and for arriving at eligible loan amount; net weight of the ornaments so arrived at alone is taken into account. Reduction in weight is kept comfortably high to safe guard our interests. Wherever weight of stones cannot be ascertained, such ornaments are avoided. All particulars/details of ornaments such as, gross weight, net weight, rate per gram and estimated value will be entered item wise by the appraising staff on serially numbered DPN and also on the paper used for covering/packing ornaments and signed off with the date. The manager also verifies and satisfies himself that the ornaments have been properly tested for purity and details - gross weight as well as net weight, are correctly noted. He should also confirm correctness of valuation made.

- d) *Documentation* - The standard set of documents that are executed in a typical Gold Loan transaction include the pawn ticket and the demand promissory note cum terms and conditions. Basic details of the pledge, such as the name of the customer and the net weight of the jewellery pledged is recorded on the gold loan slip, which is retained by us. The pawn ticket, which contains the details of the customer and the pledged jewellery, is filled in by the employee who appraised the gold and a copy is retained by the customer. The demand promissory note is an undertaking by the customer to repay the loan amount with the interest to the Company. The terms and conditions that are contained in the demand promissory note empower us to sell the pledged jewellery if the customer defaults on the Gold Loan. After execution of prescribed documents a loan ticket detailing the particulars of the loan including the details of the items pledged, rate per gram, interest rate and maturity date is handed over to the customers along with disbursement of the loan. All disbursements and payments above ₹100,000 are made by cheque as per RBI requirements (DNBS.CC.PD.No.356/03.10.01/2013-14 dated January 8, 2014 and DNBR.CC.PD.No.036/03.10.01/2014-15 dated May 21, 2015).

Post-disbursement process

The post disbursement process involve the following steps

- a) *Custody of gold* - Ornaments pledged by customers are kept in separate packets. At the end of the day or whenever possible during the day, the joint custodians shall verify the numbers on the gold loan packets with computer generated printout/vouchers. Thereafter, joint custodians together shall physically check the packets and satisfy themselves as to correctness of their contents. After confirming the correctness of the numbers of packets and their contents, these are tamperproof sealed and are kept inside the safe/cabinet in the strong room by the manager in the presence of the joint custodian. The pledge forms/DPNs are also arranged serially and properly maintained in a file, which shall also be kept under joint custody in the strong room.
- b) *Branch security and safety measures* - Ensuring the safety and security of the branch premises is vital to our business since cash and gold inventory are stored in each branch. Branch security measures implemented, by us, include:
- Every branch of the Company, without exception, is provided with a strong room constructed as per the specifications of RBI with fire proof strong room doors. This is a provision at each location to ensure safety of the pledged ornaments, of the clients.
 - Access to the strong room is with the help of two distinct keys, which are in the hands of two different individuals attached to the branch. There is an outer door whose keys are with the Branch Manager only. The strong room has a grill door, joint custody of whose keys are with the Branch Manager and another staff in rotation (the “Joint Custodian”). Both the branch head and the Joint Custodian hold the keys to grill in the strong room, which can only be opened if both keys are inserted at the same time.
 - Electronic Security System: All our branches are provided with Electronic Surveillance System and any movement within business area and in the Strong Room are recorded by the cameras placed inside the premises. This is a 24 hours surveillance system and with recorded images of all activities happened in the branch if anything untoward happens. This kind of a surveillance system also helps to avert any major

incidents of frauds, thefts, etc. in the branch premises. As of October 31, 2015, we have completed the installation of CCTV cameras at most of our branches and we intend to continue to install cameras at our all our branches.

- **Burglar alarms:** Burglar alarms are installed at all branches and phone numbers of the branch head, the concerned police station and control room are integrated into the system. When the alarm goes off, a call triggered to all these phone numbers.
- **Security guards:** Security guards are recruited through approved agencies and are present at day/night at branches in sensitive districts, where we operate, in the opinion of and as decided by the Corporate Office, after assessing the security requirement of the area and the Gold Loans outstanding in the respective branch.
- **Insurance:** Entire gold stock of the branches is insured for their gold content against theft and other calamities. The policies are endorsed monthly reflecting the current changes in gold stock at branches.

Release of pledge

We monitor our loan accounts and recovery of interest on an ongoing basis. Once a loan is fully repaid, the pledged gold jewellery is returned to the customer. When a customer does not repay a loan on or before its maturity, we initiate the recovery process and dispose of the pledged gold to satisfy the amount, including both the principal and accrued interest, owed to us. Before starting the recovery process, we inform the customer through ordinary post, personal calls and visits, followed by registered letters. We typically send three reminders with the last attempt being through registered letters. The recovery procedure typically commences after 15 days from the date of maturity. When a loan is repaid, we give the customer the option to pledge the security again and obtain another loan. The procedure of re-pledging entails the same procedure as that of a pledge and is accompanied by the same mode of documentation that a pledge entails.

Risk Management

As a lending institution, we are exposed to various risks that are related to our gold lending business and operating environment. Risk management forms an integral element of our business. Our objective in the risk management processes is to appreciate, measure and monitor the various risks that we are subject to and to follow policies and procedures to address these risks. We do so through our risk management architecture. We continue to improve our policies and procedures and to implement these rigorously, for the efficient functioning of our business. This also helps in managing the risks, associated with our business. The major types of risk we face in our businesses are credit risk, operational risk, financial risk and market risk.

Credit Risk

Credit risk is the possibility of loss due to the failure of any counterparty to abide by the terms and conditions of any financial contract with us. Credit risk in our Gold Loan business is relatively low because all our loans are generally over collateralized by pledged gold ornaments. We aim to reduce credit risk through a rigorous loan approval and

gold appraisal process, KYC compliance procedures and a strong non-performing asset (“NPA”) monitoring and recovery mechanism. This risk is diminished because the gold jewellery used as security for our loans can be readily liquidated, and the possibility of recovering less than the amount due to us is relatively low. We also mitigate credit risk by not disbursing loans in excess of specified limits, as fixed by our Company from time to time, to the same customer, and for high value loans we undertake a credit check or profiling of the borrower before a loan is approved. We have developed methods to peg the value of the loan amount to the moving average price of gold. We also decrease credit risk by focusing on the quality of the pledged gold. Our internal control system ensures independent verification of the gold by at least two officials at the branch level. The level of verification at the branch level increases as the loan value increases. In addition, the quality of gold is checked by the regional manager through random check and by gold auditors through a detailed check.

Operational Risk

Operational risk broadly covers the risk of direct or indirect loss due to the failure of systems, people or processes, or due to external events. We have instituted a series of checks and balances and audit reviews to address the various operational risks. Although we disburse loans in very short periods of time, we have clearly defined appraisal methods to mitigate appraisal risk. Inaccurate appraisal of the pledged gold may lead to funds being advanced against low value or spurious gold. This risk is also mitigated by our policies on internal control, generation of alert reports and additional requirements for high value loans. We also have detailed guidelines on movement of cash or gold to address custodial risk, which is the risk associated with the safety and security of our gold inventory. In addition, we have installed surveillance cameras across of all our branches, and security guards are present at night at certain sensitive branches. We also have policies that require employee rotation both within the branch, as well as within different branches located within the same area, and we undertake significant employee profiling and background verification checks before hiring and continuously monitor their lifestyle changes.

Financial Risk

Our business is cash intensive and requires substantial funds, on an ongoing basis, to finance the gold loan portfolio and to grow it. Any disruption in the funding sources would have a material adverse effect on our liquidity and financial condition. The Company is proactively pursuing a system of identifying and accessing newer and cheaper sources of funds, to finance the loan book and to grow the business. There is a regular meeting of our Asset Liability Committee (“ALCO”), which reviews the liquidity position of the Company and arranges for sufficient funding in advance, for growth.

Market Risk

Market risk arises from the decline in the value of the pledged gold due to fluctuation in gold prices. This risk is in part mitigated by linking the LTV to the 30 day average price of gold. This risk is further reduced because we appraise the gold jewellery and fund loans based solely on the weight of gold content without considering design cost, production cost or value of gemstones. In addition, the sentimental value of the gold jewellery to the customers may induce repayment and redemption of the pledged gold even if the value of the pledged gold falls below the value of the repayment amount. A prompt and effective recovery mechanism also helps us deal with this risk.

Our Risk Management Policy

In order to address the risks that are inherent to our business, we have developed a risk management architecture that includes a risk management committee, internal audit department, vigilance department and a risk management department. Our Risk Management Committee, which is led by one of our Directors, oversees our risk management policies, which help us to identify, measure, monitor and mitigate the various risks that we face in our businesses.

Internal Audit Department

Our internal audit department assists in the management of operational risk using our centralized monitoring systems. Separate divisions of our internal audit department have been put in place to handle the audit of the departments of the corporate office and those of the branch offices. The audit of the corporate office is divided into two categories: (i) system and compliance audit; and (ii) accounts audit. A branch inspection is carried out every five months (within Kerala) and once in four months (outside Kerala) with the focus on the verification of the Gold Loan pledges. In addition, an incremental high value loan check is carried out by Regional Managers as part of their periodical branch inspection.

Vigilance Department

We have a vigilance department for undertaking surprise inspections of high/medium risk branches and other branches, based on any report or detection of serious deviations or irregularities. The department is headed by our Chief Vigilance Officer who is a retired, former Director General of Police, of Kerala State. The vigilance undertakes the responsibility of visiting branches to oversee the implementation of risk mitigation initiatives and improvements in customer service.

Risk Management Audit

Our branch auditors also carry out a system driven risk audit on certain identified key risk parameters. These are keyed into the system and alerts are sent to branch controllers and top management in case the risk weight given under a specific parameter goes beyond the prefixed tolerance levels. In all such cases, the concerned branches are inspected by the Branch controllers or top management personnel depending on the severity of risk and immediate remedial actions are initiated.

Assets and Liabilities Management Policy

The primary objective of our Asset Liabilities Management Policy is to ensure the stability of our net interest income as well as ensuring that we have liquidity and pricing stability. In order to monitor the Asset Liability Policy of the Company, the Board of Directors of the Company at their meeting held on April 24, 2009 constituted an Asset Liability Committee (“**ALCO**”) comprising of the directors and senior management functionaries of the company. The terms of reference of the ALCO are provided in “**Our Management - Details of various committees of the Board**” on page 103.

The Committee holds periodical meetings to ensure that the short-term liquidity position of the company remains comfortable and to ensure that the company has a comfortable net interest margin to meet its recurring liabilities and continue to show healthy net profits

NPA Management Policy

All loans outstanding beyond the loan validity are disposed of within three months from the expiry of the loan period. In order to undertake this, our Company has put in place a gold loan monitoring, follow-up and disposal mechanism in place. Our Company has an Overdue Loans Cell (“**OLC**”) at the Corporate Office under Chief Operating Officer which interacts with branches and their controllers for speedy recovery of all loans which has exceeded the stipulated loan tenor.

Since disposal of gold loans through individual branches is not feasible, due to small numbers and the high cost of auctioning, it will be desirable to dispose them off through a centralized disposal set up. Our NPA policy spells out the operational workflow for a centralized Gold Loan disposal set up as follows:

- Identification of potential overdue gold loans by OLC and advising them to concerned branches.
- Sending first notice to borrowers latest by 15 days prior to the loan becoming overdue.
- Personal visit by branch manager/staff member on the defaulting customer within 7 days from the date of notice.
- If no result forthcoming, serving of second repayment notice after a maximum gap of 15 days from the date of personal visit and/or the first notice.
- If the loan remains outstanding even after this, takeover of the gold ornaments by the Regional Manager (RM) within a span of one month and transfer the loan account to Corporate Office overdue Loan Pool account.
- All gold ornaments, underlying the loans, which taken over by the RM would either be auctioned at the HQ branch, if the weight of gold is sizeable or will be transferred to specified auction centres periodically.
- At any point of time before the loan is transferred to auction centre, in case the borrower approaches the company for redemption of pledged ornaments, this will be carried out by the concerned branch (originating or HQ) in the normal manner.
- Auctions are carried out only after publishing the auction date and venue in two vernacular dailies being circulated in the area of concerned branches. Also the concerned branches are instructed to display the auction date and centre, on their notice boards well in advance.
- As further concession to customers, the company may also consider settlement of loan dues by way of concessions in interest as a one-time settlement on a case-to-case basis, only with approval from Corporate Office.

Appointment of an Auctioneer

Since as per the revised RBI guidelines, the company or its promoters cannot participate actively in the auction, a qualified and experienced auctioneer has been appointed by the company to carry out the auction on behalf of the company. The auctioneer’s tenure is one year with reappointment every year.

Capital Adequacy Ratio

As per the Prudential Norms Directions, every non-deposit taking NBFC is subject to capital adequacy requirements. Currently, such NBFCs are required to maintain a minimum capital ratio consisting of Tier I and Tier II capital which

shall not be less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. Further, the total of Tier I capital, at any point of time, is required to not be less than 8.5% by March 31, 2016 and 10% by March 31, 2017. However, NBFCs which are primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) shall maintain a minimum Tier I capital of 12%. Also, the total of Tier II capital, for NBFC-MI, at any point of time, shall not exceed one hundred percent of Tier I capital. Additionally, we are required to transfer up to 20% of our Annual Profits after Tax, to a Statutory Reserve Fund and also make provisions for NPAs. We had a capital adequacy ratio of 29.98%, 28.75%, 20.77% and 16.63% as on the six month period ended on September 30 2015, March 31, 2015, March 31, 2014 and March 2013, respectively. This (CAR) includes Tier I Capital of 22.16% (2015) and 20.41% (2014) of Risk Weighted Assets.

We have satisfied the minimum capital adequacy ratios prescribed by the RBI for the six month period ended on September 30, 2015 and the financial year ended March 31, 2015.

Technology

We have invested in our technology systems and processes to improve overall productivity and ensure good management of customer credit quality and security quality. Our IT infrastructure has been developed and implemented in the Financial Year 2008 and links our network of branches across the country with the corporate office. We have a core banking platform with real time data transmission and updates, and have managed to minimise errors, ensure faster data transmission and risk monitoring. Our management has also benefited from availability of real time information. We upload data at each branch to facilitate online information access for faster decision making. In addition, our technology platform has helped us develop an effective system based risk assessment and internal control system and internal audit. We also have a disaster recovery system located outside of Kerala which replicates data on a real time basis. Our centralized technology aids us in offsite surveillance of all our branches. Our technology also helps reduce the time it takes to complete Gold Loan transactions.

Our IT system aids the performance of all the processes involved in a loan transaction. At the pre-disbursement stage, all KYC details as well as other details of customer appraisal are captured and stored in the system for future reference. All the details that are relevant to a loan transaction are captured by the system and filtered at each level to confirm whether a particular set of pledged jewellery meets the required specifications. The branch staff, upon verification of the gold ornaments key in information into the system that uses the input data to arrive at the net weight and calculates the maximum limit for a loan advance that can be offer against it, under the specific scheme chosen by the customer. Based on the saved data, all accounting entries are also passed by the system.

Post-disbursement, the interest due on each loan at any given point in time after disbursement is generated by the system. If the loan is settled by the customer prior to maturity, the system calculates the interest amount repayable at pre-determined concessional rates and also records the repayment and recovery of the pledge. When a loan matures, the system indicates this and subsequently prompts for a notification to the customer. The system generates a list of all loans that are overdue on a particular date, for each branch, prompting collection initiatives. All details of the sale proceeds, of forfeited jewellery, are also entered into the system.

Access to this macro-level data is restricted to certain authorised, designated personnel. Any alerts generated are passed on to the concerned regional head upon the occurrence of specified events. Up-to-date information on gold inventory and cash reserves in each branch helps us track our liquidity position and plan for shortfalls well in advance. We are able to avert liquidity shortfalls in any particular branch by transferring cash from one branch to another or from the corporate fund pool. In this manner, we ensure that each branch is centrally managed by the corporate office and off-site surveillance of each branch is an ongoing process.

Our Borrowings and Credit Ratings

Please refer to the sections titled **“Financial Statements”** and **“Financial Indebtedness”** on pages 112 and 144, respectively.

Increasingly we have depended on term loans from banks as primary source of funding. We believe that we have developed stable long term relationships with our lenders and have established a track record of timely servicing of our debts.

Security threats and measures taken to mitigate them

Since our branches handle large value of cash and gold on a daily basis, we have initiated specific security measures

to prevent theft of our branch assets. These measures can be categorized as under:

- Physical security is provided by means of keeping the valuable gold ornaments in Strong Rooms constructed as per the specifications of Reserve Bank of India with fire proof strong room doors.
- We have a system of Joint Custody of Gold and Cash in strong rooms to ensure that the keys of strong room doors are held in the custody of two different people i.e. the Branch Manager holding the master key and the keys to the grill in the strong room, and another staff member, the Joint Custodian, holding second set of keys.
- All our branches are provided with Electronic Surveillance System and any movement within business area and in the Strong Room are recorded by the cameras placed inside the premises. As of October 31, 2015, we are in the process of installing CCTV cameras at all our existing branches.
- Burglar alarms are installed at all branches and phone numbers of the branch head, the concerned police station and control room are integrated into the alarm system, which triggers a call to these numbers if the alarm goes off.
- Security guards are recruited through approved agencies and are present at day/night at sensitive branches as decided by the corporate office depending on the security of the particular area and the Gold Loans outstanding in the respective branch.
- Entire gold stock of the branches is insured for their gold content against theft. The policies are updated monthly to reflect the actual changes in stock of gold held at branches
- Besides the above physical security measures, we also constantly educate our employees at all levels to adhere to guidelines issued by the Company with regard to procedural aspects to be followed against any type of fraudulent actions.
- Proper checking of gold ornaments by Appraiser, Branch Manager as well as audit by Gold Auditor and Internal Auditors at frequent intervals is undertaken to ascertain the quality of gold ornaments and ensure low purity of gold ornaments are not pledged.
- We have also in place a Whistle Blower Policy which will ensure that any malpractices within the branch are reported to senior level executives.

Competition

We face competition from pawnshops, other gold financing companies, banks, co-operative societies and local money lenders. Other lenders may lend money on an unsecured basis, at interest rates that may be lower than our rates of interest and on other terms, which may seem more favourable than ours. However, we believe that the primary elements of our competitive edge are the quality of customer service and relationship management, our branch location and reach and our ability to lend competitive amounts at competitive rates, with full transparency.

Property

All our branches are located in leased premises. We normally enter into long term leases of 3-5 years with provisions of automatic renewal. We select our branch locations keeping the following factors in mind:

- Population of the targeted locality;
- Occupation of the population;
- Security situation in the area; and
- Concentration of competition from other Gold Loan companies and other NBFCs.

Our total number of branches grew from 224 branches in the states of Kerala, Karnataka and Tamil Nadu as of March 31, 2011, to 577 branches in the states of Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Telangana and Goa as of March 31, 2012 and to 959 branches in the states of Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Telangana, Goa and Delhi as of March 31, 2013. Our branch network has gone up to 1,022 branches in the states of Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Telangana, Goa, Delhi, Haryana, Uttar Pradesh, Maharashtra and the union territory of Puducherry, as on October 31, 2015.

A review of interim financial information consist of making inquiries, primarily of persons responsible for financial accounting matters, and applying analytical and other review procedure. Market Lot and Trading Lot

Since trading of the NCDs is in dematerialised form, the tradable lot is one NCD.

NCDs which are allotted in physical form shall not be eligible for being traded on the floor of Stock Exchange unless such NCDs are converted into dematerialized form, but shall be freely transferable otherwise, subject to applicable statutory and/or regulatory requirement.

Allotment in the Issue will be in Demat form in multiples of one NCD. For details of allotment refer to chapter titled **“Issue Procedure”** beginning on page 171.

Nomination facility to Debenture Holder

In accordance with Section 72 of the Companies Act, the sole Debenture Holder or first Debenture Holder, along with other joint Debenture Holders (being individual(s)) may nominate any one person (being an individual) who, in the event of death of the sole holder or all the joint-holders, as the case may be, shall become entitled to the NCD. A person, being a nominee, becoming entitled to the NCD by reason of the death of the Debenture Holder(s), shall be entitled to the same rights to which he would be entitled as if he were the registered holder of the NCD. Where the nominee is a minor, the Debenture Holder(s) may make a nomination to appoint, in the prescribed manner, any person to become entitled to the NCD(s), in the event of his death, during the minority. A nomination shall stand rescinded upon sale of a NCD by the person nominating. A buyer will be entitled to make a fresh nomination in the manner prescribed. When the NCD is held by two or more persons, the nominee shall become entitled to receive the amount only on the demise of all the holders. Fresh nominations can be made only in the prescribed form available on request at our Registered/Corporate Office or at such other addresses as may be notified by us.

Debenture Holder(s) are advised to provide the specimen signature of the nominee to us to expedite the

transmission of the NCD(s) to the nominee in the event of demise of the Debenture Holder(s). The signature can be provided in the Application Form or subsequently at the time of making fresh nominations. This facility of providing the specimen signature of the nominee is purely optional.

In accordance with Section 72 of the Companies Act, any person who becomes a nominee shall upon the production of such evidence as may be required by the Board, to elect either:

- to register himself or herself as the holder of the NCDs; or
- to make such transfer of the NCDs, as the deceased holder could have made.

Further, the Board may at any time give notice requiring any nominee to choose either to be registered himself or herself or to transfer the NCDs, and if the notice is not complied with, within a period of 90 days, the Board may thereafter withhold payment of all interests or redemption amounts or other monies payable in respect of the NCDs, until the requirements of the notice have been complied with.

For nominations made in dematerialised mode, there is no need to make a separate nomination with our Company. Nominations registered with the respective Depository Participant of the applicant would prevail. If the investors require changing their nomination, they are requested to inform their respective Depository Participant.

Succession

Where NCDs are held in joint names and one of the joint Debenture Holder dies, the survivor(s) will be recognized as the Debenture Holder(s). It will be sufficient for our Company to delete the name of the deceased Debenture Holder after obtaining satisfactory evidence of his death. Provided, a third person may call on our Company to register his name as successor of the deceased Debenture Holder after obtaining evidence such as probate of a will for the purpose of proving his title to the NCDs. In the event of demise of the sole or first holder of the NCDs, our Company will recognise the executors or administrator of the deceased Debenture Holders, or the holder of the succession certificate or other legal representative as having title to the NCDs only if such executor or administrator obtains and produces probate or letter of administration or is the holder of the succession certificate or other legal representation, as the case may be, from an appropriate court in India. Our Directors, in their absolute discretion may, in any case, dispense with production of probate or letter of administration or succession certificate or other legal representation. In case of death of Debenture Holders who are holding NCDs in dematerialised form, third person is not required to approach the Company to register his name as successor of the deceased Debenture Holder. He shall approach the respective Depository Participant of the Debenture Holder for this purpose and submit necessary documents as required by the Depository Participant.

- c) Applications received from Category III applicants: Applications received from Category III, shall be grouped together, (“**Retail Individual Portion**”)

For removal of doubt, “**Institutional Portion**”, “**Non-Institutional Portion**” and “**Retail Individual Portion**” are individually referred to as “**Portion**” and collectively referred to as “**Portions**”

For the purposes of determining the number of NCDs available for allocation to each of the abovementioned Portions, our Company shall have the discretion of determining the number of NCDs to be allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription in the Issue up to ₹12,500 lakhs. The following description is a summary of certain sector specific laws and regulations in India, which are applicable to our Company. The information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice. The statements below are based on the current provisions of the Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

The major regulations governing our Company are detailed below:

We are a non-deposit taking (which does not accept public deposits), systemically important, NBFC. As such, our business activities are regulated by RBI regulations applicable to non-public deposit accepting NBFCs (“**NBFC-ND**”).

Regulations governing NBFCs

As per the RBI Act, a financial institution has been defined as a company which includes a non-banking institution carrying on as its business or part of its business the financing activities, whether by way of making loans or advances or otherwise, of any activity, other than its own and it is engaged in the activities of loans and advances, acquisition of shares/stock/bonds/debentures/securities issued by the Government of India or other local authorities or other marketable securities of like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of carrying out any agricultural or industrial activities or the sale/purchase/construction of immovable property.

As per prescribed law any company that carries on the business of a non-banking financial institution as its ‘principal business’ is to be treated as an NBFC. The term ‘principal business’ has not been defined in any statute, however, RBI has clarified through a press release (Ref. No. 1998-99/1269) issued in 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide a company’s principal business. The company will be treated as an NBFC if its financial assets are more than 50% of its total assets (netted off by intangible assets) and income from financial assets should be more than 50% of the gross income. Both these tests are required to be satisfied in order to determine the principal business of a company.

Every NBFC is required to submit to the RBI a certificate, from its statutory auditor within one month from the date of finalization of the balance sheet and in any case not later than December 30 of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a certificate of registration.

NBFCs are primarily governed by the RBI Act, the Non-Banking Financial (Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007 (“Prudential Norms – D”), the Systemically Important Non-Banking financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2015 (“Prudential Norms – ND”) and Non- Systemically Important Non-Banking financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2015 the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998 and the provisions of the Non-Banking Financial Companies Prudential Norms (Reserve Bank) Directions, 1998. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time.

Although by definition, NBFCs are permitted to operate in similar sphere of activities as banks, there are a few important and key differences. The most important distinctions are:

- An NBFC cannot accept deposits repayable on demand – in other words, NBFCs can only accept fixed term deposits. Thus, NBFCs are not permitted to issue negotiable instruments, such as cheques which are payable on demand; and
- NBFCs are not allowed to deal in foreign exchange, even if they specifically apply to the RBI for approval in this regard.

Section 45-IA of the RBI Act makes it mandatory for every NBFC to get itself registered with the Reserve Bank in order to be able to commence any of the aforementioned activities.

Further, an NBFC may be registered as a deposit accepting NBFC (“**NBFC-D**”) or as a non-deposit accepting NBFC (“**NBFC-ND**”). NBFCs registered with RBI are further classified as:

- Asset finance companies;
- Investment companies;
- Systematically Important Core Investment Company;
- Loan companies and/or
- Infrastructure finance companies.
- Infrastructure debt fund - NBFCs; and/or
- NBFC - micro finance institutions.
- NBFC-Factors
- Mortgage Guarantee Companies
- NBFC-Non Operative Financial Holding Company

Our Company has been classified as an NBFC-ND-SI.

Systemically Important NBFC-NDs

The RBI in its notification (RBI/2014-15/520 DNBR (PD) CC.No.024/03.10.001/2014-15) dated March 27, 2015 revised the threshold for defining systemic significance for NBFCs-ND in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakhs and above as per the last audited balance sheet. Moreover, as per this amendment, all NBFCs-ND with assets of ₹50,000 lakhs and above, irrespective of whether they have accessed public funds or not, shall comply with prudential regulations as applicable to NBFCs-ND-SI. NBFCs-ND-SI is required to comply with conduct of business regulations if customer interface exists. This amendment also requires that the NBFCs primarily engaged in lending against gold jewellery have to maintain a minimum Tier 1 capital of 12% with effect from April 01, 2014.

All systemically important NBFCs are required to maintain a minimum Capital to Risk-Weighted Assets Ratio of 15%.

Loan-to-value guidelines

The RBI vide its Master Circular No. DNBR (PD) CC. No. 044/03.10.119/2015-16 dated July 1, 2015, introduced the, the Systemically Important Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2015 directing all NBFCs to: (i) maintain a loan-to-value ratio not exceeding 75% for loans granted against the collateral of gold jewellery and; (ii) disclose in their balance sheet the percentage of such loans to their total assets.

Further, NBFC’s are also required to not grant any advance against bullion/primary gold, gold bullion, gold jewellery, gold coins, units of Exchange Traded Funds (ETF) and units of gold mutual fund. NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) are required to maintain a minimum Tier I capital of 12.00%.

Rating of NBFCs

Pursuant to the RBI circular DNBS (PD) CC. No.134/03.10.001/2008-2009 dated February 4, 2009, all NBFCs

with an asset size of ₹10,000 lakhs are required to, as per RBI instructions to, furnish information about downgrading or upgrading of the assigned rating of any financial product issued by them within 15 days of a change in rating.

Prudential Norms

The Prudential Norms Directions amongst other requirements prescribe guidelines on NBFC-ND regarding income recognition, asset classification, provisioning requirements, constitution of audit committee, capital adequacy requirements, concentration of credit/investment and norms relating to infrastructure loans.

Provisioning Requirements

An NBFC-ND, after taking into account the time lag between an account becoming non-performing, its recognition, the realization of the security and erosion overtime in the value of the security charged, shall make provisions against sub-Standard Assets, Doubtful Assets and Loss Assets in the manner provided for in the Prudential Norms Directions.

In the interests of counter cyclicalities and so as to ensure that NBFCs create a financial buffer to protect them from the effect of economic downturns, RBI vide their circular no. DNBS.PD.CC.No.207/03.02.002/2010-11 dated January 17, 2011, introduced provisioning for Standard Assets by all NBFCs. NBFCs are required to make a general provision at 0.25% of the outstanding standard assets. RBI vide their circular no. DNBR (PD) CC No. 037/03.01.001/2014-15 dated June 11, 2015 has sought to raise the provision for standard assets to 0.40% by March 2018. The provisions on standard assets are not reckoned for arriving at net NPAs. The provisions towards Standard Assets are not needed to be netted from gross advances but shown separately as 'Contingent Provisions against Standard Assets' in the balance sheet. NBFCs are allowed to include the 'General Provisions on Standard Assets' in Tier II capital which together with other 'general provisions/loss reserves' will be admitted as Tier II capital only up to a maximum of 1.25% of the total risk-weighted assets.

Capital Adequacy Norms

Every systemically important NBFC-ND is required to maintain, with effect from April 1, 2007, a minimum capital ratio consisting of Tier I and Tier II capital of not less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items is required to be maintained. Also, the total of the Tier II capital of a NBFC-MFI shall not exceed 100% of the Tier I capital.

Tier-I Capital, has been defined in the Prudential Norms – ND as, owned funds as reduced by investment in shares of other NBFCs and in shares, debentures, bonds, outstanding loans and advances including hire purchase and lease finance made to and deposits with subsidiaries and companies in the same group exceeding, in aggregate, 10% of the owned fund and perpetual debt instruments issued by a systemically important NBFC-ND in each year to the extent it does not exceed 15% of the aggregate Tier I capital of such company as on March 31 of the previous accounting year. Further the RBI vide circular dated March 27, 2015 require the NBFCs primarily engaged in the business of lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier I capital of 12%.

Owned Funds, has been defined in the Prudential Norms – ND as, paid-up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account; capital reserve representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of assets; less accumulated loss balance, book value of intangible assets and deferred revenue expenditure, if any.

Tier - II Capital has been defined in the Prudential Norms – ND, includes the following (a) preference shares other than those which are compulsorily convertible into equity; (b) revaluation reserves at discounted rate of 55%; (c) general provisions (including that for standard assets) and loss reserves to the extent these are not attributable to actual diminution in value or identifiable potential loss in any specific asset and are available to meet unexpected losses, to the extent of one-and-one-fourth percent of risk weighted assets; (d) hybrid debt capital instruments; and (e) subordinated debt to the extent the aggregate does not exceed Tier - I capital; and (f) perpetual debt instrument issued by a systemically important NBFC-ND, which is in excess of what qualifies for Tier I Capital to the extent that the aggregate Tier-II capital does not exceed 15% of the Tier -I capital.

Hybrid debt means, capital instrument, which possess certain characteristics of equity as well as debt.

Subordinated debt means a fully paid up capital instrument, which is unsecured and is subordinated to the claims of other creditors and is free from restrictive clauses and is not redeemable at the instance of the holder or without the consent of the supervisory authority of the NBFC. The book value of such instrument is subjected to discounting as prescribed.

Exposure Norms

In order to ensure better risk management and avoidance of concentration of credit risks, the RBI has, in terms of the Prudential Norms, prescribed credit exposure limits for financial institutions in respect of their lending to single/group borrowers. Credit exposure to a single borrower shall not exceed 15% of the owned funds of the systemically important NBFC-ND, while the credit exposure to a single group of borrowers shall not exceed 25% of the owned funds of the systemically important NBFC-ND. Further, the systemically important NBFC-ND may not invest in the shares of another company exceeding 15% of its owned funds, and in the shares of a single group of companies exceeding 25% of its owned funds. However, this prescribed ceiling shall not be applicable on a NBFC-ND-SI for investments in the equity capital of an insurance company to the extent specifically permitted by the RBI. Any NBFC-ND-SI not accessing public funds, either directly or indirectly may make an application to the RBI for modifications in the prescribed ceilings. Any systemically important NBFC-ND classified as asset finance company by RBI, may in exceptional circumstances, exceed the above ceilings by 5% of its owned fund, with the approval of its Board of Directors. The loans and investments of the systemically important NBFC-ND taken together may not exceed 25% of its owned funds to or in single party and 40% of its owned funds to or in single group of parties. A systemically important ND-NBFC may, make an application to the RBI for modification in the prescribed ceilings.

Asset Classification

The Prudential Norms require that every NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- Standard assets;
- Sub-standard Assets;
- Doubtful Assets; and
- Loss assets

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation. At present every NBFC is required to make a provision for standard assets at 0.25% of the outstanding. The requirement for standard assets for NBFCs-ND-SI and for all NBFCs-D, has vide the RBI Notification dated November 10, 2014 has been increased to 0.40% , to be complied with in a phased manner as follows: (i) 0.30% by March 31, 2016 (ii) 0.35% by March 31, 2017 (iii) 0.40% by March 31, 2018.

Net Owned Fund

Section 45-IA of the RBI Act provides that to carry on the business of a NBFC, an entity would have to register as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹2,00,00,000 (Rupees two hundred lakhs only). For this purpose, the RBI Act has defined “net owned fund” to mean:

“Net Owned fund - The aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance sheet of the company, after deducting (i) accumulated balance of losses, (ii) deferred revenue expenditure, (iii) deferred tax asset (net); and (iv) other intangible assets; and further reduced by the amounts representing,

- (i) investment by such companies in shares of (i) its subsidiaries, (ii) companies in the same group, (iii) other NBFCs; and
- (ii) the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with (i) subsidiaries of such companies; and (ii) companies in the same group,

to the extent such amount exceeds 10% of (a) above.”

Further in accordance with RBI Notification No.DNBR.007/CGM (CDS)-2015 dated March 27, 2015 which provides that a non-banking financial company holding a certificate of registration issued by the Reserve Bank of India and having net owned fund of less than two hundred lakhs of rupees, may continue to carry on the business of non-banking financial institution, if such company achieves net owned fund of:

- i. one hundred lakhs of rupees before April 1, 2016; and
- ii. two hundred lakhs of rupees before April 1, 2017.

Reserve Fund

In addition to the above, Section 45-IC of the RBI Act requires NBFCs to create a reserve fund and transfer therein a sum of not less than 20% of its net profits earned annually before declaration of dividend. Such sum cannot be appropriated by the NBFC except for the purpose as may be specified by the RBI from time to time and every such appropriation is required to be reported to the RBI within 21 days from the date of such withdrawal.

Maintenance of liquid assets

The RBI through notification dated January 31, 1998, as amended has prescribed that every NBFC shall invest and continue to invest in unencumbered approved securities valued at a price not exceeding the current market price of such securities an amount which shall, at the close of business on any day be not less than 10% in approved securities and the remaining in unencumbered term deposits in any scheduled commercial bank; the aggregate of which shall not be less than 15% of the public deposit outstanding at the last working day of the second preceding quarter.

NBFCs such as the Company, which do not accept public deposits, are subject to lesser degree of regulation as compared to a NBFC-D and are governed by the RBI's Non- Deposit Accepting Companies Directions.

An NBFC-ND is required to inform the RBI of any change in the address, telephone no.'s, etc. of its Registered Office, names and addresses of its directors/auditors, names and designations of its principal officers, the specimen signatures of its authorised signatories, within one month from the occurrence of such an event. Further, an NBFC-ND would need to ensure that its registration with the RBI remains current.

All NBFCs (whether accepting public deposits or not) having an asset base of ₹10,000 lakhs or more or holding public deposits of ₹2,000 lakhs or more (irrespective of asset size) as per their last audited balance sheet are required to comply with the RBI Guidelines for an Asset-Liability Management System.

Similarly, all NBFCs are required to comply with “Know Your Customer Guidelines - Anti Money Laundering Standards” issued by the RBI, with suitable modifications depending upon the activity undertaken by the NBFC concerned.

Corporate Governance

RBI vide its recent Master Circular dated July 1, 2015, introduced the Non-Banking Financial Companies – Corporate Governance (Reserve Bank) Directions, 2015 which requires all systematically important ND NBFCs having an asset size above ₹50,000 lakhs are required to consider adopting best practices and transparency in their systems as specified below. RBI pursuant to its Master Circular No. DNBR (PD) CC.No.053/03.10.119/2015-16 dated July 1, 2015 mandated that all NBFC having assets of ₹50,000 lakhs and above as per its last audited balance sheet are required to constitute an audit committee, consisting of not less than three members of its Board of Directors. Constitution of a nomination committee, a risk management committee and certain other norms in connection with disclosure, transparency, connected lending and framing of internal guidelines has also been prescribed in the RBI Master Circular. Further, the Audit Committee are required to ensure that an Information Systems Audit of the internal systems and processes is conducted at least once in two years to assess operational risks.

Accounting Standards & Accounting policies

Subject to the changes in Indian Accounting Standards and regulatory environment applicable to a NBFC we may change our accounting policies in the future and it might not always be possible to determine the effect on the Statement of profit and loss of these changes in each of the accounting years preceding the change. In such cases our profit/loss for the preceding years might not be strictly comparable with the profit/loss for the period for which such accounting policy changes are being made.

Reporting by Statutory Auditor

The statutory auditor of the NBFC-ND is required to submit to the Board of Directors of the company along with the statutory audit report, a special report certifying that the Directors have passed the requisite resolution mentioned above, not accepted any public deposits during the year and has complied with the prudential norms relating to income recognition, accounting standards, asset classification and provisioning for bad and doubtful debts as applicable to it. In the event of non-compliance, the statutory auditors are required to directly report the same to the RBI.

KYC Guidelines

The RBI has extended the Know Your Customer (“KYC”) guidelines to NBFCs and advised all NBFCs to adopt the same with suitable modifications depending upon the activity undertaken by them and ensure that a proper policy framework of anti-money laundering measures is put in place. The KYC policies are required to have certain key elements, including, customer acceptance policy, customer identification procedures, monitoring of transactions and risk management, diligence of client accounts opened by professional intermediaries, customer due diligence and diligence of accounts of politically exposed persons, adherence to KYC guidelines and the exercise of due diligence by persons authorised by the NBFC, including its brokers and agents.

Financing of NBFCs by bank

The RBI has issued guidelines *vide* a circular dated bearing number DBOD No. FSD. BC.46/24.01.028/2006-07 dated December 12, 2006 relating to the financial regulation of systemically important NBFC-NDs and the relationship of banks with such institutions. In particular, these guidelines prohibit banks from lending to NBFCs for the financing of certain activities, such as (i) bill discounting or rediscounting, except where such discounting arises from the sale of commercial vehicles and two wheelers or three wheelers, subject to certain conditions; (ii) unsecured loans or corporate deposits by NBFCs to any company; (iii) investments by NBFCs both of current and long term nature, in any company; (iv) further lending to individuals for the purpose of subscribing to an initial public offer.

In addition to the above the RBI has issued guidelines *vide* a circular dated bearing number DBR.BP.BC.No.5/21.04.172/2015-16 dated July 1, 2015 relating to bank financing of NBFCs predominantly engaged in lending against Gold has directed banks to (i) reduce their regulator exposure ceiling on a single NBFC, having gold loans to the extent of 50% or more of its total financial assets to 10% of banks’ capital funds. However, the exposure ceiling may go up by 5%, i.e., up to 15% of banks’ capital funds if the additional exposure is on account of funds on-lent by NBFCs to the infrastructure sector and (ii) to have an internal sub-limit on their aggregate exposures to all such NBFCs, having gold loans to the extent of 50% or more of their total financial assets, taken together. The sub-limits should be within the internal limit fixed by the banks for their aggregate exposure to all NBFCs put together.

Norms for excessive interest rates

In addition, the RBI has introduced *vide* a circular bearing reference number RBI/2006-07/414 dated May 24, 2007 whereby RBI has requested all NBFCs to put in place appropriate internal principles and procedures in determining interest rates and processing and other charges. In addition to the aforesaid instruction, the RBI has issued a Master Circular on Fair Practices Code dated July 1, 2015 for regulating the rates of interest charged by the NBFCs. These circulars stipulate that the board of each NBFC is required to adopt an interest rate model taking into account the various relevant factors including cost of funds, margin and risk premium. The rate of interest and the approach for gradation of risk and the rationale for charging different rates of interest for different categories of borrowers are required to be disclosed to the borrowers in the application form and expressly communicated in the sanction letter. Further, this is also required to be made available on the NBFCs website or published in newspapers and is required to be updated in the event of any change therein. Further, the rate of

interest would have to be an annualized rate so that the borrower is aware of the exact rates that would be charged to the account.

Supervisory Framework

In order to ensure adherence to the regulatory framework by systemically important ND-NBFCs, the RBI has directed such NBFCs to put in place a system for submission of an annual statement of capital funds, and risk asset ratio etc. as at the end of March every year, in a prescribed format. This return is to be submitted electronically within a period of three months from the close of every financial year. Further, a NBFC is required to submit a certificate from its statutory auditor that it is engaged in the business of non-banking financial institution with requirement to hold a certificate of registration under the RBI Act. Asset Liability Management

The RBI has prescribed the Guidelines for Asset Liability Management (“**ALM**”) System in relation to NBFCs (“**ALM Guidelines**”) that are applicable to all NBFCs through a Master Circular on Miscellaneous Instructions to All Non-Banking Financial Companies dated July 1, 2015. As per this Master Circular, the NBFCs (engaged in and classified as equipment leasing, hire purchase finance, loan, investment and residuary non-banking companies) meeting certain criteria, including, an asset base of ₹10,000 lakhs, irrespective of whether they are accepting/holding public deposits or not, or holding public deposits of ₹2,000 lakhs or more (irrespective of the asset size) as per their audited balance sheet as of March 31, 2001, are required to put in place an ALM system. The ALM Guidelines mainly address liquidity and interest rate risks. In case of structural liquidity, the negative gap (i.e. where outflows exceed inflows) in the 1 to 30/31 days' time-bucket should not exceed the prudential limit of 15% of cash outflows of each time-bucket and the cumulative gap of up to one year should not exceed 15% of the cumulative cash outflows of up to one year. In case these limits are exceeded, the measures proposed for bringing the gaps within the limit should be shown by a footnote in the relevant statement.

The Recovery of Debts due to Banks and Financial Institutions Act, 1993

The Recovery of Debts due to Banks and Financial Institutions Act, 1993 (the “**DRT Act**”) provides for establishment of the Debts Recovery Tribunals (the “**DRTs**”) for expeditious adjudication and recovery of debts due to banks and public financial institutions or to a consortium of banks and public financial institutions. Under the DRT Act, the procedures for recovery of debt have been simplified and time frames have been fixed for speedy disposal of cases. The DRT Act lays down the rules for establishment of DRTs, procedure for making application to the DRTs, powers of the DRTs and modes of recovery of debts determined by DRTs. These include attachment and sale of movable and immovable property of the defendant, arrest of the defendant and his detention in prison and appointment of receiver for management of the movable or immovable properties of the defendant.

The DRT Act also provides that a bank or public financial institution having a claim to recover its debt, may join an ongoing proceeding filed by some other bank or public financial institution, against its debtor, at any stage of the proceedings before the final order is passed, by making an application to the DRT.

Anti-Money Laundering

The RBI has issued a Master Circular dated July 1, 2015 to ensure that a proper policy frame work for the Prevention of Money Laundering Act, 2002 (“**PMLA**”) is put into place. The PMLA seeks to prevent money laundering and provides for confiscation of property derived from, or involved in money laundering and for other matters connected therewith or incidental thereto. It extends to all banking companies, financial institutions, including NBFCs and intermediaries. Pursuant to the provisions of PMLA and the RBI guidelines, all NBFCs are advised to appoint a principal officer for internal reporting of suspicious transactions and cash transactions and to maintain a system of proper record (i) for all cash transactions of value of more than ₹10 lakhs; (ii) all series of cash transactions integrally connected to each other which have been valued below ₹10 lakhs where such series of transactions have taken place within one month and the aggregate value of such transaction exceeds ₹10 lakhs.

Muthoot Mini Financiers Limited

Further, all NBFCs are required to take appropriate steps to evolve a system for proper maintenance and preservation of account information in a manner that allows data to be retrieved easily and quickly whenever required or when requested by the competent authorities. Further, NBFCs are also required to maintain for at least ten years from the date of transaction between the NBFCs and the client, all necessary records of transactions, both domestic or international, which will permit reconstruction of individual transactions (including the amounts and types of currency involved if any) so as to provide, if necessary, evidence for prosecution of persons involved in criminal activity.

Additionally, NBFCs should ensure that records pertaining to the identification of their customers and their address are obtained while opening the account and during the course of business relationship, and that the same are properly preserved for at least ten years after the business relationship is ended. The identification records and transaction data is to be made available to the competent authorities upon request.

SARFAESI Act

The SARFAESI Act regulates the securitization and reconstruction of financial assets of banks and financial institutions. The SARFAESI Act provides for measures in relation to enforcement of security interests and rights of the secured creditor in case of default.

The RBI has issued guidelines to banks and financial institutions on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank or a financial institution or an NBFC may sell financial assets to an asset reconstruction company provided the asset is an NPA. A bank or financial institution or NBFC may sell a financial assets only if the borrower has a consortium or multiple banking arrangements and at least 75% by value of the total loans to the borrower are classified as an NPA and at least 75% by the value of the banks and financial institutions in the consortium or multiple banking arrangement agree to the sale. In addition to the above, a financial asset may be sold by any bank or financial institution where the asset is reported, by the bank financial institution to Central Repository for Information on Large Credit, as an NPA wherein the principal or interest payment is overdue between 61-90 days.

As per the SARFAESI Amendment Act of 2004, the constitutional validity of which was upheld in a recent Supreme Court ruling, non-performing assets have been defined as an asset or account of a borrower, which has been classified by a bank or financial institution as sub-standard, doubtful or loss asset in accordance with directions or guidelines issued by the RBI. In case the bank or financial institution is regulated by a statutory body/authority, NPAs must be classified by such bank in accordance with guidelines issues by such regulatory authority. The RBI has issued guidelines on classification of assets as NPAs. Further, these assets are to be sold on a “without recourse” basis only.

The SARFAESI Act provides for the acquisition of financial assets by Securitization Company or Reconstruction Company from any bank or financial institution on such terms and conditions as may be agreed upon between them. A securitization company or reconstruction company having regard to the guidelines framed by the RBI may, for the purposes of asset reconstruction, provide for measures such as the proper management of the business of the borrower by change in or takeover of the management of the business of the borrower, the sale or lease of a part or whole of the business of the borrower and certain other measures such as rescheduling of payment of debts payable by the borrower; enforcement of security.

Additionally, under the provisions of the SARFAESI Act, any securitisation company or reconstruction company may act as an agent for any bank or financial institution for the purpose of recovering its dues from the borrower on payment of such fee or charges as may be mutually agreed between the parties.

The Companies Act has been notified by the Government of India on August 30, 2013 (the “Notification”). Under the Notification, Section 1 of the Companies Act has come into effect and the remaining provisions of the Companies Act have and shall come into force on such dates as the Central Government has notified and shall notify. Section 1 of the Companies Act deals with the commencement and application of the Companies Act and among others sets out the types of companies to which the Companies Act applies. Further the Ministry of Corporate Affairs has by their notifications dated September 12, 2013 and March 26, 2014 notified certain sections

of the Companies Act, which have come into force from September 12, 2013 and April 1, 2014.

The Companies Act is expected to replace the Companies Act, 1956 upon notification of all sections of the Companies Act, 1956. The Companies Act provides for, among other things, changes to the regulatory framework governing the issue of capital by companies, corporate governance, audit procedures, corporate social responsibility, the requirements for independent directors, director's liability, class action suits, and the inclusion of women directors on the boards of companies. The Companies Act is complemented by a set of rules that set out the procedure for compliance with the substantive provisions of the Companies Act. As mentioned above, certain provisions of the Companies Act, 2013 have already come into force and the rest shall follow in due course.

Additionally, section 465 (yet to be notified) of the 2013 Act provides for repeals and savings where under anything done or any action taken or purported to have been done or taken, including any rule, notification, inspection, order or notice made or issued or any appointment or declaration made or any operation undertaken or any direction given or any proceeding taken or any penalty, punishment, forfeiture or fine imposed under the repealed enactments shall, insofar as it is not inconsistent with the provisions of 2013 Act, be deemed to have been done or taken under the corresponding provisions of the 2013 Act.

Under the Companies Act every company having net worth of ₹50,000 lakhs or more, or turnover of ₹100,000 lakhs or more or a net profit of ₹500 lakhs or more during any financial year shall formulate a corporate social responsibility policy. Further, the board of every such company shall ensure that the company spends, in every financial year, at least two% of the average net profits of the company made during the three immediately preceding financial years in pursuance of its corporate social responsibility policy.

Foreign Investment Regulations

Foreign direct investment (including foreign institutional investment, investments by non-resident Indians, persons of Indian origin and overseas corporate bodies) ("FDI") in an Indian company is governed by the provisions of the Foreign Exchange Management Act, 1999 ("FEMA") read with the Consolidated Foreign Direct Investment Policy effective from April 05, 2013 ("FDI Policy") issued by the Department of Industrial Promotion and Policy, Ministry of Commerce, Government of India ("DIPP"). FDI is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the approval route, depending upon the sector in which FDI is sought to be made. Under the automatic route, no prior Government approval is required for the issue of securities by Indian companies/acquisition of securities of Indian companies, subject to the sectoral caps and other prescribed conditions. Investors are required to file the required documentation with the RBI within 30 days of such issue/acquisition of securities. However, if the foreign investor has any previous joint venture/tie-up or a technology transfer/trademark agreement in the "same field" in India, prior approval from the FIPB is required even if that activity falls under the automatic route, except as otherwise provided.

Under the approval route, prior approval from the FIPB or RBI is required. FDI for the items/activities that cannot be brought in under the automatic route may be brought in through the approval route. Approvals are accorded on the recommendation of the FIPB, which is chaired by the Secretary, DIPP, with the Union Finance Secretary, Commerce Secretary and other key Secretaries of the Government of India as its members.

As per the sector specific guidelines of the Government of India, the following are the relevant norms applicable for FDI in NBFCs:

- (a) FDI investments up to 100% of the paid-up share capital of the NBFC is allowed under the automatic route in the following NBFC activities:
 - (i) Merchant banking;
 - (ii) Underwriting;
 - (iii) Portfolio Management Services;
 - (iv) Investment Advisory Services;
 - (v) Financial Consultancy;
 - (vi) Stock Broking;
 - (vii) Asset Management;
 - (viii) Venture Capital;
 - (ix) Custodial Services;
 - (x) Factoring;

- (xi) Credit rating Agencies;
- (xii) Leasing and Finance;
- (xiii) Housing Finance;
- (xiv) Forex Broking;
- (xv) Credit card business;
- (xvi) Money changing Business;
- (xvii) Micro Credit; and
- (xviii) Rural Credit.

(b) Minimum Capitalisation Norms for fund based NBFCs:

- (i) For FDI up to 51% - US \$0.5 million to be brought up front.
- (ii) For FDI above 51% and up to 75% - US \$5 million to be brought up front.
- (iii) For FDI above 75% and up to 100% - US \$50 million out of which US \$7.5 million to be brought up front and the balance in 24 months
- (iv) NBFCs (i) having foreign investment more than 75% and up to 100%, and (ii) with a minimum capitalisation of US\$50.00 million, can set up step down subsidiaries for specific NBFC activities, without any restriction on the number of operating subsidiaries and without bringing in additional capital. The minimum capitalization condition as mandated by the FDI Policy at paragraph 3.10.4.1, therefore, shall not apply to downstream subsidiaries.

Joint venture operating NBFCs that have 75% or less than 75% foreign investment can also set up subsidiaries for undertaking other NBFC activities, subject to the subsidiaries also complying with the applicable minimum capitalisation norm mentioned in (b)(i), (ii) and (iii) above and (f) below.

Non- Fund based activities: US \$0.5 million to be brought upfront for all permitted non-fund based NBFCs irrespective of the level of foreign investment subject to the following condition. It would not be permissible for such a company to set up any subsidiary for any other activity, nor can it participate in any equity of an NBFC holding/operating company.

- (c)** Where FDI is allowed on an automatic basis without FIPB approval, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required except with respect to fixing the issue price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The foregoing description applies only to an issuance of shares by, and not to a transfer of shares of, Indian companies. Every Indian company issuing shares or convertible debentures in accordance with the RBI regulations is required to submit a report to the RBI within 30 days of receipt of the consideration and another report within 30 days from the date of issue of the shares to the non-resident purchaser.

Dear Mr. Jacob,

Re: Credit Rating of Muthoottu Mini Financiers Limited's (MMFL) debt instrument

India Ratings & Research Private Limited (India Ratings) communicates the following rating to MMFL:-

INR5bn Non-Convertible Debentures (combination of secured non-convertible debentures and unsecured subordinated non-convertible debentures): 'IND BBB': Outlook Stable

In issuing and maintaining its ratings, India Ratings relies on factual information it receives from issuers and underwriters and from other sources India Ratings believes to be credible. India Ratings conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction.

The manner of India Ratings' factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors.

Users of India Ratings' ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information India Ratings relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to India Ratings and to the market in offering documents and other reports. In issuing its ratings India Ratings must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

India Ratings seeks to continuously improve its ratings criteria and methodologies, and periodically updates the descriptions on its website of its criteria and methodologies for securities of a given type. The criteria and methodology used to determine a rating action are those in effect at the time the rating action is taken, which for public ratings is the date of the related rating action commentary. Each rating action commentary provides information about the criteria and methodology used to arrive at the stated rating, which may differ from the general criteria and methodology for the applicable security type posted on the website at a given time. For this reason, you should always

11

consult the applicable rating action commentary for the most accurate information on the basis of any given public rating.

Ratings are based on established criteria and methodologies that India Ratings is continuously evaluating and updating. Therefore, ratings are the collective work product of India Ratings and no individual, or group of individuals, is solely responsible for a rating. All India Ratings reports have shared authorship. Individuals identified in an India Ratings report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only.

Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services. Investors may find India Ratings ratings to be important information, and India Ratings notes that you are responsible for communicating the contents of this letter, and any changes with respect to the rating, to investors.

It is important that you promptly provide us with all information that may be material to the ratings so that our ratings continue to be appropriate. Notwithstanding the above, ratings may be raised, lowered, withdrawn, or placed on Rating Watch due to changes in, additions to, accuracy of or the inadequacy of information or for any other reason India Ratings deems sufficient.

Nothing in this letter is intended to or should be construed as creating a fiduciary relationship between India Ratings and you or between India Ratings and any user of the ratings.

In this letter, “**India Ratings**” means India Ratings & Research Pvt. Ltd. and any successor in interest.

We are pleased to have had the opportunity to be of service to you. If we can be of further assistance, please contact us at +91 22 4000 1700.

Ind-Ra Upgrades Muthoottu Mini's NCDs to 'IND BBB'; Rates New NCDs

Ind-Ra-Mumbai-10 December 2015: India Ratings and Research (Ind-Ra) has upgraded Muthoottu Mini Financiers Limited's (MMFL) INR7.67bn non-convertible debentures (NCDs) to 'IND BBB' with a Stable Outlook from 'IND BB+'. The NCDs include both secured and unsecured subordinated instruments and have been increased from INR5.496bn. The agency has also assigned MMFL's new INR5bn NCDs (both secured and unsecured subordinated) an 'IND BBB' rating with Stable Outlook.

KEY RATING DRIVERS

The rating upgrade reflects MMFL's improving corporate governance profile. Post the instances of regulatory breaches in the past, MMFL has improved its regulatory compliances along with increasing total capital adequacy ratio (adjusted CAR excluding bonus shared issued from revaluation reserve: 1HFY16: 27.9%, FYE14: 18.7%, FYE13: 15.1%). The promoters are committed to infusing further equity into the company, if required, to support its business growth. The rating factors in MMFL's reasonable net worth with equity to asset ratio of 21.3% on 30 September 2015.

To comply with the Reserve Bank of India's directions, MMFL has discontinued providing unsecured personal loans. Personal loans formed 5% of the total loans at FYE14 which declined to 0.3% at end-September 2015. As required by the Reserve Bank of India, the company has also largely segregated its operations from those of its other group companies. MMFL rapidly expanded its balance sheet and branch network over FY09-FY13, while it transitioned from being a private limited into a public limited company. Due to the rapid shift in scale and profile, its management information and control systems have been evolving. Ind-Ra expects the company to continue its focus on achieving absolute regulatory compliance.

Furthermore, MMFL's liquidity situation is gradually improving with lower refinancing requirement. The company has a matched asset-liability profile while around 24% of its total INR13.3bn debt (at end-September 2015) due for repayment within one year. During FY15, MMFL had to refinance a higher amount of around 60% of its total debt. MMFL's profitability was impacted in FY15 (return on asset in FY15 at 0.9% and 1.5% in FY14) due to a rise in borrowing costs (11.6%, 10%) owing to refinancing pressures. MMFL has increased its banking relationships in the last one year, which along with long-term subordinated bond issuances will stabilise its overall funding profile. While MMFL has successfully raised public NCD issues over the last 20 months, the company still depends on NCDs for funding requirements (the share of NCD in total funding was 82%) and its growth plans (three-year CAGR of 24% in loan portfolio) could come under pressure if it is unable to raise the desired funds from the market.

MMFL has a low assets under management per branch of INR19m (against around INR29m for the sector) due to the high number of unseasoned branches along with slow growth in gold loans. The company has increased its branch network to around 1,020 (opened 829 branches over FY12-FY14), which would help to grow the total loan book without incurring significant additional establishment costs. The company is in a position to utilise the existing branch network to diversify into certain non-gold segments which would improve the AUM to branch ratio of MMFL. An increase in branch productivity along with the rationalisation of branches will lead to a decline in the cost-income ratio (1HFY16: 70%, FY15: 78%).

The rating also factors in MMFL's comfortable asset quality. 180-day past due gross non-performing advances were 1.6% at end-September 2015. Its loan portfolio is completely secured against gold jewellery. While the company faces the risk of a steep decline in gold prices, which could lead to a decline in the realisable value of gold jewellery, the Reserve Bank of India's loan-to-value ceiling of 75% and jewellery valuation based on the pure gold content provide cushion against a gold price decline.

RATING SENSITIVITIES

Positive: A positive rating action could result from the successful execution of growth strategy which includes ability to raise funds from diversified sources together with an improvement in branch productivity and satisfactory operating performance.

Negative: A negative rating action could result from inability to raise funds through new banking channels or public NCDs or a sharp rise in delinquencies which could constrict capital as well as liquidity, or inability to maintain above-average capital buffers. A negative rating action could also result from a significant breach in corporate governance practices including material regulatory action on the company.

COMPANY PROFILE

MMFL, a Kerala-based non-deposit taking non-banking finance company, lends against high-yielding gold jewellery, which forms around 99.7% of the total loans. At end-September 2015, MMFL's assets were INR21.6bn and net profit for 1HFY16 was INR174.5m (annualised return on asset at 1.7%).
