6. Our business is capital intensive and any disruption or restrictions in raising financial resources would have a material adverse effect on our liquidity and financial condition.

Our liquidity and ongoing profitability are largely dependent upon our timely access to and the costs associated in, raising financial resources at low costs. Our funding requirements historically have been met from a combination of borrowings such as term loans, working capital limits from banks / financial institutions, issuance of secured and unsecured redeemable non-convertible debentures and subordinated debts. Thus, our business depends and will continue to depend on our ability to access diversified low-cost funding sources.

Our ability to raise funds on acceptable terms and at competitive rates depend on various factors like credit ratings, the regulatory environment and policy initiatives in India, developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition.

In case of a global financial crisis, the capital and lending markets typically become highly volatile and access to liquidity becomes significantly reduced. In addition, it may become more difficult to renew loans and facilities as many potential lenders and counterparties could also face liquidity and capital concerns, as a result of the stress in the financial markets. If any event of a similar nature and magnitude occurs again in the future, such as the recent liquidity crisis caused on account of debt default by one of the large Indian NBFCs, it may result in increased borrowing costs and difficulty in accessing debt in a cost-effective manner. Moreover, we are a NBFC-ND-SI, and do not have access to public deposits.

The RBI guideline bearing reference no. DBOD.BP.BC.No. 106/21.04.172/2011-12 dated May 18, 2012 whereby it has instructed banks to (i) reduce their regulatory exposure on a single NBFC having gold loans to the extent of 50.00% or more of its financial assets from 10.00% to 7.50% of their capital funds; and (ii) have an internal sub-limit as decided by the boards of the respective banks on their aggregate exposure to all such NBFCs having gold loans to the extent of 50% or more of their financial assets, taken together, which sub-limit should be within the internal limits fixed by banks for their aggregate exposure to all NBFCs taken together.

The RBI vide the Master Directions issued certain guidelines with respect to raising money through private placement by NBFCs in the form of non-convertible debentures. These guidelines include (i) restrictions on the minimum subscription amount for a single investor at ₹20,000; (ii) the issuance of private placement of non-convertible debentures shall be in two separate categories, those with a maximum subscription of less than ₹1 crore and those with a minimum subscription of ₹1 crore per investor; (iii) the restriction of number of investors in an issue to 200 investors for every financial year for a maximum subscription of less than ₹1 crore which shall be fully secured; (iv) there is no limit on the number of subscribers in respect of issuances with a minimum subscription of ₹1 crore and above while the option to create security in favour of subscribers will be with the issuers and such unsecured debentures shall not be treated as public deposits; (v) restriction on NBFCs for issuing debentures only for deployment of funds on its own balance sheet and not to facilitate resource requests of group entities/parent company/associates; and (vi) prohibition on providing loan against its own debentures. This has resulted in limiting our Company's ability to raise fresh debentures on private placement basis.

A significant portion of our debt matures each year. Out of the total amount of our outstanding non-convertible debentures (excluding interest thereon), ₹59,135.71 lakhs, issued by our Company as of December 31, 2019, non-convertible debentures amounting to ₹26,506.40 lakhs will mature during the next 12 months. In order to retire these instruments, we either will need to refinance this debt, which could be difficult in the event of volatility in the credit markets, or raise equity capital or generate sufficient cash to retire the debt.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. As an NBFC, we also face certain restrictions on our ability to raise money from international markets, which may further constrain our ability to raise funds at attractive rates.

Any disruption in our primary funding sources at competitive costs could have a material adverse effect on our liquidity and financial condition.

7. ***Our financial performance is primarily dependent on interest rate risk. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our Company.***

Our results of operations are substantially dependent upon the level of our net interest margins. Income from operations is the largest component of our total income, and constituted 98.76%, 98.78%, 98.38%, and 99.02% of our total income for the six month period ended on September 30, 2019, Fiscals 2019, 2018 and 2017, respectively. Interest rates are sensitive to many factors beyond our control, including the RBI's monetary policies, domestic and international economic and political conditions and other factors.

Over the years, the Government of India has substantially deregulated the financial sector. As a result, interest rates are now primarily determined by the market, which has increased the interest rate risk exposure of all banks and financial intermediaries in India, including us.

Our policy is to attempt to balance the proportion of the interest earning assets (which bear fixed interest rates), with interest bearing liabilities. A significant portion of our liabilities, such as our non-convertible debentures carry fixed rates of interest and the remaining are linked to the respective banks' benchmark prime lending rate/base rate. As of December 31, 2019, 66.17% of our borrowings were at fixed rates of interest. Moreover, we do not hedge our exposure to interest rate changes. We cannot assure you that we can adequately manage our interest rate risk in the future or can effectively balance the proportion of our fixed rate loan assets and liabilities. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any re pricing of our liabilities compared with the re pricing of our assets.

Any mismatch between the yield on an assets and the cost of our funds due to market action/factors could have an impact on our profitability.

8. *We face increasing competition in our business which may result in declining interest margins. If we are unable to compete successfully, our market share may also decline.*

Our principal business is providing gold loan to customers in India secured by gold jewellery. Historically, the gold loan industry in India has been largely unorganised and dominated by local jewellery pawn shops and money lenders, with little involvement from public sector or private sector banks. Gold loan financing was availed predominantly by lower income group customers with limited or no access to other forms of credit, however, such income group has gained increased access to capital through organised and unorganised money lenders, which has increased our exposure to competition. The demand for gold loans has also increased due to relatively lower and affordable interest rates, increased need for urgent borrowing or bridge financing requirements, the need for liquidity for assets held in gold and increased awareness and acceptance of gold loan financing.

There is increased competition from other lenders in the gold loan industry, including commercial banks and other NBFCs, who also have access to funding from customers' in the form of savings and current deposits. We rely on higher cost loans and debentures for our funding requirements, which could reduce our margins. Our ability to compete effectively will depend, on our ability to raise low cost funding. If we are unable to compete effectively with other participants in the gold loan industry, our business, financial condition and results of operations may be adversely affected.

The competition in the gold loan industry has increased in gold loans are becoming increasingly standardised. Variable interest rates, variable payment terms and waiver of processing fees are also becoming increasingly common.

In our microfinance business, we face competition from other NBFCs, microfinance companies as well as both commercial and small finance banks. In addition, the RBI has set out guidelines applicable to microfinance institutions which restrict the number of microfinance institutions that can extend loans to the same borrower and also limit the maximum amount of loan that can be extended. The presence of microfinance institutions in India is not uniform and certain regions have a concentration of a large number of microfinance institutions while there are regions which have very few and even no microfinance institution presence. In any particular region, the level of competition depends on the number of microfinance institutions that operate in such area. In addition, our target customers also borrow from money lenders and non-institutional lenders which may lend at higher rates of interest.

Our ability to compete effectively will depend, to an extent, on our ability to raise low-cost funding in the future as well as our ability to maintain or decrease our operating expenses by increasing operational efficiencies and managing credit costs. As a result of increased competition in the various sectors we operate in, products in our industry have become increasingly standardised and variable interest rate and payment terms and lower processing fees are becoming increasingly common across our products. There can be no assurance that we will be able to effectively address these or other finance industry trends or compete effectively with new and existing commercial banks, NBFCs, payment banks, other small finance banks and other financial intermediaries that operate across our various financing products.

In addition, the government has issued schemes such as Pradhan Mantri Jan-Dhan Yojana to ensure access to financial services in an affordable manner. Further, public sector banks as well as existing private sector banks, have an extensive customer and depositor base, larger branch networks, and in case of public sector banks, Government support for capital augmentation, due to which they may enjoy corresponding economies of scale and greater access to low-cost capital, and accordingly, we may not be able to compete with them. An inability to effectively address such competition may adversely affect our market share, business prospects, results of operations and financial condition.

9. *We may not be able to realise the full value of our pledged gold jewellery in case of a default, which exposes us to a potential loss.*

We may not be able to realise the full value of our pledged gold, due to, among other things, defects in the quality of gold or wastage that may occur when melting gold jewellery into gold bars. We have in place an extensive internal policy on determining the quality of gold prior to disbursement of the gold loan. However, we cannot assure that methods followed by us are fool proof and the impurity levels in the gold can be accurately assessed.

In the case of a default, amongst others we may auction the pledged gold in accordance with our auction policy. We cannot assure you that we will be able to auction such pledged gold jewellery at prices sufficient to cover the amounts under default. Moreover, there may be delays associated with the auction process or other processes undertaken by us to recover the amount due to us. Any such failure to recover the expected value of pledged gold could expose us to a potential loss and which could adversely affect our financial condition and results of operations.

10. *Volatility in the market price of gold may adversely affect our financial condition, cash flows and results of operations.*

We extend loans secured mostly by gold jewellery. A sustained decrease in the market price of gold could cause a corresponding decrease in new Gold Loans in our loan portfolio and, as a result, our interest income. In addition, customers may not repay their loans and the gold jewellery securing the loans may have decreased significantly in value, resulting in losses which we may not be able to support. The impact on our financial position and results of operations of a hypothetical decrease in gold values cannot be reasonably estimated because the market and competitive response to changes in gold values is not pre-determinable.

11. *Our ability to lend against the collateral of gold jewellery has been restricted on account of guidelines issued by RBI, which may have a negative impact on our business and results of operation.*

RBI vide the Master Directions has stipulated all NBFCs to maintain an LTV ratio not exceeding 75% for loans granted against the collateral of gold jewellery and further prohibits lending against bullion/primary gold and gold coins. This notification will limit our ability to provide loan on the collateral of gold jewellery and thereby putting us at a disadvantage vis-à-vis unregulated money lenders offering similar products. Further, RBI in the Master Directions, has mandated NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier I Capital of 12%. Such restrictions imposed by RBI may erode our margins, impact our growth and business prospects.

RBI in the Master Directions further tightened the norms for lending against the security of gold ornaments by pegging the maximum lendable value to preceding 30 day's average of the closing price of 22 carat gold as per the rate as quoted by the Bombay Bullion Association. Any such future restrictions by RBI could have a negative impact on our business and results of operation.

12. *We may not be able to successfully sustain our growth strategy. Inability to effectively manage our growth and related issues could materially and adversely affect our business and impact our future financial performance.*

Our growth strategy includes growing our AUM, expanding network of branches and expanding the range of products and services. We cannot assure you that we will be able to execute our growth strategy successfully or continue to achieve or grow at the levels of revenue earned in recent years, or that we will be able to expand further our AUM. Furthermore, there may not be sufficient demand for our services or they may not generate sufficient revenues relative to the costs associated with offering such services. Even if we were able to

introduce new services successfully, there can be no assurance that we will be able to achieve our intended return on such investments. If we grow our AUM too rapidly or fail to make proper assessments of credit risks associated with borrowers, a higher percentage of our loans may become non-performing, which would have a negative impact on the quality of our assets and our financial condition.

Further principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. It also includes undertaking permission from various authorities, including RBI and various regulatory compliances. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure.

13. If we are not able to control the level of non-performing assets in our portfolio, the overall quality of our loan portfolio may deteriorate, and our results of operations may be adversely affected.

We may not be successful in our efforts to improve collections and/or enforce the security interest on the gold collateral on existing as well as future non-performing assets. Moreover, as our loan portfolio increases, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control our level of non-performing assets, the overall quality of our loan portfolio may deteriorate, and our results of operations may be adversely affected. Our gross NPAs as of the six month period ended September 30, 2019, Fiscals ended March 31, 2019, March 31, 2018, and March 31, 2017 was ₹3,060.96 lakhs, ₹2,987.43 lakhs, ₹3,254.83 lakhs and ₹4,669.96 lakhs, respectively.

The Master Directions prescribe the provisioning required in respect of our outstanding loan portfolio. Should the overall credit quality of our loan portfolio deteriorate, the current level of our provisions may not be adequate to cover further increases in the amount of our non-performing assets. Furthermore, although we believe that our total provision will be adequate to cover all known losses in our asset portfolio, our current provisions may not be adequate when compared to the loan portfolios of other financial institutions. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of gross non-performing assets or otherwise, or that the percentage of non-performing assets that we will be able to recover will be similar to our past experience of recoveries of non-performing assets. In the event of any further increase in our non-performing asset portfolio, there could be an even greater, adverse impact on our results of operations.

14. Our indebtedness and the conditions and restrictions imposed by our financing agreements could restrict our ability to conduct our business and operations in the manner we desire.

As of December 31, 2019, we had an outstanding debt (including interest on bank borrowings and excluding interest on debentures) of ₹1,20,303.75 lakhs. We may incur additional indebtedness in the future. Many of our financing agreements include various restrictive conditions and covenants restricting certain corporate actions, and our Company is required to take the prior approval of the lender before carrying out such activities. For instance, our Company, *inter alia*, is required to obtain the prior written consent in the following instances:

- to declare and/or pay dividend to any of its shareholders whether equity or preference, during any financial year unless our Company has paid to the lender the dues payable by our Company in that year;
- to undertake or permit any merger, amalgamation or compromise with its shareholders, creditors or effect any scheme of amalgamation or reconstruction or disposal of whole of the undertaking;
- to create or permit any charges or lien, sell or dispose of any encumbered assets;
- to alter its capital structure, or otherwise acquire any share capital;
- to effect a change of ownership or control, or management of our Company;
- to enter into long term contractual obligations directly affecting the financial position of our Company;
- to borrow or obtain credit facilities from any bank or financial institution;
- to undertake any guarantee obligations on behalf of any other company;
- to make any share capital investments or advance loans or funds to any other concern including group companies;
- to repay dues of promoter/group companies;

- to undertake any new project/further expansion or acquire fixed assets except those indicated in the funds flow statement submitted to the bank from time to time and approved by the bank;
- to sell, assign, mortgage or otherwise dispose of any of the fixed assets charged to the banks; and
- any change of practice with regard to remuneration of the directors.

Our indebtedness could have several important consequences, including our cash flows being used towards repayment of our existing debt, which will reduce the availability of our cash flow to fund our working capital, capital expenditures and other general corporate requirements. Moreover, our ability to obtain additional financing or renewal of existing facilities, in the future at reasonable terms may be restricted or our cost of borrowings may increase due to sudden adverse market conditions, including decreased availability of credit or fluctuations in interest rates, particularly because a significant proportion of our financing arrangement are in the form of borrowings from banks. There could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements and we may be more vulnerable to economic downturns, which may limit our ability to withstand competitive pressures and may reduce our flexibility in responding to changing business, regulatory and economic conditions.

15. *A major part of our branch network is concentrated in southern India and any disruption or downturn in the economy of the region would adversely affect our operations.*

As of December 31, 2019, 98.46% of our branches i.e. 767 branches were located in the southern states of Andhra Pradesh, Telangana, Goa, Karnataka, Kerala and Tamil Nadu and the union territory of Puducherry and these constituted about 96.49% of our total gold loan portfolio as of December 31, 2019. For details please refer to “*Our Business*” on page 84. As a result, we are exposed to risks including any change in policies relating to these states, any localised social unrest, any natural disaster and any event or development which could make business in such states less economically beneficial. Further, any disruption, disturbance or breakdown in these states could adversely affect the result of our business and operations. Our concentration in these southern states of India exposes us to adverse economic or political circumstances that may arise in that region as compared to other NBFCs and commercial banks that may have diversified national presence and may have an adverse effect on our business, market share and results of operations.

16. *Our bank funding is concentrated amongst a few lenders and impairment of our relationship with any, or all, of such lenders or our inability to secure additional loans and renewal of existing facilities on favourable terms from such lenders in the future, may have a material adverse effect on our business, results of operations and financial condition.*

As on December 31, 2019, we have been sanctioned working capital limits of ₹7,500 lakhs from Andhra Bank, ₹5,000 lakhs from IndusInd Bank, ₹2,900 lakhs from Dhanalaxmi Bank Limited, ₹5,000 lakhs from Oriental Bank of Commerce, ₹16,500 lakhs from The South Indian Bank Limited, ₹5,000 lakhs from State Bank of India and ₹2,500 lakhs from Union Bank of India. We may have difficulty in obtaining funding on acceptable terms from these or other lenders and other sources which we have not accessed so far. Any impairment of our relationship with any, or all, of our lenders or our inability to secure additional loans and renewal of existing facilities on favourable terms from such lenders in future may have a material adverse effect on our business, results of operations and financial condition.

17. *Our Company has in the past deviated from the accrual accounting policy.*

Our Company has not recognised the interest accrued but not due on the non-convertible debentures issued by our Company, in accordance with the accrual method of accounting for the Fiscal 2012 till Fiscal 2016. However, in the Fiscal 2017, our Company provided for the entire amount of accrued interest but not due liability on such issued non-convertible debentures, amounting to ₹15,463.21 lakhs. For further details, see “*Financial Statements*” on page 115.

18. *Our gold loans are of tenors not exceeding 1 year, and a failure to disburse new loans may result in a reduction of AUM and a corresponding interest income would decline.*

The gold loans we offer are short term loans and are due within one year of disbursement typically ranging from three to nine months. The relatively short term nature of our loans means that we are not assured of long term interest income streams compared to businesses that offer loans with longer terms. In addition, our

existing customers may not obtain new loans from us upon maturity of their existing loans, particularly if competition increases. The short term nature of our loan products and the potential instability of our interest income could materially and adversely affect our results of operations and financial position.

19. *Inaccurate appraisal of gold by our personnel may adversely affect our business and financial condition.*

Accurate appraisal of pledged gold is a significant factor in the successful operation of our business and such appraisal requires a skilled and reliable workforce. Assessing gold jewellery quickly is a specialised skill that requires assessing jewellery for gold content and quality manually without damaging the jewellery. Our Company provides training for our personnel for assessing jewellery for gold content and quality. However, in spite of rigorous training there is no guarantee that the gold ornaments appraised are accurately. Inaccurate appraisal of gold content, by our workforce may result in the gold ornament being overvalued and pledged for a loan that is higher in value than the actual value of gold content, which could adversely affect our reputation and business. We also run the risk of spurious gold being incorrectly assessed and approved for disbursement. Further, we are subject to the risk of inaccurate or fraudulent estimation of the value of pledged gold by our gold appraisers. Any such inaccuracies or fraud in relation to our appraisal of gold may adversely affect our reputation, business and financial condition.

20. *We depend on customer supplied information when evaluating customer credit worthiness.*

In deciding whether to extend credit or enter into other transactions with customers and counter parties, we may rely on information furnished to us by or on behalf of our customers, including the financial information from which we create our credit assessments. We may also rely on customer representations as to the accuracy and completeness of customer supplied information. Any relevant changes in this information may not be made available to us. The information that we have gathered may not be sufficient to create a complete customer risk profile. Because we rely on such customer supplied information, some or all of certain customers' risk profiles may be wilfully or inadvertently wrong or misleading, which may lead us to enter into transactions that may adversely affect our financial condition and results of operations.

21. *The implementation of our KYC norms as well as our measures to prevent money laundering may not be completely effective, which could adversely affect our reputation and in turn have an adverse impact on our business and results of operations.*

Our implementation of anti-money laundering measures required by the RBI, including KYC policies and the adoption of anti-money laundering and compliance procedures in all our branches, may not be completely effective. There can be no assurance that certain of our customers will not indulge in money laundering activities advertently misusing our business channels. If we were identified to be associated with money laundering operations, our reputation may be adversely affected, which in turn could have an adverse impact on our business and results of operations.

22. *Our customer base comprises entirely of individual borrowers, who generally are more likely to be affected by declining economic conditions than large corporate borrowers. Any decline in the repayment capabilities of our borrowers, may result in increase in defaults, thereby adversely affecting our business and financial condition.*

Individual borrowers typically are less financially resilient than larger corporate borrowers, and as a result, they are typically more adversely affected by declining economic conditions. In addition, a significant majority of our customer base belongs to the low to medium income group. Furthermore, unlike many developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about individuals, particularly our focus customer segment of the low to medium income group. It is therefore difficult to carry out precise credit risk analyses on our customers. While we follow certain procedures to evaluate the credit profile of our customers before we sanction a loan, we generally rely on the quality of the pledged gold rather than on a stringent analysis of the credit profile of our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to maintain sufficient credit assessment policies, particularly for individual borrowers, could adversely affect our loan portfolio, which could in turn have an adverse effect on our financial condition and results of operations.

- 23. Our Company and certain of our Promoters, Directors, Key Managerial Personnel, Group Companies were subject to a search conducted by income tax authorities. Any adverse action in this regard could have a detrimental impact on our Company's reputation and business operations.**

In August 2016, income tax authorities conducted searches at certain branches, Registered Office of our Company, the residence of certain of our Promoters, Directors, Key Managerial Personnel and business consultant along with the offices of certain of our Group Companies. These searches were conducted in relation to proceeds from the gold auctions conducted by our Company. During the search, certain cash were seized by the income tax authorities and certain lockers were sealed. While, our Company has not received any subsequent notice or been subject to any follow-up action by the authorities in relation to the searches and as such the operations of our Company has largely been unaffected, there can be no assurance that similar searches will not be conducted by the authorities in the future. In case of any action taken by the authorities against our Company, resulting out of such searches, our business, reputation and operations could be adversely affected.

- 24. One of our Group Companies is in receipt of a letter dated January 13, 2020 from the Registrar of Companies, Kerala & Lakshadweep ("RoC") in relation to an ongoing investigation. Any adverse findings by the RoC in this regard, could have a detrimental impact on the reputation of our Group, our common Promoters and Directors.**

Mini Muthoottu Nidhi Kerala Limited ("MMNL"), one of our Group Companies, received a letter dated January 13, 2020 from the RoC ("Letter"), in relation to an investigation conducted under Section 210 (1)(a) and 210 (1)(c) of the Companies Act ("Investigation"). In this regard the Central Government has appointed the RoC, along with Deputy Official Liquidator, Kerala and the Deputy Registrar of Companies, Kerala as inspectors ("Inspecting Officers"). Vide the Letter, the Inspecting Officers have sought certain information and documents from MMNL. MMNL, vide its letter dated January 28, 2020, has submitted the requisite information and documents along with undertaking to submit certain other documents. Certain of our Promoters and Directors are also the promoters and directors of MMNL. In the event the Inspecting Officers, during the course of the Investigation, finding adversely against MMNL or any of its promoters or directors, such findings could have a detrimental impact on the reputation of our Group, and that of our common Promoters and Directors.

- 25. Our inability to open new branches at correct locations may adversely affect our business.**

Our business is dependent on our ability to service and support our customers from proximate locations and thereby giving our customers easy access to our services. Further, it is vital for us to be present in key locations for sourcing business as we depend on these branches to earn revenue. Thus, any inability on our part to open new branches at correct locations may adversely affect our business and results of operations.

- 26. Our branches are vulnerable to theft and burglary. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer and this may result in adverse effect on our financial condition and results of operations.**

Storage of pledged gold jewellery as part of our business entails the risk of theft/burglary and resulting loss to our reputation and business. The short tenure of the loans advanced by us and our practice of processing loan repayments within short timelines require us to store pledged gold on our premises at all points in time. Some of our branches have had instances of burglaries in the past. With regard to all cases of theft/burglaries, we may not be able to recover the entire amount of the loss suffered and may receive only a partial payment of the insurance claim. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer. Further, the actual recovery of the insured amount from the insurer requires the undertaking of certain procedures, and any delay in recovery could adversely affect our reputation and results of operation.

- 27. We are subject to the risk of fraud by our employees and customers. Our lending operations involve significant amounts of cash collection which may be susceptible to loss or misappropriation or fraud by our employees. Specifically, employees operating in remote areas may be susceptible to criminal elements which may adversely affect our business, operations and ability to recruit and retain employees.**

We are exposed to the risk of fraud and other misconduct by employees and customers. While we carefully recruit all of our employees and screen all our employees who are responsible for disbursement of gold loans

and custody of gold, there could be instances of fraud with respect to gold loans and cash related misappropriation by our employees. We are required to report cases of internal fraud to the RBI, which may take appropriate action. We have also filed police complaints alleging fraud and misappropriation of gold by our employees in the past. We cannot guarantee you that such acts of fraud will not be committed in the future, and any such occurrence of fraud would adversely affect our reputation, business and results of operations.

Our lending and collection operations involve handling of significant amounts of cash, including collections of instalment repayments in cash which is the norm in the finance industry. Large amounts of cash collection expose us to the risk of loss, fraud, misappropriation or unauthorised transactions by our employees responsible for dealing with such cash collections. While we obtain insurance, coverage including fidelity coverage and coverage for cash in safes and in transit and undertake various measures to detect and prevent any unauthorised transactions, fraud or misappropriation by our employees, these measures may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our business operations and financial condition. In addition, we may be subject to regulatory or other proceedings in connection with any such unauthorised transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance.

Further, our employees operating in remote areas may be particularly susceptible to criminal elements as they are involved in cash collection and transportation due to lack of local banking facilities. In the event of any such adverse incident our ability to continue our operations in such areas will be adversely affected and our employee recruitment and retention efforts may be affected, thereby affecting our expansion plans. In addition, if we determine that certain areas of India pose a significantly higher risk of crime or political strife and instability, our ability to operate in such areas will be adversely affected.

28. *We are subject to the risk of unknowingly receiving stolen goods as collateral from customers which may result in loss of collateral for the loan disbursed.*

We have in place a policy in place to satisfy ownership of the gold jewellery and have taken adequate steps to ensure that the KYC guidelines stipulated by RBI are followed and due diligence of the customer is undertaken prior to the disbursement of loans. However, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse is generally available to our Company in the event of such seizure, except the recovery of the loss from the customer. Any seizure of the gold ornaments by the authorities shall result in us losing the collateral for the loan disbursed and could adversely affect our reputation, business and results of operations.

29. *Our insurance may not be adequate to protect us against all potential losses to which we may be subjected to and if we were to incur a significant liability for which we were not fully insured, it could adversely affect our business, results of operations and financial conditions.*

We maintain insurance cover for our gold stock and cash with our branches, and cash in transit, against theft, loss or damage by fire as well as against natural calamities including earthquake and floods. As on December 31, 2019, our Company has a total insurance cover of ₹2,04,000 lakhs. While we exercise due care in taking out adequate cover, given the nature of fluctuating gold prices, the amount of our insurance coverage may be less than the replacement cost of all covered property and may not be sufficient to cover all financial losses that we may suffer should a risk materialise. There are many events that could significantly affect our operations, or expose us to third party liabilities, for which we may not be adequately insured. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our business, results of operations and financial condition.

30. *We may experience difficulties in expanding our business into additional geographical markets in India, which may adversely affect our business prospects, financial conditions and results of operations.*

While the gold loans markets in the south Indian states of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh and Telangana remains and is expected to remain our primary strategic focus, we also evaluate attractive growth opportunities in other regions in India and have expanded our operations in the northern and western states of India. We may not be able to leverage our experience in the states that we are present in to expand our operations in other regions, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, customer attitude, sentimental

attachments towards gold jewellery, behaviour and preferences in these cities where we may plan to expand our operations may differ from those in south Indian states of Kerala, Tamil Nadu, Andhra Pradesh, Telangana and Karnataka and our experience in these states of Kerala, Tamil Nadu, Andhra Pradesh, Telangana and Karnataka may not provide us with benefits in other geographies. In addition, as we enter new markets and geographical areas, we are likely to compete not only with other large banks and financial institutions in the gold loan business, but also the local unorganised or semi-organised lenders, who are more familiar with local conditions, business practices and customs, have stronger relationships with customers and may have a more established brand name within local communities.

If we plan to further expand our geographical footprint, our business may be exposed to various additional challenges, including obtaining necessary governmental approvals, identifying and collaborating with local business partners with whom we may have no previous working relationship; successfully gauging market conditions in new markets; attracting potential customers; being susceptible to local laws in new geographical areas of India; and adapting our marketing strategy and operations to suit regions where different languages are spoken. Our inability to expand our current operations in additional geographical markets may adversely affect our growth, business prospects, financial conditions and results of operations.

31. *We are not in compliance with the RBI Master Directions – Information Technology Framework for the NBFC Sector.*

RBI vide its master direction bearing reference no. DNBS.PPD. No.04/66.15.001/2016-17 dated June 8, 2017, issued the IT framework for the NBFCs (“**Framework**”). RBI in its annual review has, in the past, observed non-compliance by our Company with the requirements of the Framework. Per a GAP analysis exercise carried out by our Company, the major gaps in compliance, included, migration of IPV6 platform, digital signatures, sharing of information on cyber security incidents with RBI, MIS for supervisory requirements, business continuity policy, etc. According to the Framework, RBI had directed NBFCs-Systemically Important to take necessary actions to be in compliance with the Framework by June 30, 2018. However, due to factors not within the control of our Company, we have not been able to comply with the requirements of the Framework. While we strive towards complying with all guidelines/directions issued by the RBI, in case the RBI decides to take an adverse action/levy penalty against our Company, it could have a material adverse effect on our business and results of operation.

32. *System failures or inadequacy and security breaches in computer systems may adversely affect our operations and result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.*

We are vulnerable to risks arising from the failure of employees to adhere to approved procedures, failures of security systems, computer system disruptions, communication systems failure and data interception during transmission through external communication channels and networks. Failure to prevent or detect such breaches in security or data and communications errors may adversely affect our operations.

Despite our internal controls, policies and procedures, certain matters such as fraud and embezzlement cannot be eliminated entirely given the cash nature of our business. If we fail to maintain and continue to enhance our internal controls, policies and systems, we may be unable to prevent fraud, security breaches or system failures.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services. If any of these systems do not operate properly or are disabled, or if there are other shortcomings or failures in our internal processes or systems, financial loss, disruption of our business, regulatory intervention or damage to our reputation may result. In addition, our ability to conduct business may be adversely affected by a disruption in the infrastructure that supports our businesses and the localities in which we are located. Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Constant connectivity between our branches across India and our Corporate Office is key to the functioning of our business. Each of our branches accesses the corporate data centre through the Internet, and all data is stored centrally in the

corporate data centre. Our disaster recovery system is fully operational and we continue to engage in technical exercises to test and improve our disaster plan.

33. *Our ability to access capital also depends on our credit ratings. Any downgrade in our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, would negatively affect our net interest margin and our business.*

The cost and availability of capital is also dependent on our short term and long term credit ratings. India Ratings & Research Private Limited vide their rationale dated August 8, 2019 have rated our bank loans of ₹50,000 lakhs as 'IND BBB-;Stable'. Further, our Company has received rating of 'CARE BBB-; Stable' (Triple B Minus; Outlook: Stable) by CARE vide its letter dated March 12, 2020 for the NCDs proposed to be issued pursuant to this Issue for an amount of up to ₹20,000 lakhs. Ratings reflect a rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any downgrade of our credit ratings would increase borrowing costs and constrain our access to debt and bank lending markets and, as a result, would adversely affect our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement of financing arrangements. For details regarding ratings received by our Company, please refer to "Our Business - Our Borrowings and Credit Ratings" on page 100 and "Annexure IP" on page 236.

34. *We are subjected to supervision and regulation by the RBI as a systemically important NBFC, and changes in RBI's regulations governing us could adversely affect our business.*

We are subject to the RBI's guidelines on financial regulation of NBFCs, including capital adequacy, exposure and other prudential norms. The RBI also regulates the credit flow by banks to NBFCs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. The RBI's regulations of NBFCs could change in the future which may require us to restructure our activities, incur additional cost or could otherwise adversely affect our business and our financial performance. Through the Master Directions, RBI has amended the regulatory framework governing NBFCs to address concerns pertaining to risks, regulatory gaps and arbitrage arising from differential regulations and aims to harmonise and simplify regulations to facilitate a smoother compliance culture among NBFCs.

Moreover, under the amendment, the threshold for defining systemic significance for NBFCs-ND has been revised in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakhs and above as per the last audited balance sheet. Moreover, as per the requirements of the Master Directions, all NBFCs-ND with assets of ₹50,000 lakhs and above, irrespective of whether they have accessed public funds or not, shall comply with prudential requirements as applicable to NBFCs-ND-SI. We cannot assure you that the Master Directions and its applicability to us will not have a material and adverse effect on our future financial conditions and results of operations.

Even though the RBI, has not provided for any restriction on interest rates that can be charged by non-deposit taking NBFCs, there can be no assurance that the RBI and/or the Government will not implement regulations or policies, including policies or regulations or legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls, or otherwise take action, that could have an adverse effect on non-deposit taking NBFCs. In addition, there can be no assurance that any changes in the laws and regulations relative to the Indian financial services industry will not adversely impact our business.

35. *We may be subject to regulations in respect of provisioning for non-performing assets. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.*

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. These provisioning requirements may require us to reserve lower amounts than the provisioning requirements applicable to financial institutions and banks in other countries. The provisioning requirements may also require the exercise of subjective judgments of management. The RBI vide the Master Directions provides for the regulatory framework governing NBFCs pertaining to provisioning for standard assets. The requirement to make a provision for standard assets over a period of three years, i.e., 0.30% by the end of March 2016, 0.35% by the end of March 2017 and 0.40% by the end of March 2018 and thereafter, of the outstanding.

There are multiple factors that affect the level of NPAs in our Company. Prominent among them are fall in value of gold, increase in the LTV ratio for gold loan etc.

The level of our provisions may not be adequate to cover further increases in the amount of our nonperforming assets or a decrease in the value of the underlying gold collateral. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, or if we are required to increase our provisions, this could have an adverse effect on our financial condition, liquidity and results of operations and may require us to raise additional capital.

36. *Microfinance loans are unsecured and are susceptible to certain operational and credit risks which may result in increased levels of NPAs.*

As of September 30, 2019, our microfinance AUM was ₹4,346.01 lakhs, representing 2.61% of our aggregate AUM as of such date. Our microfinance customers typically belong to the economically weaker sections and are diverse in nature, which include customers involved in income generating business activities, with limited sources of income, savings and credit records, and are therefore unable to provide us with any collateral or security for their loans. Such customers are at times unable to or may not provide us with accurate information about themselves which is required by us in connection with loans.

In our microfinance business, we rely on non-traditional guarantee mechanisms rather than any tangible assets as security collateral. Our microfinance business involves a joint liability mechanism whereby borrowers form a joint liability group and provide guarantees for loans obtained by each member of such group. There can however be no assurance that such joint liability arrangements will ensure repayment by the other members of the joint liability group in the event of default by any one of them. Such joint liability arrangements are likely to fail if there is no meaningful personal relationship or bond among members of such group, if inadequate risk management procedures have been employed to verify the group members and their ability to repay such loans, or as a result of adverse external factors such as natural calamities and forced migration.

As a result, our micro finance customers potentially present a higher risk of loss in case of a credit default compared to that of customers in other asset-backed financing products. In addition, repayment of microfinance loans are susceptible to various political and social risks, including any adverse publicity relating to the microfinance sector accessing capital markets, public criticism of the microfinance sector, the introduction of a stringent regulatory regime, and/or religious beliefs relating to loans and interest payments, which adversely affect repayment by our customers and may have a material and adverse effect on our business prospects and future financial performance.

There can be no assurance that we will be able to maintain our current levels of NPAs. In addition, it is difficult to accurately predict credit losses, and there can be no assurance that our monitoring and risk management procedures will succeed in effectively predicting such losses or that our loan loss reserves will be sufficient to cover any such actual losses. As a result of the uncertain financial and social circumstances of our microfinance customers and the higher risks associated with lending to such customers, we may experience increased levels of NPAs and we may be required to make related provisions and write-offs that could have a material and adverse effect on our business prospects and financial performance.

37. *Our microfinance business involves transactions with relatively high-risk borrowers that typically do not have access to formal banking channels, and high levels of customer defaults could adversely affect our business, results of operations and financial condition.*

Our microfinance business involves lending money to smaller, relatively low-income women entrepreneurs who have limited access or no access to formal banking channels, and therefore may not have any credit history and as a result we are more vulnerable to customer default risks including default or delay in repayment of principal or interest on our loans.

Some of our customers, especially the first-time borrowers, may not have any documented credit history, may have limited formal education, and are able to furnish very limited information for us to be able to assess their creditworthiness accurately. Consequently, we may not have past data on the customer's borrowing behaviour. In addition, we may not receive updated information regarding any change in the financial condition of our customers or may receive inaccurate or incomplete information as a result of any fraudulent misrepresentation on the part of our customers. It is therefore difficult to carry out credit risk analysis on our clients. Although we believe that our risk management controls are stringently applied, there can be

no assurance that they will be sufficient or that additional risk management strategies for our customers will not be required.

Further, our customers may default on their obligations as a result of various factors including bankruptcy, lack of liquidity and / or failure of the business or commercial venture in relation to which such borrowings were sanctioned. Although our microfinance business operates through a system of joint liability, we may still be exposed to defaults in payment, which we may not be able to recover in full. If our borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

38. *Our ability to borrow from various banks may be restricted on account of guidelines issued by the RBI imposing restrictions on banks in relation to their exposure to NBFCs. Any limitation on our ability to borrow from such banks may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.*

Under RBI Master Circular DBR.BP.BC.No.5/21.04.172/2015-16 on bank finance to NBFCs issued on July 1, 2015, the exposure (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC engaged in lending against collateral of gold jewellery (i.e. such loans comprising 50% or more of its financial assets) should not exceed 7.5%, of its capital funds. Banks may, however, assume exposures on a single NBFC up to 12.5%, of their capital funds, provided the exposure in excess of 7.5% is on account of funds on-lent by the NBFC to the infrastructure sector. Further, banks may also consider fixing internal limits for their aggregate exposure to all NBFCs put together and should include internal sub-limit to all NBFCs providing Gold Loans (i.e. such loans comprising 50% or more of their financial assets), including us. This limits the exposure that banks may have on NBFCs such as us, which may restrict our ability to borrow from such banks and may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.

39. *Attrition rate in our business is quite high and in order to be successful, we must attract, retain and motivate key employees, and failure to do so could adversely affect our business. Failure to hire key executives or employees could have a significant impact on our operations.*

In order to be successful, we are required to attract, train, motivate and retain highly skilled employees, especially branch managers and gold assessment technical personnel. If we cannot hire additional personnel or retain existing qualified personnel, our ability to expand our business will be impaired and our revenue could decline. Hiring and retaining qualified and skilled managers and sales representatives are critical to our future, and competition for experienced employees in the gold loan industry can be intense. In addition, we may not be able to hire and retain enough skilled and experienced employees to replace those who leave, or may not be able to re-deploy and retain our employees to keep pace with continuing changes in technology, evolving standards and changing customer preferences. The failure to hire key executives or employees could have a significant impact on our operations.

40. *We have entered into certain transactions with related parties. Any transaction with related parties may involve conflicts of interest.*

We have entered into transactions with several related parties, including our Promoters, Directors and related entities. We can give no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. The transactions we have entered into and any future transactions with our related parties have involved or could potentially involve conflicts of interest.

For details regarding our related party transactions entered into by us as on March 31, 2019, please refer to “*Related Party Transactions*” on page 114.

41. *Our Promoters, Directors and related entities have interests in a number of entities, which are in businesses similar to ours and this may result in potential conflicts of interest with us.*

Certain decisions concerning our operations or financial structure may present conflicts of interest among our Promoters, other Shareholders, Directors, and other related entities. Our Promoters, Directors and related entities have interests in the following entities that are engaged in businesses similar to ours:

1. Mini Muthoottu Nidhi (Kerala) Limited;
2. Cochin Mini Muthoottu Nidhi Limited; and
3. Muthoottu Mini Nidhi Limited

Commercial transactions in the future between us and related parties could result in conflicting interests. A conflict of interest may occur directly or indirectly between our business and the business of our Promoters which could have an adverse effect on our operations. Conflicts of interest may also arise out of common business objectives shared by us, our Promoters, Directors and their related entities. Our Promoters, Directors and their related entities may compete with us and have no obligation to direct any opportunities to us. There can be no assurance that these or other conflicts of interest will be resolved in an impartial manner.

42. *We are required to comply with the requirements of certain labour laws which may impose additional costs on us.*

Our branches are required to be registered under the relevant shops and establishments laws and verifications under Standards of Weights and Measures Act, 1976 of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays, leave and overtime compensation. If we fail to obtain or retain any of these approvals, exemptions or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any conditions, our certificate of registration may be suspended or cancelled and we may not be able to carry on such activities.

In addition, our employees are required to be registered under the provisions of certain labour laws such as the Employees' State Insurance Act, 1948, the Payment of Gratuity Act, 1972 the Kerala Shops and Commercial Establishments Act, 1960, the Kerala Labour Welfare Fund Act, 1975, and the Employees Provident Fund and Miscellaneous Provisions Act, 1952. We are also required to maintain certain records under the provisions of these laws, which add to our costs. If we are subject to penalties under these labour laws or if we do not obtain the requisite approvals, our business, financial condition and results of operations may be adversely affected.

43. *Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.*

NBFCs in India are subject to strict regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as a NBFC with the RBI, we are required to maintain certain statutory and regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure on our part to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

In addition, our branches are required to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities.

- 44. All our branch premises, except 14 branches, are acquired on lease. Any termination of arrangements for lease of our branches or our failure to renew the same in a favourable, timely manner, could adversely affect our business and results of operations.**

As on December 31, 2019, we had 779 branches in nine states and one union territory. Except 14 branches which are owned by us, the remaining are located on leased premises. If any of the owners of these premises does not renew an agreement under which we occupy the premises, attempts to evict us or seeks to renew an agreement on terms and conditions non-acceptable to us, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

Further, some of our lease deeds for our properties may not be registered and further some of our lease deeds may not be adequately stamped and consequently, may not be accepted as evidence in a court of law and we may be required to pay penalties for inadequate stamp duty. Further, we may not be able to assess or identify all risks and liabilities associated with any properties, such as faulty or disputed title, unregistered encumbrances or adverse possession rights, improperly executed, unregistered or insufficiently stamped instruments, or other defects that we may not be aware of.

- 45. We have ventured into new business areas and the sustainability, effective management and failure of growth strategy could adversely affect our business and result of operations.**

We have entered new businesses as part of our growth strategy. For example, we have entered into corporate agency agreements with insurance companies, to act as their corporate agent for soliciting or procuring insurance business. We have also entered into agreements for money transfer business including with certain money transfer companies to act in the capacity of their sub-representative to offer money transfer services. Our Company has also entered into an agreement with a tour and travel company to act as its sub-agent, to provide travel related activities. Additionally, our Company has also started microfinancing business in Fiscal 2017.

We have little or no operating experience with such businesses, and you should consider the risks and difficulties we may encounter by entering into new lines of business. New businesses may require capital investments and commitments of time from our senior management, and there often is little or no prospect of earnings in a new business for several years. Moreover, there is no assurance any new business we develop or enter will commence in accordance with our timelines, if at all, which could result in additional costs and time commitments from our senior management. There also can be no assurance that our management will be able to develop the skills necessary to successfully manage these new business areas. Our inability to effectively manage any of the above issues could materially and adversely affect our business and impact our future financial performance.

- 46. We rely significantly on our management team, our Key Managerial Personnel and our ability to attract and retain talent. Loss of any member from our management team or that of our Key Managerial Personnel may adversely affect our business and results of operation.**

We rely significantly on our core management team which oversees the operations, strategy and growth of our businesses. Our Key Managerial Personnel have been integral to our development. Our success is largely dependent on our management team which ensures the implementation of our strategy. If one or more members of our management team are unable or unwilling to continue in their present positions, they may be difficult to replace, and our business and results of operation may be adversely affected.

- 47. This Draft Prospectus includes certain unaudited financial information, which have been subjected to limited review, in relation to our Company. Reliance on such information, should accordingly, be limited.**

Moreover, our financial results for any given fiscal, including the six-month period ended September 30, 2019, may not be directly comparable with our financial results for any full fiscal or for any other fiscal.

48. *Certain of our records including in relation to share transfer to one of our Promoters/Directors are not traceable.*

Certain of our records in relation to filings under Companies Act and Board resolution related to the details of transfer of Equity Shares made to Mathew Muthoottu, one of our Promoters/Directors, are not traceable. Further, we have been unable to trace copies of the transfer deeds for such transfer of Equity Shares. We have relied on the records and registers available with the Company to provide the build-up of the Equity Shareholding of Mathew Muthoottu in our Company. While we continue to conduct a search for such records, we cannot assure you that such records will be available in the future or that we will not be subject to penalties which may be imposed by the RoC in this regard. We cannot assure you that such delays may not occur in the future, which may affect our results of operations and business prospects.

RISKS PERTAINING TO THIS ISSUE

49. *We face risks related to public health epidemics and pandemics in India and abroad.*

Our business could be materially and adversely affected by the outbreak of public health epidemics, or the fear of such an outbreak, in India or elsewhere. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and have confirmed cases of diseases such as the highly pathogenic, such as H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. Certain countries in Southeast Asia have reported cases of bird-to-human transmission of avian and swine influenza, resulting in numerous human deaths. The World Health Organization and other agencies have recently issued warnings on the COVID-19 virus and on a potential avian or swine influenza pandemic if there is sustained human-to-human transmission. While, on January 30, 2020, the World Health Organization declared the COVID-19 outbreak a health emergency of international concern, on March 11, 2020, the World Health Organization has categorised the COVID-19 virus outbreak as a pandemic. Further, certain state governments in India have also declared the outbreak of the COVID-19 virus to be an epidemic. Governments around the world have imposed a number of measures designed to contain the outbreak, including business closures, travel restrictions, quarantines and cancellations of gatherings and events. This in turn has impacted the operation of businesses, reduced regional travels and trade and lowered industrial production and consumption demand.

The COVID-19 outbreak is ongoing and the actual extent of the outbreak and its impact on the economy globally in general and in India, in particular remains uncertain and may turn severe. A worsening of the current outbreak of COVID-19 virus or future outbreaks of COVID-19 virus, avian or swine influenza or a similar contagious disease could adversely affect the Indian economy and economic activity in the region. If the outbreak of any of these epidemics or other severe epidemics, continues for an extended period, occurs again and/or increases in severity, it could have an adverse effect on economic activity worldwide, including India, and could materially and adversely affect our business, financial condition and results of operations and the trading price of the Equity Shares. Similarly, any other future public health epidemics or outbreak of avian or swine influenza or other contagious disease in India could also materially and adversely affect our business, financial condition, results of operations.

50. *Changes in interest rates may affect the price of our NCDs which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.*

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

- 51. You may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs. Failure or delay in recovering the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss.**

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors *inter alia* including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all.

Further, in case of NCDs, although our Company will create appropriate security in favour of the Debenture Trustee for the Debenture Holders on the assets, adequate to ensure 100.00% asset cover for the total value of the NCDs, which shall be free from any encumbrances, the realisable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. A failure or delay in recovering the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss. For further details see “*Outstanding Litigations*” on page 176.

- 52. There is no assurance that the NCDs issued pursuant to this Issue will be listed on BSE Limited in a timely manner, or at all.**

In accordance with Indian law and practice, permission for listing and trading of the NCD issued pursuant to this Issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issue of NCDs to be submitted. There could be a failure or delay in listing the NCDs in BSE.

- 53. There may be no active market for the NCDs on the retail debt market/capital market segment of the BSE. As a result, the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.**

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors *inter alia* including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares, (iii) the market for listed debt securities, (iv) general economic conditions, and, (v) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

- 54. Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders. In such a scenario, the Debenture Holders holding NCDs will rank *pari passu* with other secured creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company’s bankruptcy, winding up or liquidation**

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the Debenture Holders holding NCDs will rank *pari passu* with other creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company’s bankruptcy, winding up or liquidation.

- 55. Payments to be made on the NCDs are subordinated to certain taxes and other liabilities preferred by law. In the event of bankruptcy, liquidation or winding up, there may not be sufficient assets of our Company remaining, to pay amounts due on the NCDs.**

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company’s assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to the NCDs have been paid as per Section 327 of the Companies Act, 2013 or Section 53 of the Insolvency and Bankruptcy Code, 2016, as the case maybe. In

the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts, due on the NCDs.

56. *The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.*

We intend to use the proceeds of the Issue, after meeting the expenditures of and related to the Issue, for the purpose of onward lending and for repayment of interest and principal of existing loans and also for general corporate purposes. For further details, see “*Objects of the Issue*” at page 62. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the SEBI Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

57. *The liquidity for the NCDs in the secondary market is very low and it may remain so in the future and the price of the NCDs may be volatile.*

The Issue will be a new public issue of NCDs for our Company and the liquidity in NCDs at present is very low in the secondary market. Although an application has been made to list the NCDs on BSE, there can be no assurance that liquidity for the NCDs will improve, and if liquidity for the NCDs were to improve, there is no obligation on us to maintain the secondary market. The liquidity and market prices of the NCDs can be expected to vary with changes in market and economic conditions, our financial condition and prospects and other factors that generally influence market price of NCDs. Such fluctuations may significantly affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs.

58. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the NBFC and Gold Loan industry contained in this Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy as well as the gold loan industry have been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials, particularly since there is limited publicly available information specific to the Gold Loan industry. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics, the same have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 65. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

External Risk Factors

59. *Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.*

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks, NBFCs and HFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders’ funds and the market price of our NCDs.

60. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect our business and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, any deterioration in relations between India and its neighbouring countries might result in investor concern about stability in the region, which could adversely affect our business.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our NCDs.

61. Natural calamities could have a negative impact on the Indian economy, particularly the agriculture sector, and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. Further, prolonged spells of below normal rainfall or other natural calamities could have a negative impact on the Indian economy thereby, adversely affecting our business.

62. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, our ability to raise financing for onward lending and the price of our NCDs.

63. Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.

There is no assurance that the liberalisation policies of the government will continue in the future. Protests against privatization could slow down the pace of liberalisation and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current economic policies of the government may change at a later date. The pace of economic liberalisation could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalisation and deregulation policies could disrupt business and economic conditions in India and thereby affect our Company's business.

Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalisation policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies and taken initiatives that support continued economic liberalisation.

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

OVERVIEW OF GLOBAL ECONOMY

International Monetary Fund’s (IMF) World Economic Outlook (WEO) report of January 2020 projects global growth to rise from an estimated 2.9% in 2019 to 3.3% in 2020 and 3.4% for 2021—a downward revision of 0.1% point for 2019 and 2020 and 0.2% point for 2021 compared to those in the WEO October 2020 report. The downward revision primarily reflects negative surprises to economic activity in a few emerging market economies, notably India, which led to a reassessment of growth prospects over the next two years. In a few cases, this reassessment also reflects the impact of increased social unrest. An overview of the WEO outlook projections is given in the table below:

WEO Projections for Advanced Economies

Across advanced economies, growth is projected to stabilize at 1.6% in 2020–21 (0.1% point lower than in the October WEO for 2020, mostly due to downward revisions for the United States, Euro area and the United Kingdom, and downgrades to other advanced economies in Asia, notably Hong Kong SAR following protests).

WEO Projections for Emerging Market and Developing Economies

For the emerging market and developing economy group, growth is expected to increase to 4.4% in 2020 and 4.6% in 2021 (0.2% point lower for both years than in the October WEO) from an estimated 3.7% in 2019. The growth profile for the group reflects a combination of projected recovery from deep downturns for stressed and underperforming emerging market economies and an ongoing structural slowdown in China. India's growth is estimated at 4.8% in 2019, projected to improve to 5.8% in 2020 and 6.5% in 2021 (1.2 and 0.9 % point lower than in the October WEO), supported by monetary and fiscal stimulus as well as subdued oil prices.

Recent events having an impact on Global Economy

- Effects of Corona Virus on Global economy:** The coronavirus which started in the Chinese city of Wuhan has spread to more than 70 countries. Countries such as Iran, South Korea and Italy are now reporting faster infection rates than China. The slowdown in China's economy led to its manufacturing Purchasing Manager's Index (PMI) plunging to 37.5, its lowest reading since 2004. It implies a 2% reduction in its output on an annual basis (below 50 points is indicative of a contraction in an economy and one above 50 points to expansion). China, the world's 2nd biggest economy, is a key provider of components for many products including automobiles, mobile phones, medical equipment and clothing. Global trade is suffering and supply chains have taken a hit across sectors, with factories across China remaining idle or only partially operating as Beijing tries to curb the spread of the virus. For India, the trade impact is estimated to be the most for the chemicals sector, textiles and apparel, automotive sector, electrical machinery, leather products, metals and metal products and wood products. The World Bank along with the IMF are leading calls for a coordinated global monetary policy response to reduce the impact of the deadly outbreak that is threatening to derail the global economy's growth. The Organisation for Economic Co-operation and Development (OECD) revised down its estimate of global GDP growth by half a percentage point to 2.4% for 2020.
- Effects of falling Oil prices on Global economy:** Saudi Arabia slashed its export oil prices on 7th March 2020 in what is likely to be the start of a price war aimed at Russia but with potentially devastating repercussions for Russia's ally Venezuela, Saudi Arabia's enemy Iran, American oil companies and world

economies at large. The Saudi decision to cut prices was a move in retaliation for Russia's refusal to join the Organization of the Petroleum Exporting Countries (OPEC) in a large production cut as the coronavirus continues to slow the global economy. The effects were quickly felt, as the Brent Global Oil benchmark price collapsed from USD45/barrel to USD34/barrel, sharp drop of about USD11/barrel (approximately 25%) on late 8th March 2020 in the sharpest decline since at least 1991, and stock market tumbling in worldwide indices.

The collapse in oil prices will put extra pressure on the economies of all the major oil companies and producers. If prices remain at or below the current levels for any length of time there is potential for a wave of bankruptcies in the US energy sector, while economic woes and social unrest in countries like Iran, Iraq, Venezuela and Angola would intensify.

OVERVIEW OF INDIAN ECONOMY

India, the world's third largest economy in terms of its PPP (purchasing power parity) with population of over 1.3bn has witnessed significant economic growth since the country was liberalized in early 1990s. Industrial deregulation, divestment of state-owned enterprises, reduced governmental controls on foreign trade and investment, served to accelerate the country's growth and India has posted an average of 7.0% GDP growth since beginning of this millennium. According to IMF, India's GDP growth rate was at 6.8% in 2018. There is a downward revision to India's projection, where domestic demand has slowed more sharply than expected amid stress in the non-bank financial sector and a decline in credit growth. IMF estimates India's GDP growth at 4.8% in 2019, projected to improve to 5.8% in 2020 and 6.5% in 2021 supported by monetary and fiscal stimulus as well as subdued oil prices.

India Ratings and Research (Ind-Ra) expects gross domestic product (GDP) to grow at 5.5% y-o-y in FY21; however, the downside risks persist. This is a marginal improvement over the GDP growth of 5.0% estimated by National Statistical Office (NSO) for FY20.

FY20 had started on a fairly promising note; however as the year progressed, it turned out to be a year of significant downward revision. The slowdown is a combination of several factors of which the prominent ones are –

- (i) An abrupt and significant fall in the credit growth of non-banking financial companies close on the heels of a slowdown in bank lending
- (ii) Reduced income growth of households coupled with a fall in savings and higher leverage
- (iii) Inability of dispute resolution/judicial systems to quickly unlock the stuck capital.

These risks are going to persist, though some improvement in FY21 is expected. Economy is currently stuck in a phase of low consumption as well as low investment demand. A strong policy push coupled with some heavy lifting by the government is required to revive the domestic demand cycle and catapult the economy back into a high growth phase.

Ind-Ra expects fiscal deficit to come in at 3.4% of GDP in FY21. Immediately after the FY20 budget, Ind-Ra had stated that tax revenue growth of 11.1% assumed in the budget is optimistic in view of the growth slowdown and

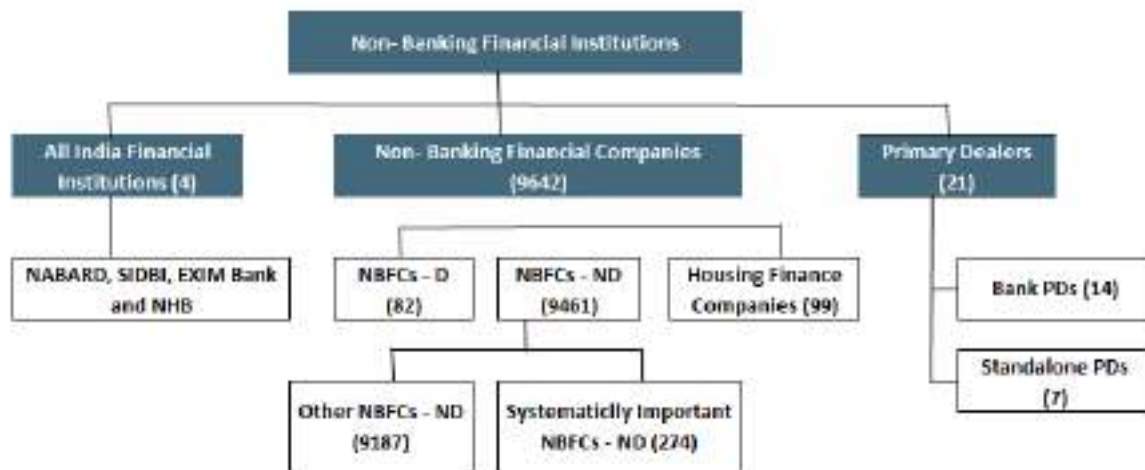

continued sluggishness in the goods and services tax collection and may fall short by INR1.5trn. Adding the reduction in corporate tax announced subsequently into the estimate, Ind-Ra believes tax revenue growth at best will be flat. This plus the expected shortfall in the non-tax revenue especially disinvestment receipts, the fiscal deficit of FY20 is estimated to slip to 3.6% of GDP even after accounting for the surplus transferred by the RBI.

OVERVIEW OF THE NBFC MARKET IN INDIA

Introduction

Non-banking Financial Institutions (NBFIs) form an integral part of the Indian financial system by complementing the banking sector in reaching out credit to the unbanked segments of society, especially to the micro, small and medium enterprises (MSMEs) which form the cradle of entrepreneurship and innovation.

Structure of NBFIs under the Reserve Bank Regulation (as at September 2019)

Notes: Figures in the bracket indicate the number of institutions

On the basis of liabilities, NBFCs are classified into two categories (i) NBFCs-Deposit taking (NBFCs-D) and (ii) NBFCs-Non-Deposit taking (NBFCs-ND). NBFCs-D are subject to requirements of capital adequacy, liquid assets maintenance, exposure norms (including restrictions on exposure to investments in land, building, and unquoted shares), Asset-liability management and reporting requirements. The NBFCs, depending upon its nature of business, are broadly categorized as loan companies, investment companies, infrastructure finance companies (IFC), asset finance companies (AFC), core investment companies (CIC), infrastructure debt funds, micro finance institutions. The regulatory and supervisory framework for NBFCs has been continuously strengthened in order to ensure their strong and healthy functioning, limit excessive risk-taking practices, and protect the interests of the deposit holders.

NBFCs are primarily governed by the RBI Act and the RBI Master Directions. NBFCs are permitted to operate in similar sphere of activities as banks; there are a few important and key differences. The most important distinctions are:

- An NBFC cannot accept deposits repayable on demand – in other words, NBFCs can only accept fixed term deposits. Thus, NBFCs are not permitted to issue negotiable instruments, such as cheques which are payable on demand; and
- NBFCs are not allowed to deal in foreign exchange, even if they specifically apply to the RBI for approval in this regard.

Further, while an NBFC may be registered as a deposit accepting NBFC (“NBFC-D”) or as a non-deposit accepting NBFC (“NBFC-ND”), NBFCs registered with RBI are further classified as:

- **Asset Finance Companies:** The main business of these companies is to finance the assets such as machines, automobiles, generators, material equipment.

- **Investment Companies:** The main business of these companies is to deal in securities.
- **Systemically Important Core Investment Company (CIC-ND-SI):** A systematically important NBFC (assets INR1.0bn and above) which has deployed at least 90% of its assets in the form of investment in shares or debt instruments or loans in group companies is called CIC-ND-SI. Out of the 90%, 60% should be invested in equity shares or those instruments which can be compulsorily converted into equity shares. Such companies do accept public funds.
- **Loan Companies:** The main business of such companies is to make loans and advances (not for assets but for other purposes such as working capital finance etc.).
- **Infrastructure Finance Companies (IFC):** A company which has net owned funds of at least INR3.0bn and has deployed 75% of its total assets in Infrastructure loans is called IFC provided it has credit rating of A or above and has a CRAR of 15%.
- **Infrastructure Debt Fund – NBFCs (IDF-NBFC):** An IDF-NBFC is a non-deposit taking NBFC that has Net Owned Fund of INR3.0bn or more and which invests only in Public Private Partnerships and post commencement operations date (COD) infrastructure projects which have completed at least one year of satisfactory commercial operation and becomes a party to a Tripartite Agreement.
- **NBFC - Micro Finance Institutions:** Microfinance companies are non-deposit taking firms that are entitled to provide loans up to INR50K to individuals coming under low-income group living in rural or semi-urban areas.
- **NBFC – Factors:** An NBFC-Factoring Company should have a minimum Net Owned Fund (NOF) of INR50.0mn and its financial assets in the factoring business should constitute at least 75 % of its total assets and its income derived from factoring business should not be less than 75 % of its gross income.
- **Mortgage Guarantee Companies:** Mortgage Guarantee Company acts as an insurance against defaults on loans by the homebuyer, thereby reducing the loan exposure and credit risks for the lender.
- **NBFC-Non-Operative Financial Holding Company (NOFHC):** For permitting promoter/ promoter groups of NBFCs to set up a new bank.

EVOLUTION OF GOLD LOAN MARKET IN INDIA

Introduction

Gold has long been a valued commodity, historically regarded as among the most liquid assets and accepted universally as a currency since time immemorial. In India, Gold has traditionally been consumed by individuals in the form of jewellery – it is considered auspicious to buy gold jewellery during festive seasons - and handed down generations as family wealth. Gold is considered to be a safe haven in times of economic uncertainty, a fact exemplified by almost a 450x time's rise in gold prices over the past five decades.

Gold Demand in India

India is one of the largest markets for gold and growing affluence is driving growth in demand. Gold has a central role in the country's culture, considered a store of value, a symbol of wealth and status and a fundamental part of many rituals. WGC in its 2019 report stated that, India's gold demand in volume terms declined to 690 tonnes in 2019 from 760 tonnes in 2018, out of which jewellery demand fell 9% to 544 tonnes from 598 tonnes, while bar and coins demand dropped 10% to 146 tonnes from 162 tonnes in 2018. In value terms, the country's gold demand rose 3% to INR21,77,700.0mn in 2019 from INR21,18,600.0mn in 2018. A spike in domestic gold prices and a hike in the import duty (from 10% to 12.5%) slashed demand during 2019. Two-thirds of India's gold demand came from rural areas, where jewellery is a traditional store of wealth. Continued monsoon till October 2019 damaged the summer sown crops, thus resulting in weak rural sentiments. India's gold demand is expected to rebound in 2020 as the government seeks to bolster consumer confidence and spending power to revive the economy. India's gold consumption in 2020 will likely be 700-800 tonnes as per WGC. The introduction of mandatory hallmarking for gold jewellery from 15th Jan 2021 may enhance consumer trust; however, there may be potential initial disruption. The chart given below depicts the trend of India's gold demand (in tonnes) from 2013-19.

Gold Price Movement in India

Gold prices in India have been showing an overall upward trend since the last 3 decades. There was a steady increase in the prices of gold from FY04 to FY13. From FY14 to FY16; there was a decline in gold prices owing to geopolitical stability, low oil prices, low inflation and strong growing equity market. During this period, gold lost its attractiveness to investors either from a capital appreciation perspective as a hedge against inflation or as a safe haven; causing a significantly reduced demand. However, from FY17 to FY19, gold prices started to surge to the pre-FY13 levels and is currently trading at INR44,150/- per 10 grams (as on 6th March 2020) which is its all-time high level. Currently, the rapid spread of coronavirus cases outside of China and its potential negative impact on the global economy are prompting investors to take refuge in safe havens like gold.

Gold Loan Market in India

Gold enjoys a unique connection with Indians in terms of social status, financial security and rich cultural legacy. Along with the country's growing population and ever increasing disposable income, India's inclination and liking for gold has also increased. Due to the emotional value associated with household jewellery, people are hesitant to sell their gold to meet their immediate financial needs; as an alternative, people pledge their gold ornaments as collateral and secure a short-term loan. The pledging of gold ornaments and other gold assets to local pawnbrokers and money lenders to avail loans has been prevalent in Indian society over ages. The increased holding of gold as an asset among large section of people, and the practices related to borrowing against gold in the informal sector, have encouraged some loan companies to provide loans against the collateral of used household gold jewellery. Over a period of time, many companies have emerged as 'specialised gold loan companies'.

Gradually, the market entered a period of rapid growth. The key factors that drove the rapid growth phase included low cost of funds (eligibility under Priority Sector Lending), rise of India’s middle class, consumerism and urbanization, rising gold prices, and high Loan to Value (LTV) of up to 85%. Convenience of access, quick disbursements and lower interest rates compared to moneylenders led to NBFCs becoming the customer’s de-facto choice.

In order to stabilize the proliferation and books of gold loan NBFCs, Reserve Bank of India (RBI) intervened and released certain guidelines:

- Removal of Priority Sector Lending (PSL) status. This immediately resulted in substantially higher borrowing cost.
- LTV capped at 60% - Weakened the competitive advantage against commercial banks, although RBI increased the LTV to 75% in 2014 to create a level competing field for banks and NBFCs.
- Restricted credit exposure to single gold NBFC to 7.5% from 10.0% resulting in lower bank funding.
- Prohibition of grant of loans against bullion and gold coins.

Meanwhile, from the beginning of 2013, gold prices reduced drastically globally. With the pledged gold having lower market value, customers walked away from the loans resulting in increased Non-Performing Assets (NPAs). The gold loan industry was also subsequently impacted by demonetization in 2016 when cash crunch in the market led to immediate shortfall in business. However, digital eco-system is now leading to increased credibility and tilting scales of gold loan business in favour of the specialized gold loan NBFCs. Alongside, the introduction of GST in 2017 has also impacted the market. In the pre-GST era, the taxation on gold was 1% excise duty, along with a VAT of 1-1.5%, totalling to 2% tax. GST rates on gold have now been pegged to 3%. This is in addition to an import duty of 12.5% and 5% GST on making charges.

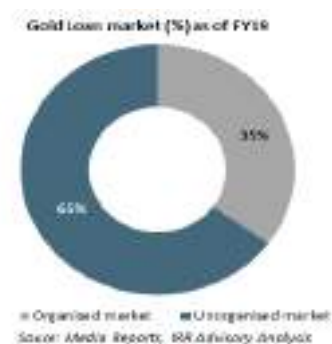

Most of the gold in India is held by people in rural market. Rural residents and low income groups are the major customers of gold loans, as gold is usually the only asset they possess, in some quantity. They also typically lack access to banking facilities. Thus gold loan has emerged as one of the most reliable credit sources for these categories of customers. At a broader level, there are mainly two categories of gold loan providers:

- (i) Formal sector (Banks, NBFCs and cooperatives)
- (ii) Informal sector (local moneylenders).

Gold Loan NBFCs in India

Till the last century, most of the lending was in the unorganized sector through pawnbrokers and money lenders. However, this scenario has changed over the last two decades post India’s economic liberalization and financial sector reforms, and the organized sector has become more dominant. Buoyed by the spurt in gold prices during the last decade, organised lenders grew during the period FY09 to FY12. However, correction in gold prices in FY13, adverse regulatory scenario, restrictions on offering high LTV products, and increase in competition intensity has seen gold loan industry’s AUM stagnating. This is also reflected in the stagnating portfolio of gold loan NBFCs. The total gold loan industry AUM stood at INR8,370.0bn as on FY19, out of which approximately 35% accounted for organised market. As of FY19, India’s unorganised gold loan market is estimated to be around 65% of the total gold loan market. There are no official estimates available on the size of this market, which is characterised by the presence of numerous pawnbrokers, moneylenders and landlords operating at a local level. However, this market is believed to be almost double the size of organised gold loans market.

The demand for gold has a regional bias with southern Indian states accounting for around 40% of the annual demand. There is potential to expand gold loans market to the Northern and Western regions of India,

provided the branch network is expanded and the loans are available with ease and with flexible options. The prevalence of high level of rural indebtedness, easy availability of gold loans on extremely flexible terms, relative scarcity of personal and retail loans from the banks, and changing attitude of customers to gold loans will contribute to the growth in the gold loan AUM to newer regions.

Growth in Gold Loans market of Organized Players in the Last 5 Years

As per WGC 2019 report, the organized gold loan industry is around 35% and unorganized industry is around 65%. The total gold loan industry AUM stood at INR8,370.0bn as on FY19, out of which approximately 35% valuing INR2930.0bn accounted for organised market.

Source: Media Reports, IRR Advisory Analysis

NBFCs were marked by slowdown and weakening competitive positioning during FY12 and FY15 owing to withdrawal of eligibility for NBFCs under priority sector lending, RBI putting a ceiling on LTV ratio that could be given out by NBFCs at 60%, as against 75% for banks and RBI norms for conducting gold loan auctions. Industry reports state that Indian Gold loan market of organised players has increased at a CAGR of 7% from INR2203.6bn in FY15 to INR2,930.0bn in FY19 owing to increase in gold prices, good monsoon and favourable macroeconomic factors. During this period NBFCs' focused on improving the business per branch, undertook aggressive marketing and diversified into new regions.

Growth in Gold Loans market of NBFCs (Gold Loan) in the Last 5 Years

As per industry reports, the gold loan AUM of NBFCs grew at a CAGR of 10.0% between FY15 and FY19. NBFCs witnessed a decline in gold loan AUM between FY12 and FY14, as RBI's regulations curbed the performance as mentioned earlier. However, due to NBFCs flexible loan offerings and quicker disbursement time helped them to grow their gold loan AUM from INR499.5bn in FY15 to INR544.4bn in FY16.

Source: Media Reports, IRR Advisory Analysis

Gold Loan NBFCs AUM further grew by an impressive 9.3% over the next 2 years from INR544.4bn in FY16 to INR641.5bn in FY18 due geographic expansion, rise in gold prices and higher marketing expenditure undertaken

by players in order to improve product awareness and build brand identity. NBFCs and banks approach the gold loan market differently, which is reflected in their interest rates, ticket sizes and loan tenures.

NBFCs focus more single-mindedly on the gold loans business and have accordingly built their service offerings by investing significantly in manpower, systems, processes and branch expansion. This has helped them attract and serve more customers.

KEY GROWTH DRIVERS FOR GOLD LOAN

Gold financing companies form an integral part of the Indian financial system. It plays an important role in nation building and financial inclusion by complementing the banking sector in reaching out credit to the unbanked segments of society, especially to the MSMEs, which form the cradle of entrepreneurship and innovation. NBFCs' ground-level understanding of their customers profile and their credit needs gives them an edge, as does their ability to innovate and customise products as per their clients' needs. This makes them the perfect conduit for delivering credit to lower-income group people and MSMEs. Gold loan as a credit product is not a new phenomenon in the country; it is only in the recent past that Indians have started losing their inhibitions over pledging their family heirlooms to mainstream commercial lenders and leveraging multiple benefits, such as instant credit, flexible schemes, lower interest rates and minimal paperwork without the hassles of rigid credit appraisal. As banks and NBFCs offer gold loans at interest rates much lower than those of informal moneylenders; they have successfully targeted a new segment of customers who would have otherwise not taken a gold loan. The key growth drivers for gold loan are provided below:

Lack of Reach of Banking to Rural and Lower-Income Groups

In India, the reach of NBFCs in rural areas is comparatively higher than the banks. Due to which NBFCs have an advantage in terms of business revenue and larger base of customer over the banks. The traditional banking products are not accessible to rural and lower-income groups as those products are to relatively higher-income groups. A farmer, for example, earns his living based on harvests. If the farmer takes loan, his loan repayment ability would depend on factors outside his control: monsoon, harvest output and market prices. Credit scores would undermine one's effort to get normal loans during distress periods. This is the situation faced by a large portion of the Indian population engaged in farming and rural employment. Gold loans offer a viable solution in this situation since, gold loans are fully securitized, lenders have the option to recoup the full principle amount (in most cases) if the borrower defaults - hence, there is no need for extensive checks on borrower's previous repayment records. The relative ease in obtaining a loan approval has boosted the popularity of gold loans.

Expected Revival in Rural Consumption

WGC estimates that about 65% of the Indian household gold belongs to rural communities, who are the biggest purchasers of gold loan. Unpredictability of the rain and harvest season means farmers become cash-strapped frequently. For them, unlocking value of their household gold is the easiest way to meet their financial obligations. Consumption growth in rural India had outpaced urban spending by the widest margin in last decade, encouraged by relatively good rainfall and an increase in government spending on infrastructure. However, the year 2019 witnessed a slowdown in the rural market due to factors such as liquidity crunch, drop in gross domestic product (GDP), floods in several parts, weakened household spending, high food inflation due to spike in milk and onion prices impacted consumer wallet in rural regions. The rural consumption is expected to be back on high single digit growth in FY20, helped by factors including government spending in infra projects and increased rural spending. Additionally, the expected rise in consumerism in rural areas will lead to increased gold loans being taken for non-income generating purposes.

Changing Attitudes Towards Gold Loan

Few decades back, the gold loan was a high-cost affair, interest charged were around 35-50% (local moneylenders) but now organized players in the market (banks and NBFCs) offer the loan at 12-20% per annum. In recent, gold loan is becoming a word of mouth whether it is Tier1, Tier2 or Tier 3 cities – people are turning more towards depositing gold with banks and NBFCs because it is one of the easiest way to avail money. The overall process to avail gold loans has become more formal and transparent with an entry of organized financial players. Further, gold is a secured asset and there is no requirement of any additional collateral but however; to avail home loans & personal loans, one need to show income certificates, bank statements & income tax returns. One good thing about gold loan is that it can be used for any purpose so more and more people are migrating towards this loan. It is not only the rural communities who are willing to put household jewellery in the market – acceptance towards using family gold for financial needs is increasing in the relatively untapped urban market. Using gold loans to meet household exigencies is gaining popularity in Indian cities and metros.

Ease of Availability of Gold Loan

NBFCs offer very competitive gold loan schemes with a wide range of tenures, interest slabs and repayment options making it very attractive for the customer. Unlike the rigid products offered by traditional banks, gold

loan products are designed in a way that specifically meets the situation of the target customer segments. Disbursements are made within a quick time period after loan approval with a turnaround time (TAT) of around 10 minutes. A good number of loans do not have fixed Equated Monthly Instalment (EMI) facility - only the interest needs to be paid on a monthly basis while the principle should be paid at the end of the tenure. The ability to choose product features (repayment scheme, tenure) has facilitated increased gold loan penetration.

REGULATORY MEASURES IMPACTING THE GOLD LOAN MARKET IN INDIA

RBI Master Directions has prescribed that all NBFCs shall maintain a loan to value ratio not exceeding 75% for loans granted against the collateral of gold jewellery. NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) shall maintain a minimum Tier I capital of 12.0%. The RBI Master Directions have issued guidelines with regard to the following:

Appropriate Infrastructure for Storage of Gold Ornaments: A minimum level of physical infrastructure and facilities is available in each of the branches engaged in financing against gold jewellery including a safe deposit vault and appropriate security measures for operating the vault to ensure safety of the gold and borrower convenience. Existing NBFCs should review the arrangements in place at their branches and ensure that necessary infrastructure is put in place at the earliest. No new branches should be opened without suitable storage arrangements having been made thereat. No business of grant of loans against the security of gold can be transacted at places where there are no proper facilities for storage/security.

Prior Approval of RBI for Opening Branches in Excess of 1,000: It is mandatory for NBFC to obtain prior approval of the RBI to open branches exceeding 1,000. However NBFCs which already have more than 1,000 branches may approach the Bank for prior approval for any further branch expansion. Besides, no new branches will be allowed to be opened without the facilities for storage of gold jewellery and minimum security facilities for the pledged gold jewellery.

Standardization of Value of Gold in Arriving at the Loan to Value Ratio: For arriving at the value of gold jewellery accepted as collateral, it will have to be valued at the average of the closing price of 22 carat gold for the preceding 30 days as quoted by The Bombay Bullion Association Limited.

Verification of the Ownership of Gold: RBI has directed all NBFCs to put in place an explicit policy approved by their board of directors within their overall loan policy to verify ownership through a suitable document which is prepared to explain the manner in which ownership is determined, particularly in each case where the gold pledged at any one time or cumulatively on the loan outstanding is more than 20 grams.

Auction Process and Procedures: The following additional stipulations are made with respect to auctioning of pledged gold jewellery:

- The auction should be conducted in the same town or taluka in which the branch that has extended the loan is located.
- While auctioning the gold the NBFC should declare a reserve price for the pledged ornaments. The reserve price for the pledged ornaments should not be less than 85% of the previous 30 day average closing price of 22 carat gold as declared by India Bullion Association Ltd. formerly known as The Bombay Bullion Association Ltd. and value of the jewellery of lower purity in terms of carats should be proportionately reduced.
- It will be mandatory on the part of the NBFCs to provide full details of the value fetched in the auction and the outstanding dues adjusted and any amount over and above the loan outstanding should be payable to the borrower.
- NBFCs must disclose in their annual reports the details of the auctions conducted during the financial year including the number of loan accounts, outstanding amounts, value fetched and whether any of its sister concerns participated in the auction.

Other Instructions:

- NBFCs financing against the collateral of gold must insist on a copy of the PAN Card of the borrower for all transaction above INR0.5mn.

- High value loans of INR0.1mn and above must only be disbursed by cheque.
- Documentation across all branches must be standardized.
- NBFCs shall not issue misleading advertisements like claiming the availability of loans in a matter of 2-3 minutes.

Details of the key guidelines impacting the gold loan market in India are provided below:

Loan to Value Ratio (LTV)

LTV ratio describes the size of a loan which is taken out compared to the value of the asset securing the loan. Lenders and others use LTV's to determine how risky a loan is. A higher LTV ratio suggests more risk because the assets behind the loan are less likely to pay off the loan as the LTV ratio increases. The LTV ratio has been capped at 75% for both NBFCs and traditional banks providing gold loan services. RBI regulations state that - gold jewellery accepted as security/collateral will have to be valued at the average of the closing price of 22 carat gold for the preceding 30 days as quoted by the India Bullion and Jewellers Association Ltd. If the gold is of purity less than 22 carats, the collateral should be translated into 22 carat value and exact grams need to be valued. Loan against bullion, units of Exchange-Traded Fund (ETF) and units of gold mutual funds is not permitted. This standardisation and increased transparency of LTV calculations across the organised sector has meant healthy businesses for NBFCs.

Know Your Customer (KYC)

The RBI KYC directions are applicable to NBFCs and RBI has advised all NBFCs to adopt the same with suitable modifications depending upon the activity undertaken by them and ensure that a proper policy framework of anti-money laundering measures is put in place. The KYC policies are required to have certain key elements, including, customer acceptance policy, customer identification procedures, monitoring of transactions and risk management, diligence of client accounts opened by professional intermediaries, customer due diligence and diligence of accounts of politically exposed persons, adherence to RBI KYC directions and the exercise of due diligence by persons authorised by the NBFC, including its brokers and agents.

For verification purposes, a customer needs to submit the following: government issued identity proof (passport, PAN card, voter's ID or driving license, along with passport size photographs), address proof (either electricity bill, ration card or telephone bill) and signature proof. The NBFCs are now allowed to make use of e-KYC which uses Aadhaar card validation. The move towards e- KYCs is meant to reduce risk of fraud and forgery as well as improve application processing speeds.

Changes in classification of Non-Performing Asset

The RBI Master Directions require that every non-deposit taking NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- Standard Assets;
- Sub-Standard Assets;
- Doubtful Assets; and
- Loss Assets

Further, the class of assets referred to above shall not be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for an upgrade. A NBFCs-ND is required to make provisions against sub-standard assets, doubtful assets and loss assets in accordance with the Master Directions. In terms of the Master Directions, NBFCs-ND has to make the following provisions on their loan portfolio.

Asset Classification	Provisioning Policy
Standard Assets	0.4%
Sub-standard Assets	10.0%
Doubtful Assets	100.0% of unsecured portion + 20% - 50% of secured portion
Loss Assets	100.0% provided if not written off

The time frame for classification of NPAs for NBFCs has been brought on par with banks. RBI mandated from FY18; a loan is termed as an NPA if interest is not paid for 90 days (3 months). In 2016, the time period was 5 months, while it was 4 months in 2017. However, it should not be a cause for concern, since default is not an issue for a gold finance company, as the loan is fully secured. In case of non-payment, the gold finance company could simply auction off the gold underlying to recover the interest and principal.

Verification of Gold Ownership

RBI in January 2014 has directed all NBFCs should have Board approved policies in place to satisfy ownership of the gold jewellery and adequate steps be taken to ensure that the KYC guidelines stipulated by the RBI are followed and due diligence of the customer undertaken. Where the gold jewellery pledged by a borrower at any one time or cumulatively on loan outstanding is more than 20 grams, NBFCs must keep record of the verification of the ownership of the jewellery. Further, it is not necessary to produce original receipts to establish ownership. Instead, a suitable document may be prepared to explain how the ownership is determined. The method of establishing ownership should be laid down as a board approved policy.

Gold Monetisation Scheme (GMS)

The government in the late 1990s also tried to monetize the idle gold held by Indian households by bringing it into use for the industry and to reduce dependency on imports. Gold Deposit Scheme (GDS) was introduced in September 1999 to allow individuals to deposit gold at banks and receive interest in return. Further, the scheme was also exempt from capital gains, wealth and income tax. However, the minimum deposit of 500 grams was a huge deterrent for many individuals and households to avail this scheme. Between 1999 and 2015, only 15% of gold was mobilized reflecting the inefficiency of GDS structure. GDS was reintroduced in the Union Budget 2015 by Finance Minister Mr. Arun Jaitley in a new avatar - 'Gold Monetisation Scheme' with the minimum deposit size being reduced to 30 grams. This scheme offers an annual tax free-interest starting from 0.6% (Short-term: upto 3 years) to 2.5% (Long-term: upto 15 years).

The objective of GMS is to mobilize gold held by households and institutions of the country and facilitate its use for productive purposes, and in the long run, to reduce country's reliance on the import of gold. All Scheduled Commercial Banks excluding Regional Rural Banks are eligible to implement the scheme. It includes Revamped Gold Deposit Scheme (R-GDS) and Revamped Gold Metal Loan Scheme (R-GML). The minimum deposit at any one time is 30 grams of raw gold (bars, coins, jewellery excluding stones and other metals). There is no maximum limit for deposit under the scheme. Also, the interest earned on the gold deposit will be exempted from not only income tax but also capital gains tax. There are 2 schemes in GMS:

1. Short Term Bank Deposit (STBD)

STBDs have a lock-in-period are treated as bank's on-balance liability. The deposits will be made for a short period of 1-3 years (with a facility of roll over). Deposits can also be allowed for broken periods (e.g. 1 year 3 months; 2 years 4 months 5 days; etc.). The rate of interest payable in the case of deposits for maturities with broken periods shall be calculated as the sum of interest for the completed year plus interest for the number of remaining days at the rate of $D/360 \times \text{ARI}$. Where, ARI= Annual Rate of Interest, D= Number of Days.

2. Medium and Long Term Government Deposit (MLTGD)

The deposit under this category will be accepted by the designated banks on behalf of the Central Government. This deposit will not be reflected in the balance sheet of the designated banks. It will be the liability of Central Government and the designated banks will hold this gold deposit on behalf of Central Government until it is transferred to such person as may be determined by the Central Government. The Medium Term Government Deposit (MTGD) can be made for 5-7 years and Long Term Government Deposit (LTGD) for 12-15 years or for such period as may be decided by the Central Government from time to time. The rate of interest on such deposit

will be decided by Central Government and notified by RBI from time to time. The current rate of interest as notified by the Central Government is:

- (i) On medium term deposit – 2.25% p.a.
- (ii) On long term deposit – 2.50% p.a.

The periodicity of interest payment on these deposits is annual and shall be paid on 31st March every year. A depositor will have an option to receive payment of simple interest annually or cumulative interest at the time of maturity, in which case it will be compounded annually. This option shall be exercised at the time of deposit. Minimum lock-in period - MTGD is allowed to be withdrawn any time after 3 years and a LTGD after 5 years.

OUTLOOK OF THE GOLD LOAN MARKET IN INDIA

5 year outlook of the Gold Loan Market in India

India is one of the largest markets for gold and in our Indian culture gold is considered as auspicious, particularly in Hindu and Jain cultures and gold is worn for important ceremonies and occasions. Gifting gold is a deeply ingrained part of marriage rituals in Indian society where weddings generate approximately about 50% of annual gold demand. Rural residents and low income groups are the major customers of gold loans, as gold is usually the only asset they possess. Gold loan has emerged as one of the most reliable credit sources for these categories of customers. Further the gold loan market is still underpenetrated, considering the abundant availability of gold as collateral with Indian private households. This could play a vital role in the expansion of gold loan market. IRR Advisory has estimated that the organized market size will grow to INR4,780.0bn by FY24P.

With the credit demand expected to rise, the gold loan industry is expected to grow over the next few years at a CAGR of 10.0% from INR2,930.0bn in FY19 to INR4,780.0bn in FY24P which would be driven by gold loan NBFCs moving into Non-Southern Indian territories, improving penetration, improving product awareness and building brand identity. Diversification into other regional geographies and untapped markets would be the key for industry AUM to grow. Gold loan industry AUM projection of the organized players is provided below:

Organized players are adopting marketing initiatives to raise awareness against heavy interest rates charged by the unorganized players (which are in the range of 25-50%) especially in rural parts. Also, player's ability to leverage technology and improve their online gold disbursements could turn out to be a game changer. Along with these drivers, a favourable economic scenario will further drive up the funding needs of small businesses, and hence, improve demand for gold loans. Based on these growth drivers, we expect gold loan NBFCs' AUM to grow at 9.5% CAGR, from INR732.0bn in FY19P to INR1,150.0bn in FY24P. Indian NBFC's gold loan AUM projection for the coming 5 years is provided below:

Source: Media Reports, IRR Advisory Analysis

The overall organized NBFC’s gold loan penetration level is around 25-30%, which confirms that there is headroom for growth in this market. So, financial institutions with the right focus, operational capabilities, availability of funds, refreshing products and modern technology can capture a large market share.

Various factors affect the gold demand in India. The relationship between these factors is provided below:

Long Term Factors		Short Term Factors	
Rising Income	Gold Price Movement	Inflation	Excess Rainfall
It is anticipated that for a 1% increase in income, the demand for gold will rise by 1%	For a 1% increase in gold price, demand will decrease by 0.5%	For a 1% increase in inflation, demand rises by 2.6%	For a 1% increase in monsoon rainfall, gold demand rises by 0.5%

The arrival of new online gold loan products and digital models by various NBFCs and fintech players are expected to tap the gold loan market. These products offer gold loans at the client’s doorstep and complete the process without much hassle. More and more tech driven consumers are opting for these loans as these products have lower interest rates vis-à-vis its competing brick and mortar NBFCs.

Gold as a Hedge against Inflation, Fluctuation in Interest Rates and Rupee Devaluation

The Indian rupee has been depreciating against the US dollar over the past two months and touched a low of INR72.5 per US dollar on 4th March 2020. It is further expected to depreciate as investor sentiment remained fragile amid concerns over the impact of coronavirus outbreak. Higher inflation leads to increase in expenses and lesser savings thereby affecting personal finances. Higher inflation over a period can cause higher interest rates, thereby making loans expensive. A weak rupee against dollar affects any investment done abroad, foreign education and foreign travel. The inflationary pressures have led to interest rate hike by RBI which has already raised interest rates twice this year. A higher interest rate will lead to higher EMIs. For the investor of debt funds, rise in interest rates would bring down the bond prices and hence has a negative impact on the debt funds ‘net asset values’. As explained above, the rising exchange rates and the resulting inflationary pressures will have an impact on the value of the assets of the retail investors and hence it is imperative for the retail investors to invest in class of assets which are good inflation hedgers. Among all the class of assets, gold is considered as a best hedge against inflation and seen as an ideal asset for portfolio diversification.

The demand for gold rises whenever there is political chaos and gold is considered as safe haven. A significant reason why people invest in gold is that it has performed admirably in holding of value over the long-term in comparison to other assets like paper currency, some coins or even stocks. Thus gold can be used to protect purchasing power, reduce volatility and minimize losses during periods of market shock.

RBI is among the 10th largest holder of gold reserves among central banks globally, according to the latest WGC report with USA and Germany among the top holders. Ever since uncertainty over the dollar outlook mounted

after the US-China trade war concerns in 2018, central banks across the globe started buying gold to diversify their foreign exchange reserves base. RBI also started buying gold after a long gap (after Nov 2009). The surge in foreign inflow and low yield on overseas sovereign bonds may have led to RBI buy gold. As at end September 2019, the RBI held 618.17 tonnes of gold, with 325.87 tonnes being held overseas in safe custody with the Bank of England and the Bank for International Settlements, while the remaining gold is held domestically.

The RBI decision to buy gold is significant because unlike Central banks it does not regularly trade in gold although the law permits it do so. The RBI's decision to buy gold is probably a decision for diversification of assets for deployment keeping in mind the evolving global risks due to rising policy rates in the USA and increasing market volatility.

KEY CHALLENGES FACED BY THE GOLD LOAN INDUSTRY

Volatility in Gold prices

Volatility in the gold prices has impact on the performance of the gold loan market. As per World Bank - Commodity Markets Outlook, October 2019 the global prices of gold are expected to decline from USD1,338.0 per toz in 2019 to USD1,201.0 per toz in 2025P. Falling gold price is a negative as far as growth outlook of gold loan companies is concerned. They will have to lend lower amounts against the same quantity of gold, so this will pressurize AUMs. At the same time, costs remain fixed and it will pull down profitability. Also, as gold prices decline the resale value of gold also decline, this might lead that the borrower is not willing to repay the loan which would increase the number of NPAs. This would affect the operational efficiency and profitability of the industry.

Regulatory pressure

At present, every NBFCs-ND-SI is required to make a provision for standard assets at 0.4% of the outstanding. In March 2017, RBI stated that NBFCs cannot disburse more than INR20,000/- in cash against the gold loans. This RBI move is being seen as part of its go digital drive post demonetization. Also, the maximum limit for LTV for gold loans for NBFCs has been capped to 75% (earlier it was 60%) which is as same as that for traditional banks. For rapid business growth rate of NBFCs, RBI regulations aim at strengthening the loan repayment methods, tenure, storage and auction processes.

Security Threats and Risks of Theft

One of the principal risks in the operations of gold loan NBFCs are robbery and employee theft or fraud which needs to be safeguarded. To safeguard against theft or loss of collateralized gold NBFCs install safe vaults, in-house or outsourced storage model, electronic surveillance, internal and external audits and insurance.

Lack of financial literacy among rural customers

The customer segment living in remote areas is financially illiterate and till date they are under the impression that they are not eligible for any loans from the organized (banks, NBFCs, financial institutions) sector and they approach local moneylenders. This financial illiteracy among rural people is a factor that hampers the growth of market to a great extent.

Young Indians attraction to alternative jewellery

India is the largest consumer of gold in the world. From last few years the young population of India is more inclined towards high-end designer and gem-set jewellery with a preference to platinum and diamonds. This indicates buying patterns are shifting and the demand for plain gold jewellery is declining especially in the urban areas. As per industry reports, India is the world's fourth largest platinum market and customers have the assurance of buy-back similar to gold ornaments. In recent times, diamonds are also gaining equal popularity to gold as an investment option. Further, the Indian Commodity Exchange is offering a Systematic Investment Plan to acquire precious stones for retail buyers. Since, the last seven years, gold and platinum have appreciated by a similar extent. All these are indicators of slightly diminishing popularity of gold amongst the urban youth in urban markets.

Change in Savings Pattern

The youth are turning towards alternative options such as equity markets/mutual funds for wealth creation as against traditional method of buying gold. Also the percentage of discretionary spending is also rising day by day. These alternate investment options are gaining more traction.

Data Security

Protection of data is the most importance given to the rise of cyberattacks through malware and phishing targeted at the confidential client information. All the financial institutions need to make sure that sufficient attention is given to such challenges and a strong network and data infrastructure is in place which would be capable of preventing such attacks.

According to industry sources, cyber-crime is the third most reported fraud across the financial sector. The RBI directed that all NBFCs were required to have a board-approved information security policy with the following basic tenets:

- (a) Confidentiality - Ensuring access to sensitive data to authorized users only
- (b) Integrity - Ensuring accuracy and reliability of information by ensuring that there is no modification without authorization.
- (c) Availability - Ensuring that uninterrupted data is available to users when it is needed.
- (d) Authenticity - For information security it is necessary to ensure that the data, transactions, communications or documents (electronic or physical) are genuine.

OVERVIEW OF MICRO FINANCE INDUSTRY IN INDIA

Microfinance, which involves providing small loans to financially excluded rural market, is an important player to bridge the credit demand gap among the underserved lower income groups. The journey of financial inclusion in the past two decades has been one of intensive efforts and incremental experimentation. However, the quantum jump came when Pradhan Mantri Jan Dhan Yojana (PMJDY) was launched in 2014, which enabled achievement of the objective of providing bank accounts to adult population in almost every household. The reach of mobile phones and e-KYC has ensured these accounts are accessible to those who have been included in the financial services.

Number of negative events in the past have influenced growth as well as asset quality of the microfinance sector including – the AP crisis of October 2010, farm loan waivers by several states, demonetisation in November 2016, floods in some states, as well as recent economic slowdown. Despite these setbacks, the industry has evolved over the cycles and demonstrated resilience by adapting to changing dynamics. It is significant to note that both the number of institutions providing microfinance as also the quantum of credit made available to the financially excluded clients have increased significantly during the last decade. RBI has been making sustained efforts to increase the penetration of formal financial services in unbanked areas, while continuing with its policy of ensuring adequate flow of credit to productive sectors of the economy and also ensuring the availability of banking services to all sections of people in the country.

MFI consists of multiple players with diverse organizational structures. Loans in this sector are provided by banks, small finance banks (SFBs), non-banking financial company-microfinance institutions (NBFC-MFIs), other NBFCs and non-profit organizations. According to the Bharat Microfinance Report 2019 prepared by Sa-Dhan, MFIs operate in 29 States, 5 Union Territories and 570 districts in India. The MFIs are also expanding into newer territories for reducing their concentration risk. Industry reports state that Microfinance industry has total loan portfolio of INR1,785.5bn as on FY19 which represents a growth of 30% over the loan portfolio of INR1,366.3bn in FY18. The industry portfolio has grown at a CAGR of 28.2% during FY16 to FY19 period.

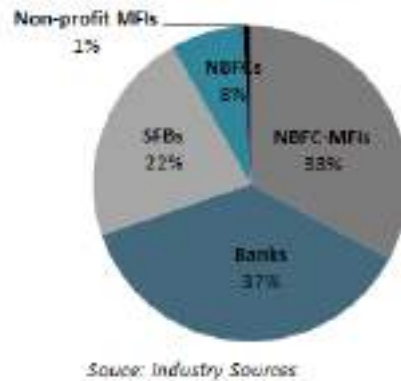

NBFC-MFIs hold the largest share of portfolio in micro-credit with total loan outstanding of INR681.6bn, which accounts for 38% of total industry portfolio. Banks are the second largest provider of micro-credit, with a loan amount outstanding of INR599.9bn, which includes both direct and indirect lending through BC partnerships, accounting for 34% of total micro-credit universe.

SFBs have a total loan amount outstanding of INR299.9bn, with total share of 17%. NBFCs account for 10% and Not-for-Profit MFIs account for 1% of the industry portfolio. The pie charts given below provide the % share by each player in the microfinance loan portfolio outstanding during FY18 and FY19.

Share of Various Lenders in Micro Finance Loan Portfolio Outstanding (FY19)

Share of Various Lenders in Micro Finance Loan Portfolio Outstanding (FY18)

Industry reports state that during FY19, Loan disbursement grew by 20% in terms of volume. Loan disbursed amount for FY19 is INR2,130.7bn, which has increased by 36% as compared to FY18. All India Average Ticket Size (ATS) as of FY19 is INR31,623.0 which had increased by 13% on Y-O-Y basis. ATS of bank loans is highest at INR42,086.0 whereas ATS of NBFC-MFIs is lowest at INR25,850. Highest number of loans in FY19 are disbursed in INR20,000.0 to INR30,000.0 ticket size category. In terms of regional distribution of portfolio; East and North East accounts for 40%, South accounts for 28%, North holds 10%, West has a share of 14% and Central contributes 7%. The Top 10 states constitute 82.7% in terms of the micro finance loan portfolio. Tamil Nadu is the largest state followed by West Bengal and Bihar.

Over the past years the GoI and the RBI has recognized the role played by MFIs in furthering government’s financial inclusion agenda. As a part of strengthening the MFI, the RBI appointed industry body Micro Finance Institutions Network (MFIN) as well as Sa-Dhan (an association of MFIN) as self-regulatory organizations (SROs) and bringing Credit Bureau for the tiny loan segments. There has been a tremendous improvement in the risk management practices of MFIs which is evident that the sector was able to tide over the effects of demonetization despite being the fact that MFIs transactions with its customers are mainly in cash as they cater to low income households with majority of them located in rural areas. NBFC-MFIs are increasingly adopting digital transactions and expecting disbursements and repayment to happen cashless. However their customers are illiterate and the adoption is low by the customers. Digitalization will happen only with the improvement in digital infrastructure and with a continuous engagement with their customers. This is possible as the MFI feet on the street model has been instrumental in building an extensive reach at the grass-root level thereby enabling MFI to

cater to the financial needs of the unbanked clients. RBI has also raised the household income limit for availing micro loans while enhanced the lending limit to INR1.25lakh per eligible borrower from INR1.0lakh earlier, creating more opportunity for MFIs to grow.

The NBFC-MFIs adhere to RBI guidelines to fix interest rates. As NBFC-MFIs are non-deposit taking entities they borrow funds from external sources to cater to the micro-credit requirements of their clients. The interest rates what NBFC-MFI are heavily dependent on the cost of funds that it borrows and RBI stipulations. Over the years the average cost of funds for MFI has come down and many of the MFI have started passing on the benefits of the reduction in the cost of funds to their clients by charging lower interest rate to their client. RBI set an average base rate of 9.18% for non-banking financial companies and micro finance institutions to be charged from their customers for the quarter beginning July 2019.

A significant portion of the Indian population still lacks access to credit from the formal sector and consequently borrows from informal channels like moneylenders or relatives, indicating the scope of micro lending in achieving financial inclusion and overall industry growth. The prospective for Microfinance, particularly in Semi-Urban and Rural geography is quite large in India and with NBFC-MFIs are stepping up to integrate best practices and technology which would help them provide better customer service as well as achieve operational efficiencies and lower costs.

Our Strengths

We feel that the following competitive strengths position us well for continued growth:

We are a non-deposit taking systemically important NBFC in the Gold Loan sector in South India with a long operating history and large customer base.

We are registered with RBI as a non-deposit taking, systemically important, NBFC (registration no. N-16.00175 dated April 13, 2002) under Section 45 IA of the Reserve Bank of India Act, 1934. Further, a fresh certificate of registration was issued by RBI on January 1, 2014, pursuant to the change of name of our Company from

‘Muthoottu Mini Financiers Private Limited’ to ‘Muthoottu Mini Financiers Limited’. We operate, since our incorporation, in the gold loan sector lending money against the pledge of household gold jewellery (“**Gold Loans**”) in the state of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh, Telangana, Haryana, Maharashtra, Delhi and Goa and the union territory of Puducherry. We believe that we have, over the years, been successful in expanding our brand name, as well as our customer base to different geographical locations in India. As on December 31, 2019, we have a network of 779 branches spread in the states of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh, Telangana, Haryana, Maharashtra, Delhi and Goa and the union territory of Puducherry. Our total number of Gold Loan accounts were 410,346 customer accounts as of December 31, 2019. We attribute our growth, in part, to our market penetration, particularly in areas which we believe are less served by organized lending institutions, which is reflected in the majority of our branches are located in rural and semi-urban areas as of December 31, 2019 and streamlined procedural formalities which our customers need to complete in order to complete a loan transaction with us, which we believe enables us to attract new and retain existing customers. We also attribute our growth to customer loyalty and believe that our customers return to us when they are in need of funds.

Flexible loan schemes and efficient customer service

We believe the growth in our Gold Loan portfolio is partly due to the flexible Gold Loan schemes that we offer to our customers and efficient customer service. Depending on the individual needs, we provide our customers multiple options with respect to the loan amount, advance rate per gram of gold and interest rate. We endeavour to provide our customers with a simple and transparent process to avail Gold Loans and other services with trained staff members at all our branch locations. We also endeavour to staff our branches with persons belonging to the same locality as our customers which enables us to know our customers and their specific requirements better and enables us to meet up to their expectations in an efficient manner. We believe that our technology support, skilled workforce and policies on internal processes enable us to achieve the above objective. Furthermore, since our Gold loans are all collateralized by gold jewellery, there are minimal documentary and credit assessment requirements, which shorten our turnaround time.

Our processes are developed at the Corporate Office level by professionals who have extensive experience in the areas of banking and financial services with supervision from our management. We believe that such well-defined processes and efficient technology platform, enables us to keep a better check over our entire branch network and helps us in detecting shortcomings.

Strong support system, including appraisal, internal audit and inventory control and safety systems

We believe that our ability to appraise the quality of the gold jewellery to be pledged in a short period of time is critical to our business. Assessing the gold jewellery quickly and accurately is a specialized skill that involves an assessment for gold content and quality manually without damaging the jewellery. We undertake the assessment activity in-house using tested methods of appraisal of gold.

Once the Gold Loan is made, we have a system in place for continuous monitoring of the pledged gold by internal audit and risk management teams. In accordance with our internal audit policy, all of our branches are subject to inspection for once in three months depending upon management perception of the risk associated with the branch. High value Gold Loans of ticket size of ₹5 lakh and above are subject to the prior approval of the Regional

Managers. The Regional Managers can approve Gold Loans to individual borrowers upto ₹25 lakhs, subject to strict compliance with quality as well as LTV criteria. Gold Loans to individual borrowers above the value of ₹25 lakhs shall be subject to the prior approval of the Regional Head Officer and the Gold Loans above of ₹50 lakhs shall be approved by the operations head at the Corporate Office with recommendation of the Regional head officer. At the time of conducting an inspection, a quality check on the inventory is also carried out, which involves physical security checks and checks on the quality of pledged gold. All our branches are fitted with strong rooms which are reinforced concrete cement structures built per industry standards and practices and fitted with security cameras to ensure high level of security.

Our workforce also consists of appraisers who are skilled in the evaluation of the worth and authenticity of the gold that is pledged with us.

Our Strategies

Our business strategy is designed to capitalize on our competitive strengths and enhance our leadership position in the Gold Loan industry and to expand our presence in micro finance loan segment. Key elements of our strategies include:

Further growth in Gold Loan business in rural and semi-urban markets to tap into the potentially large market for Gold Loans

Indian gold loan market expanded considerably in recent years. The recent developments in the gold loan market have both positive and negative implications. In a country, where loans are required to be raised for meeting some sudden medical exigency or an educational loan or a business loan by a small and medium enterprise owner, the gold loans extended by the NBFCs are very handy and flexible, though costlier than such loans disbursed by banks. At a time, when financial inclusion is a major policy goal, the services rendered by the gold loans NBFCs, which are a part of the organised loan market are contributing in a reasonable measure to cater to the borrowing requirements of a needy section of the society, gold is an idle asset in the hands of individuals and there is a huge unlocked economic value in the Indian economy, which is said to have anywhere between 18,000 to 20,000 tonnes of gold. Just a small fraction of about three percent of this idle gold stock is being used for raising gold loans, at present (*Source: RBI Report of the Working Group to study the issues related to gold imports and gold loan NBFCs in India Feb 2013*).

We intend to increase our presence in rural and semi-urban markets, where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not available in a timely manner at reasonable rates of interest, or at all. We believe we meet the expectation of a typical Gold Loan customer of high loan-to-value ratios, rapid and accurate appraisals, easy access, low levels of documentation, quick approval and disbursement and safekeeping of their pledged gold, and thus our focus is to expand our Gold Loan business. We believe that our brand is key to the growth of our business. We believe that we have built a recognizable brand in the rural and semi-urban markets of India, particularly in the southern states of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh and Telangana.

Diversifying our business into micro finance loan segment

We offer micro finance loans which are targeted to economically active, married women, having regular cash flow from certain income generating activities, including but not limited to, self-managed business, vegetable vendors and tailoring business. As on December 31, 2019, we are offering micro finance loan only through 61 branches in the state of Kerala. Going forward, we intend to increase the number of branches in Kerala and expand it to other southern states. As of September 30, 2019 and for the Financial Years ended March 31, 2019, March 31, 2018 and March 31, 2017, our micro finance loan represented 2.61%, 2.32%, 4.44% and 0.68% of our total assets under management as on that dates. We believe that our diverse revenue stream will reduce our dependence on any particular product line thus enabling us to spread and mitigate our risk exposure to any particular industry, business and geography or customer segment.

Undertaking new business initiatives to diversify our revenue stream by leveraging our branch network and customer base

Gold Loan and micro finance loan as on September 30, 2019 account for 97.31% and 2.61% of total loans of our Company, respectively. These contribute to over 98.13% of our total revenues, making us dependent on such income stream and interest on loans. With a view to diversify our incomes and be less dependent on interest alone, we continue to increase our revenue by broadening our fee based income by selling third party products. We currently provide services like money transfer, insurance, DP services, PAN card related services and travel agency services. Our Company has obtained registration with the IRDAI, to act as a corporate agent for procuring and soliciting insurance business both in the life insurance and general insurance category. The license no. CA0122 was assigned to our Company and is valid till March 31, 2022. Pursuant to such registration, we have entered into corporate agency agreements with various insurance providers of life, health and general insurance products for soliciting and procuring business for such insurance providers. We have also entered into agreements with securities provider for carrying out online trading in equity and derivative and commodity segments using our Depository Participant platform. Our Company intends to capitalise on the huge client base and large branch network, to offer these additional products and services.

Strengthening our risk management and technology systems to have an error less streamlined growth in business

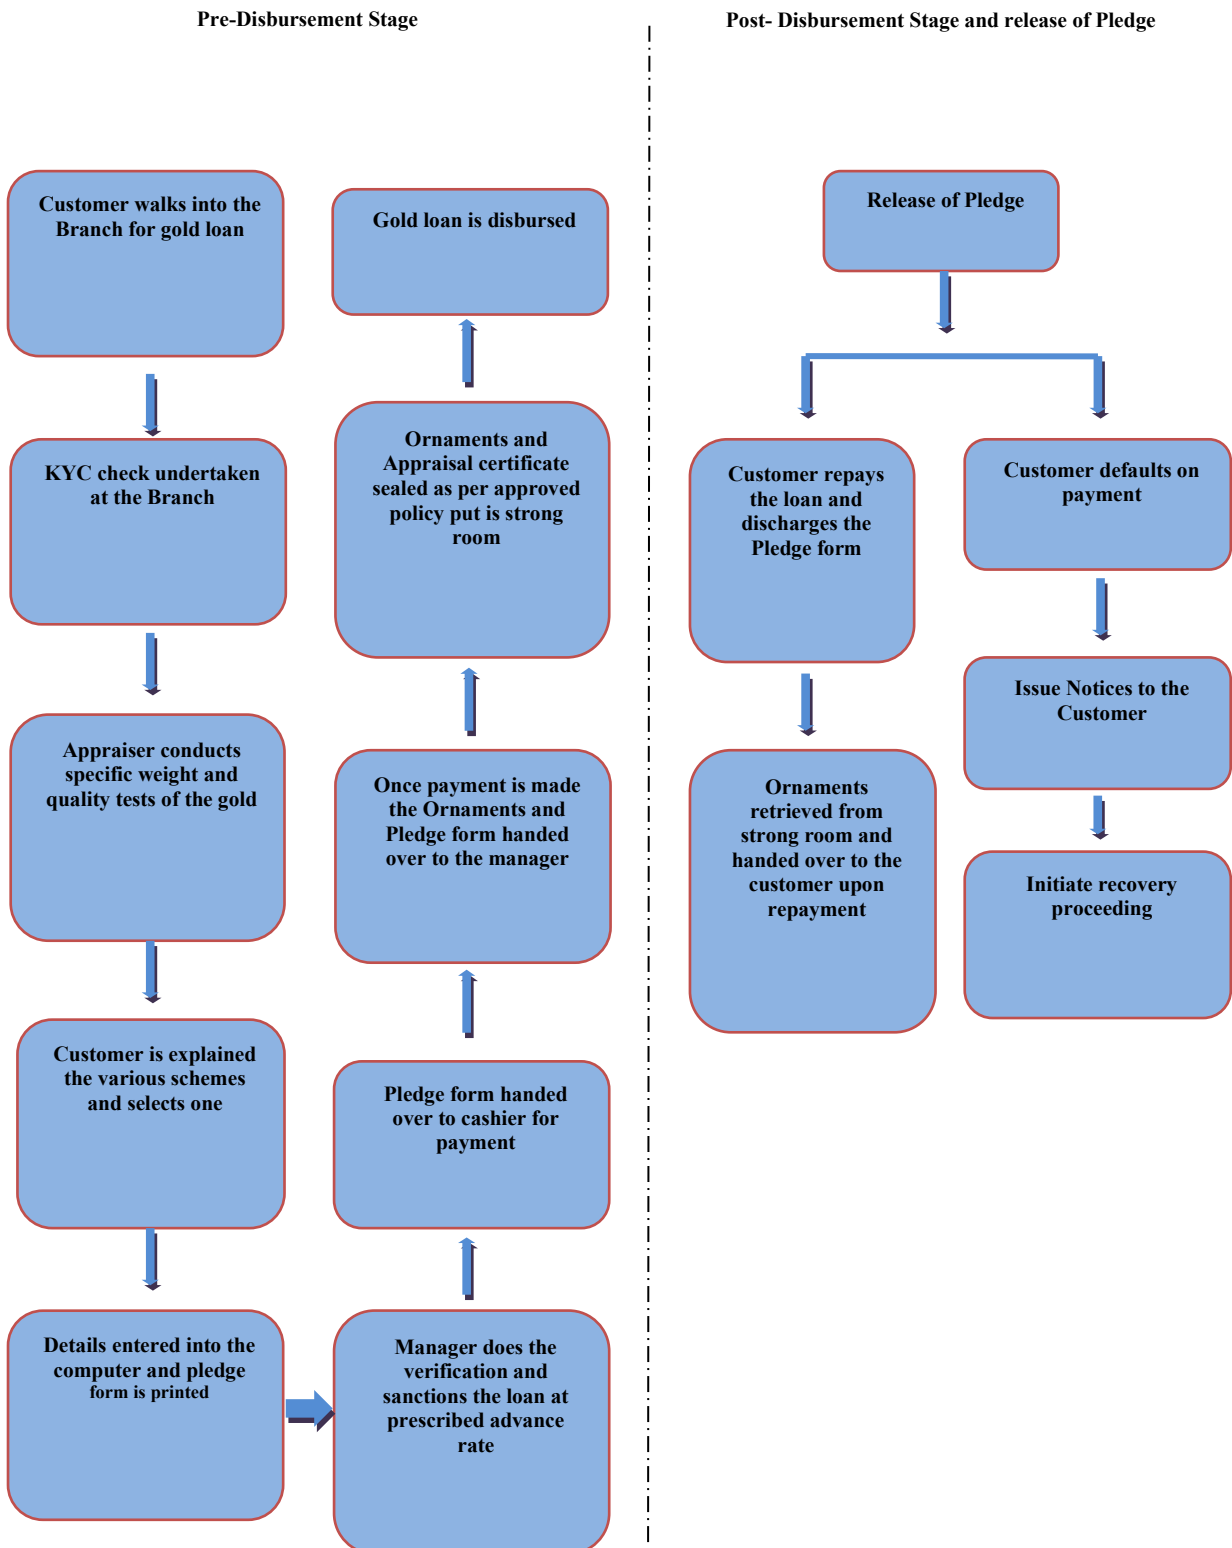

We believe that the risk management is a crucial element for the expansion of our Gold Loan / micro finance loan businesses. We believe that our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk helps us to strengthen our risk management systems. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Gold Loan financing and micro financing loan business without experiencing significant increases in non-performing assets.

We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business. We are also looking to revamp our IT infrastructure to address the current deficiencies in our current IT systems which will help us improve our MIS systems.

GOLD LOAN BUSINESS

Our core business is disbursement of Gold Loans secured by the pledge of household gold jewellery. Loan amounts advanced by us are typically within the range of ₹10,000 to ₹50,000 per loan transaction and typically remain outstanding approximately for an average tenor of 90 to 270 days. As at the six month period ending September 30, 2019 and for the Fiscals March 31, 2019, March 31, 2018 and March 31, 2017, we had approximately 4,20,949, 3,75,665, 4,11,558 and 5,16,004 Gold Loan accounts respectively, aggregating to balance of ₹1,62,169.07 lakhs, ₹1,35,012.97 lakhs, ₹1,55,432.83 lakhs, ₹1,94,000.29 lakhs. For the six month period ending September 30, 2019 and for the Fiscals 2019, 2018 and 2017, our Gold Loan portfolio yield representing interest income on Gold Loans as a percentage of average outstanding of Gold Loans, for the same period were 18.68%, 19.17%, 18.18% and 22.20%, respectively, per annum. For the six month period ending September 30, 2019, Fiscals 2019, 2018 and 2017, income from interest earned on our Gold Loans constituted 95.17%, 93.37%, 94.85%, and 98.01%, respectively, of our total income. We are able to offer a variety of Gold Loan schemes to our customers to suit their individual needs. As of December 31, 2019, we have various new and different schemes in place. The schemes differ in relation to the amount advanced per evaluated gram of gold, the interest rate concessions offered for the particular tenor and the amount of the loan.

Gold Loan disbursement process

The principal form of security that we accept is household gold jewellery. We do not accept bullion, gold biscuits, gold bars, new mass produced gold jewellery or medallions, and we restrict acceptance of jewellery from other money lenders. While these restrictions narrow the pool of assets that may be provided to us as security, we believe that it provides us with the following key advantages:

- It filters out spurious jewellery that may be pledged by jewellers and goldsmiths. We find that household, used jewellery is less likely to be spurious or fake.
- The emotional value attached by each household to the pledged jewellery acts as a strong incentive for timely repayment of loans and revoking the pledge.
- As we only accept the pledge of household jewellery, the value of the pledged gold is typically only as much as the worth of gold that is owned by an average Indian household. This prevents our exposure to large sized loans where the chances of default and subsequent losses are high.

The amount that we finance against the pledged gold jewellery is typically based on a fixed rate per gram of gold content in the jewellery. We value the gold jewellery brought by customers based on our corporate policies and guidelines. Our Company has adopted a loan policy on May 28, 2019 (“**Loan Policy**”). As per the Loan Policy, we grant Gold Loans on 22 carat gold ornaments. However, in case the gold jewellery that are being pledged is less than 22 carat, the branches are required to convert the carat of gold jewellery to the equivalent of 22 carat. We do not accept gold ornaments below 19 carat. The rates per gram is fixed by us on weekly intervals, based on the extant RBI guidelines and the 30 day average closing gold rate for 22 carat fixed by India Bullion and Jewellers Association Limited. The actual loan amount varies according to the type of jewellery pledged. While jewellery can be appraised based on a variety of factors, such as total weight, weight of gold content, production cost, style, brand and value of any gemstones, we appraise the gold jewellery solely based on its gold content. Our Gold Loans are, therefore, generally well collateralized because the actual value of the gold jewellery is higher than our appraised value of the gold jewellery when the loan is disbursed. The amount we lend against an item and the total value of the pledged gold we hold fluctuates according to the market price of gold. An increase in the price of gold will not automatically result in an increase in the value of our Gold Loan portfolio unless the rate per gram is revised by our Corporate Office. It only results in a favourable movement in the value of the security, pledged with us. Similarly, since adequate margins are built in at the time of the loan disbursement and owing to the short tenure of these loans, on average, a decrease in the price of gold generally has little impact on our interest income. However, a sustained decrease in the market price of gold could cause a decrease in the growth rate of Gold Loans in our loan portfolio.

All our Gold Loans have a maximum term of 270 days. In the event that a loan is not repaid on time and after providing due notice to the customer, the unredeemed pledged gold is disposed of, on behalf of the customer in satisfaction of the principal and interest charges. Any surplus arising out of the disposal of the pledged gold is refunded to the customer or is appropriated towards any other liability by the borrower. In the event that the recoverable amount is more than the realizable value of the pledged gold, the customer remains liable for the shortfall.

The processes involved in approving and disbursing a Gold Loan are divided into three phases:

- Pre disbursement;
- Post disbursement; and
- Release of the pledge.

Pre-disbursement process

Pre disbursement processes include all the actions that are carried out from the moment a customer enters any of our branches for procuring a Gold Loan, up until the customer receives the loan amount and include the following:

Gold Loan appraisal of a customer involves the following steps

- (a) *Customer identification* - Gold Loans are sanctioned only to genuine borrowers. Gold Loan can be sanctioned to the members of staff only with prior approval of regional manager, from the branch that such staff does not work in. The sanctioning authority should take all precautions to confirm that the applicant, pledging the ornaments, is the true owner of those ornaments.
- (b) *KYC documentation* – For mandatory compliance of KYC norms, as mandated by RBI and easy identification of each borrower at a later date, a photograph and proof of identity and address acceptable to the Company, are always obtained. Each branch has been provided with a webcam, which may be used to take the photograph, which is then uploaded into the system, also.

- (c) *Security appraisal* – Once the manager is satisfied regarding ownership of the ornaments, the ornaments would then be appraised by the manager himself and/or other staff members who are assigned with the responsibility of appraising the gold jewellery. The ornaments being tendered are not appraised by any person who is not associated with our Company nor are the ornaments sent out of the concerned branch for appraisal. We use the services of our in-house gold appraisers in case of large value loans. These gold appraisers are professionally qualified for appraising the quality of gold and usually have multiple years of experience in appraising gold.

The process of measuring the “fineness”, or purity, of gold is referred to as ‘assaying’. There are different methods of assaying the fineness of gold. The most commonly used methods at our branches are touch stone, nitric acid and sound tests. Indian ornaments often contain stones of different types, some of which may be precious. But as a matter of policy, all types of stones are ignored and their weight reduced from gross weight when advancing against ornaments. Sufficient margin is, therefore, retained for the approximate weight of such stones and for arriving at eligible loan amount; net weight of the ornaments so arrived at alone is taken into account. Reduction in weight is kept comfortably high to safe guard our interests. Wherever weight of stones cannot be ascertained, such ornaments are avoided. All particulars/details of ornaments such as, gross weight, net weight, rate per gram and estimated value will be entered item wise by the appraising staff on serially numbered DPN and also on the paper used for covering/packing ornaments and signed off with the date. The manager also verifies and satisfies himself that the ornaments have been properly tested for purity and details - gross weight as well as net weight, are correctly noted. He should also confirm correctness of valuation made.

- (d) *Documentation* - The standard set of documents that are executed in a typical Gold Loan transaction include the pawn ticket and the demand promissory note cum terms and conditions. Basic details of the pledge, such as the name of the customer and the net weight of the jewellery pledged is recorded on the gold loan slip, which is retained by us. The pawn ticket, which contains the details of the customer and the pledged jewellery, is filled in by the employee who appraised the gold and a copy is retained by the customer. The demand promissory note is an undertaking by the customer to repay the loan amount with the interest to the Company. The terms and conditions that are contained in the demand promissory note empower us to sell the pledged jewellery if the customer defaults on the Gold Loan. After execution of prescribed documents, a loan ticket detailing the particulars of the loan including the details of the items pledged, rate per gram, interest rate and maturity date is handed over to the customers along with disbursement of the loan.

Post-disbursement process

The post disbursement process involves the storage of the storage of the pledged gold jewellery. Ensuring the safety and security of the branch premises is vital to our business since cash and gold inventory are stored in each branch. Branch security measures implemented, by us, include:

- Every branch of the Company, without exception, is provided with a strong room constructed as per the specifications of RBI with fire proof strong room doors. This is a provision at each location to ensure safety of the pledged ornaments, of the clients.
- Access to the strong room is with the help of two distinct keys, which are in the hands of two different individuals attached to the branch. The strong room has a grill door, joint custody of whose keys are with the Branch Manager and another staff in rotation (the “**Joint Custodian**”). Both the branch head and the Joint Custodian hold the keys to grill in the strong room, which can only be opened if both keys are inserted at the same time.
- Electronic Security System: All our branches are installed with CCTV cameras. Such kind of a surveillance system helps to avert any major incidents of frauds, thefts, etc. in the branch premises.
- Insurance: Entire gold stock of the branches is insured for their gold content against theft and other calamities.

Release of pledge

Once a loan is fully repaid, the pledged gold jewellery is returned to the customer. The customer has to be present personally along with the gold loan token, at the branch where the pledge was originally made. The branch will verify the person with the photo taken at the time of pledge and confirm that there is no foul play and the amount

to be paid is informed to the customer from the software and clarifies doubts if any on the amount demanded. Customer Care

We believe that we have set in robust customer grievance redressal systems. The branches of our Company display the names and phone numbers of the nodal officer for addressing customer complaints.

Risk Management

As a lending institution, we are exposed to various risks that are related to our gold lending business, micro finance business and operating environment. Risk management forms an integral element of our business. Our objective in the risk management processes is to appreciate, measure and monitor the various risks that we are subject to and to follow policies and procedures to address these risks. We do so through our risk management architecture. We continue to improve our policies and procedures and to implement these rigorously, for the efficient functioning of our business. This also helps in managing the risks, associated with our business. Our Company has adopted a risk management policy on March 27, 2017 (“**Risk Management Policy**”). The major types of risk we face in our businesses are credit risk, operational risk, financial risk and market risk.

Credit Risk

Credit risk is the possibility of loss due to the failure of any counterparty to abide by the terms and conditions of any financial contract with us. We believe that the credit risk in our Gold Loan business is relatively low because all our loans are generally over collateralized by pledged gold ornaments. We aim to reduce credit risk through a rigorous loan approval and gold appraisal process, KYC compliance procedures and a strong non-performing asset (“**NPA**”) monitoring and recovery mechanism. The credit risk is diminished because the gold jewellery used as security for our loans can be readily liquidated, and the possibility of recovering less than the amount due to us is relatively low. We also mitigate credit risk by not disbursing loans in excess of specified limits, as fixed by our Company from time to time, to the same customer, and for high value loans we undertake a credit check or profiling of the borrower before a loan is approved. We have developed methods to peg the value of the loan amount to the moving average price of gold. We also decrease credit risk by focusing on the quality of the pledged gold. Our internal control system ensures independent verification of the gold by at least two officials at the branch level. The level of verification at the branch level increases as the loan value increases. In addition, the quality of gold is checked by the inspecting officers of the Company through random check and by gold auditors through a detailed check.

Credit risk in our micro finance business is generally higher than our Gold Loan business as the amount advanced is on unsecured basis. However, our product is designed in such a way that the loans are granted to individuals who form a part of the group and the group is ultimately liable for each member repayment obligation under that group. We also mitigate credit risk by not disbursing loans in excess of specified limits which is currently ₹0.05 lakh to an individual customer. We also decrease credit risk by closely follow up with the group members on weekly basis.

Operational Risk

Operational risk broadly covers the risk of direct or indirect loss due to the failure of systems, people or processes, or due to external events. We have instituted a series of checks and balances and audit reviews to address the various operational risks. We have clearly defined appraisal methods to mitigate appraisal risk. Inaccurate appraisal of the pledged gold may lead to funds being advanced against low value or spurious gold. This risk is mitigated by our policies on internal control, generation of alert reports and additional requirements for high value loans. We also have detailed guidelines on movement of cash or gold to address custodial risk, which is the risk associated with the safety and security of our gold inventory. In addition, we have installed surveillance cameras across of all our branches, and security guards are present at night at certain sensitive branches. We undertake significant employee profiling and background verification checks before hiring and continuously monitor their lifestyle changes.

Financial Risk

Our business is cash intensive and requires substantial funds, on an ongoing basis, to finance the loan portfolio and to grow it. Any disruption in the funding sources would have a material adverse effect on our liquidity and financial condition. The Company is proactively pursuing a system of identifying and accessing newer and cheaper sources of funds, to finance the AUM and to grow the business. There is a regular meeting of our asset liability management committee which reviews the liquidity position of the Company and arranges for sufficient funding in advance, for growth.

Market Risk

Market risk arises from the decline in the value of the pledged gold due to fluctuation in gold prices. This risk is in part mitigated by linking the LTV to the 30 day average price of gold. This risk is further reduced because we appraise the gold jewellery and fund loans based solely on the weight of gold content without considering design cost, production cost or value of gemstones. In addition, we believe that the sentimental value of the gold jewellery to the customers may induce repayment and redemption of the pledged gold even if the value of the pledged gold falls below the value of the repayment amount. We believe that a prompt and effective recovery mechanism also helps us deal with this risk.

Our Risk Management Policy

In order to address the risks that are inherent to our business, we have developed a risk management architecture that includes a Risk Management Committee, internal audit department, and a risk management department. Our Risk Management Committee, which is led by one of our Directors, oversees our risk management policies, which help us to identify, measure, monitor and mitigate the various risks that we face in our businesses. For details of membership of the Risk Management Committee, see “*Our Management*” on page 105. The terms of reference of our Risk Management Committee are as follows:

- (a) To assist the Board in setting risk strategy policies in liaison with management and in the discharge of its duties relating to corporate accountability and associated risk in terms of management assurance and reporting;
- (b) To review and assess the nature, role, responsibility and authority of the risk management function within the Company and outline the scope of risk management work; and
- (c) To review and assess the quality, integrity and effectiveness of the risk management systems and ensure that the risk policies and strategies are effectively managed.

Internal Audit Department

Our internal audit department assists in the management of operational risk. Separate divisions of our internal audit department have been put in place to handle the audit of the departments of the Corporate Office and those of the branch offices. A branch inspection is carried out once in 3 months for all branches and once in 2 months for high risk branches with the focus on the verification of the Gold Loan pledges. In addition, an incremental high value loan check is carried out by Regional Managers as part of their periodical branch inspection.

Risk Management Audit

Our branch auditors also carry out a system driven risk audit on certain identified risk parameters. These are keyed into the system and alerts are sent to branch controllers and top management in case the risk weight given under a specific parameter goes beyond the prefixed tolerance levels. In all such cases, the concerned branches are inspected by the branch controllers or top management personnel depending on the severity of risk and immediate remedial actions are initiated.

Assets-Liabilities Management Policy

Our Board adopted the asset-liability management policy (“**ALM Policy**”) on May 8, 2017. The primary objective of our ALM Policy is to ensure the stability of our net interest income as well as ensuring that we have liquidity and pricing stability. In order to monitor the ALM Policy, the Board at their meeting held on April 22, 2013 constituted an Asset Liability Committee (“**ALCO**”) comprising of the directors and senior management functionaries of the Company, which was re-constituted on March 27, 2017.

NPA Policy

Our Board adopted the Non Performing Asset policy (“**NPA Policy**”) on April 7, 2015. In terms of the NPA Policy, all loans outstanding beyond the loan validity are disposed of within three months from the expiry of the loan period. In order to undertake this, our Company has put in place a gold loan and micro finance loan monitoring, follow-up and disposal mechanism in place. Our Company has an Overdue Loans Cell (“**OLC**”) at the Corporate Office under Chief Operating Officer which interacts with branches and their controllers for speedy recovery of all loans which has exceeded the stipulated loan tenor.

Since disposal of Gold Loans through individual branches is not feasible, our Auction policy spells out the operational workflow for a centralized Gold Loan disposal set up as follows:

- (a) Identification of potential overdue gold loans by OLC and advising them to concerned branches;
- (b) Sending first notice to borrowers latest by 15 days prior to the loan becoming overdue;
- (c) Personal visit by branch manager/staff member on the defaulting customer within 7 days from the date of notice;
- (d) If no result is forthcoming, serving of second repayment notice after a maximum gap of 15 days from the date of personal visit and/or the first notice;
- (e) If the loan remains outstanding even after above taken measures, takeover of the gold ornaments by the Regional Manager (RM) within a span of one month and transfer the loan account to Corporate Office overdue Loan Pool account;
- (f) All gold ornaments, underlying the loans, which taken over by the RM would either be auctioned at the HQ branch, if the weight of gold is sizeable or will be transferred to specified auction centres periodically;
- (g) At any point of time before the loan is transferred to auction centre, in case the borrower approaches the company for redemption of pledged ornaments, this will be carried out by the concerned branch (originating or HQ) in the normal manner;
- (h) Auctions are carried out only after publishing the auction date and venue in two vernacular dailies being circulated in the area of concerned branches. Also, the concerned branches are instructed to display the auction date and centre, on their notice boards well in advance; and

- (i) As further concession to customers, the Company may also consider settlement of loan dues by way of concessions in interest as a one-time settlement on a case-to-case basis, only with approval from Corporate Office.

Auction Policy

Under the various schemes offered by our Company, the loans are typically granted for a maximum tenure of 270 days. Under such schemes of our Company, the borrowers are obligated to repay the principal amount together with the accrued interest in a specified period. In a business such as ours, there are certain instances wherein the borrowers fail to repay the amount within the specified period. Consequently, our Company settles such overdue accounts by means of a public auction to realise the dues. Our Company vide a resolution of its Board on May 28, 2019 approved the auction policy of the Company (“**Auction Policy**”). Further, we identify the accounts for auction on the basis of:

- (a) All accounts in which interest remains unserved in full and if the loan is not closed at the end of tenure in various schemes, it will be identified and listed as “eligible for auction accounts”;
- (b) An account which has been classified as an NPA account in accordance with policies laid down by the Company;
- (c) Accounts that have not completed loan tenure, but having a substantial erosion in the realizable value of the security to cover the dues i.e. Mark to Market cases (MTM Cases) may be taken up for auction in case all recovery initiatives fails.

In terms of our Auction Policy, on identification of such eligible auction account, we sent notices to the borrowers to repay the dues, on failure of which, we initiate the process of public auction. Since as per the revised RBI guidelines, the company or its promoters cannot participate actively in the auction, qualified and experienced auctioneers are appointed by the company to carry out the auction on behalf of the company. In accordance with our Auction Policy, the auction shall be carried out by an auctioneer empanelled by the Company with the approval of the Board.

Capital Adequacy Ratio

As per the Master Directions, every NBFC-ND-SI including us are subject to capital adequacy requirements. Currently, we are required to maintain a minimum capital ratio consisting of Tier I and Tier II capital which shall not be less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. Further, we need to maintain a Tier I capital of 12%. Also, the total of Tier II capital, at any point of time, shall not exceed one hundred percent of Tier I capital. Additionally, we are required to transfer up to 20% of our annual profit to a reserve fund and make provisions for NPAs. We had a capital adequacy ratio of 29.52%, 34.85%, 33.91%, and 24.62% on September 30, 2019, March 31, 2019, March 31, 2018, and March 31, 2017, respectively. We have satisfied the minimum capital adequacy ratios prescribed by the RBI for the six month period ended on September 30, 2019 and the financial year ended March 31, 2019.

Technology

We believe that the usage of a technology platform across our operations has improved our growth. Our web based centralised IT platform which records details of all branches. We believe that our IT infrastructure helps us with real time data transmission and updates, and endeavour to minimise errors, ensure faster data transmission and risk monitoring. We upload data at each branch to facilitate online information access for faster decision making. Our technology also helps reduce the time it takes to complete Gold Loan / micro finance loan transactions.

Our IT system aids the performance of all the processes involved in a loan transaction. At the pre-disbursement stage, all KYC details as well as other details of customer appraisal are captured and stored in the system for future reference. All the details that are relevant to a loan transaction are captured by the system and filtered at each level to confirm whether a particular set of pledged jewellery meets the required specifications. The branch staff, upon verification of the gold ornaments key in information into the system that uses the input data to arrive at the net weight and calculates the maximum limit for a loan advance that can be offer against it, under the specific scheme chosen by the customer. Based on the saved data, all accounting entries are also passed by the system.

Our Borrowings and Credit Ratings

As on December 31, 2019, our Company had outstanding secured borrowing of ₹75,696.92 lakhs and unsecured borrowing of ₹44,606.83 lakhs. We believe that we have developed stable long term relationships with our lenders and have established a track record of timely servicing of our debts. Please refer to the sections titled “*Financial Statements*” and “*Financial Indebtedness*” on pages 115 and 122, respectively.

The NCDs proposed to be issued under this Issue have been rated ‘CARE BBB-; Stable’ (Triple B Minus; Outlook: Stable) by CARE for an amount of up to ₹20,000 lakhs vide its letter dated March 12, 2020. The rating of the NCDs by CARE indicate that instruments with this rating are considered to have moderate degree of safety regarding timely servicing of financial obligations. Security threats and measures taken to mitigate them

Since our branches handle large value of cash and gold on a daily basis, we have initiated specific security measures to prevent theft of our branch assets. These measures can be categorized as under:

- Physical security is provided by means of keeping the valuable gold ornaments in pucca strong rooms constructed as per the specifications of Reserve Bank of India with fire proof strong room doors.
- We have a system of Joint Custody of Gold and Cash in strong rooms to ensure that the keys of strong room doors are held in the custody of two different people i.e. the Branch Manager and another staff member, the Joint Custodian.
- All our branches are provided with Electronic Surveillance System and any movement within business area and in the strong room are recorded by the cameras placed inside the premises. All our existing branches have CCTV cameras installed.
- Entire gold stock of the branches is insured for their gold content against theft, dacoity.
- Proper checking of gold ornaments by appraiser, branch manager as well as audit by gold auditor and internal auditors at frequent intervals is undertaken to ascertain the quality of gold ornaments and ensure low purity of gold ornaments are not pledged.
- We have also in place a whistle blower policy which will ensure that any malpractices within the branch are reported to senior level executives

Competition

We face competition from pawnshops, other gold / micro financing companies, banks, co-operative societies and local money lenders. Other lenders may lend money on an unsecured basis, at interest rates that may be lower than our rates of interest and on other terms, which may seem more favourable than ours. However, we believe that the primary elements of our competitive edge are the quality of customer service and relationship management, our branch location and reach and our ability to lend competitive amounts at competitive rates, with full transparency.

The Company's Management is responsible for the preparation and fair presentation of this interim financial information in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards, specified under Section 133 of the Companies Act, 2013("the Act"), read with Companies (Accounts) Rule, 2014, the Companies (Indian Accounting Standards) Amendment Rules, 2019 and all other applicable financial reporting framework. This responsibility includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of accounting records, relevant to the preparation and presentation of financial statements that give a true and fair view and are free from material misstatements, whether due to fraud or error. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with the Standards on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consist of making inquiries, primarily of the persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying unaudited standalone interim financial information does not give a true and fair view of the state of affairs of the entity as at September 30, 2019, and of its results of operations and its cash flows for the six months period then ended in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with the Companies (Accounts) Rules, 2014 and the Companies (Indian Accounting Standards) Amendment Rules, 2019.

The reformatted financial statements of the Issuer included in this Draft Prospectus / Prospectus is presented in accordance with Indian GAAP for March 31, 2015 to March 31, 2019, which differs from Indian Accounting Standards (Ind AS) in certain respects. The Ministry of Corporate Affairs (MCA), in its press release dated January 18, 2016, issued a roadmap for implementation of Ind AS converged with IFRS for non-banking financial companies, scheduled 50 commercial banks, insurers, and insurance companies, which was subsequently confirmed by the RBI through its circular dated February 11, 2016. Therefore, the Issuer would be subject to this notification.

“Summary of Significant Differences among Indian GAAP and Ind AS”, does not present all differences between Indian GAAP and Ind AS which are relevant to the Issuer. Consequently, there can be no assurance that those are the only differences in the accounting principles that could have a significant impact on the financial information included in this Draft Prospectus / Prospectus. Furthermore, the Issuer has made no attempt to identify or quantify the impact of these differences or any future differences between Indian GAAP and Ind AS which may result from prospective changes in accounting standards. The Issuer has not considered matters of Indian GAAP presentation and disclosures, which also differ from Ind AS. In making an investment decision, investors must rely upon their Draft Prospectus / Prospectus. Potential investors should consult with their own professional advisors for a more thorough understanding of the differences between Indian GAAP and Ind AS and how those differences might affect the financial information included in this Draft Prospectus / Prospectus. The Issuer cannot assure that it has completed a comprehensive analysis of the effect of Ind AS on future financial information or that the application of IND AS will not result in a materially adverse effect on the Issuer’s future financial information.

1.	Presentation of Financial Statements	<u>Other Comprehensive Income:</u> There is no concept of ‘Other Comprehensive Income’ under Indian GAAP	<u>Other Comprehensive Income:</u> IndAS1 introduces the concept of Other Comprehensive Income (“OCI”). Other comprehensive income comprises items of income and expense (including reclassification adjustments) that are not recognized in profit or loss as required or permitted by other Ind AS. Such recognition of income and expenses in OCI is primarily governed by the income recognition norms and classification of financial instruments and assets as “Fair Value through OCI.”
		<u>Extraordinary items:</u> Under Indian GAAP, extraordinary items are disclosed separately in the statement of profit and loss and are included in the determination of net profit or loss for the period. Items of income or expense to be disclosed as extraordinary should be distinct from the ordinary activities and are determined by the nature of the event or transaction in relation to the business ordinarily carried out by an entity.	<u>Extraordinary items:</u> Under Ind AS, presentation of any items of income or expense as extraordinary is prohibited.
		<u>Change in Accounting Policies</u> Indian GAAP requires changes in accounting policies to be presented in the financial statements on a	<u>Change in Accounting Policies</u> Ind AS requires retrospective application of changes in accounting policies by adjusting the opening balance of each affected

2.	Deferred Taxes	<p>Under Indian GAAP, the Company determines deferred tax to be recognized in the financial statements with reference to the income statement approach i.e. with reference to the timing differences between profit offered for income taxes and profit as per the financial statements.</p>	<p>As per Ind AS 12 Income Taxes, deferred tax is determined with reference to the balance sheet approach i.e. based on the differences between carrying value of the assets/liabilities and their respective tax base.</p> <p>Using the balance sheet approach, there could be additional deferred tax charge/income on account of all Ind AS opening balance sheet adjustments</p>
3.	Property, plant and equipment—reviewing depreciation and residual value	<p>Under Indian GAAP, the Company currently provides depreciation on written down value over the useful lives of the assets as per Schedule II of the Companies Act,2013</p>	<p>Ind AS 16 mandates reviewing the method of depreciation, estimated useful life and estimated residual value of an asset at least once in a year. The effect of any change in the estimated useful and residual value shall be taken prospectively.</p> <p>Ind AS 101 allows current carrying value under Indian GAAP for items of property, plant and equipment to be carried forward as the cost under Ind AS</p>
4.	Accounting for Employee benefits	<p>Currently, all actuarial gains and losses are recognized immediately in the statement of profit and loss.</p>	<p>Under Ind AS 19, the change in liability is split into changes arising out of service, interest cost and re measurements and the change in asset is split between interest income and re measurements.</p> <p>Changes due to service cost and net interest cost/ income need to be recognized in the income statement and the changes arising out of re- measurements comprising of actuarial gains and losses representing changes in the present value of the defined benefit obligation resulting from experience adjustment and effects of changes in actuarial assumptions are to be recognized directly in OCI.</p>

Also, discounting of provisions to present value is not permitted</p>	<p>Under Ind AS, provisions are recognised for legal as well as constructive obligations. IND AS requires discounting the provisions to present value, if the effect of time value of money is material.</p>
6.	Presentation and classification of Financial Instruments and subsequent measurement	<p>Currently, under Indian GAAP, the financial assets and financial liabilities are recognised at the transaction value. The Company classifies all its financial assets and liabilities as short term or long term.</p> <p>Long term investments are carried at cost less any permanent diminution in the value of such investments determined on a specific</p>	<p>Ind AS 109 requires all financial assets and financial liabilities to be recognised on initial recognition at fair value.</p> <p>Financial assets have to be either classified as measured at amortized cost or measured at fair value. Liabilities classified at amortized cost and the related expenses (processing cost & fees) have to be measured using the Effective Interest Rate (EIR) method.</p> <p>Fair value adjustment on transition shall be adjusted against opening retained earnings on the date of transition. Disclosures under Ind AS are extensive.</p>
7.	Financial Instruments - Impairment	Under Indian GAAP, the Company assesses the provision for doubtful debts at each reporting period, which in practice, is based on relevant information like past experience, financial position of the debtor, cash flows of the debtor, guidelines issued by the regulator etc.	The impairment model in Ind AS is based on expected credit losses and it applies equally to debt instruments measured at amortized cost or FVOCI, financing receivables, lease receivables, trade receivables and certain written loan commitments and financial guarantee contracts.
8.	Segment Reporting	Under Indian GAAP there is a requirement to identify two sets of segments (business and geographical), using a risks and rewards approach, with the entity's system of internal financial reporting to key management personnel serving only as the starting point for the identification of such segments	Operating segments are identified based on the financial information that is regularly reviewed by the chief operating decision maker in deciding how to allocate resources and in assessing performance.

Hence, Applicants are advised to immediately update their Demographic Details as appearing on the records of the DP and ensure that they are true and correct, and carefully fill in their Beneficiary Account details in the Application Form. Failure to do so could result in delays in demat credit and neither our Company, Designated Intermediaries, SCSBs, Registrar to the Issue nor the Stock Exchange will bear any responsibility or liability for the same.

In accordance with Circular No. MRD/DOP/Cir-05/2007 dated April 27, 2007 issued by SEBI, the PAN would be the sole identification number for the participants transacting in the securities market, irrespective of the amount of transaction. Any Application Form, without the PAN is liable to be rejected, irrespective of the amount of transaction. It is to be specifically noted that the Applicants should not submit the GIR number instead of the PAN as the Application is liable to be rejected on this ground.

For the purposes of allotment of NCDs under this Issue, Applications shall be grouped based on the PAN, i.e. Applications under the same PAN shall be grouped together and treated as one Application. Two or more Applications will be deemed to be multiple Applications if the sole or first Applicant is one and the same. BASIS OF ALLOTMENT

Basis of Allotment for NCDs

The Registrar will aggregate the Applications, based on the applications received through an electronic book from the Stock Exchange and determine the valid Application for the purpose of drawing the basis of allocation.

Allocation Ratio

The Registrar will aggregate the Applications based on the Applications received through an electronic book from the Stock Exchange and determine the valid applications for the purpose of drawing the basis of allocation. Grouping of the application received will be then done in the following manner:

Grouping of Applications and Allocation Ratio: Applications received from various applicants shall be grouped together on the following basis:

- (a) *Applications received from Category I applicants:* Applications received from Category I, shall be grouped together, (***“Institutional Portion”***);
- (b) *Applications received from Category II applicants:* Applications received from Category II, shall be grouped together, (***“Non-Institutional Portion”***);
- (c) *Applications received from Category III applicants:* Applications received from Category III, shall be grouped together, (***“Retail Individual Portion”***).

For removal of doubt, ***“Institutional Portion”***, ***“Non-Institutional Portion”*** and ***“Retail Individual Portion”*** are individually referred to as ***“Portion”*** and collectively referred to as ***“Portions”***.

For the purposes of determining the number of NCDs available for allocation to each of the abovementioned Portions, our Company shall have the discretion of determining the number of NCDs to be Allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription in the Issue up to ₹10,000 lakhs. The aggregate value of NCDs decided to be allotted over and above the Base Issue Size, (in case our Company opts to retain any oversubscription in the Issue), and/or the aggregate value of NCDs up to the Base Issue Size shall be collectively termed as the ***“Overall Issue Size”***.

Basis of Allotment for NCDs

Allotments in the first instance:

- (i) Applicants belonging to the Category I, in the first instance, will be allocated NCDs up to 10% of overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Lead Manager and their respective affiliates/SCSB (Designated Branch or online acknowledgement));
- (ii) Applicants belonging to the Category II, in the first instance, will be allocated NCDs up to 40% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));
- (iii) Applicants belonging to the Category III, in the first instance, will be allocated NCDs up to 50% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));

Allotments, in consultation with the Designated Stock Exchange, shall be made on date priority basis i.e. a first-come first-serve basis, based on the date of upload of each Application in to the electronic book with Stock Exchange, in each Portion subject to the Allocation Ratio. However, on the date of oversubscription, the Allotments would be made to the Applicants on proportionate basis.

- (a) Under Subscription:

Under subscription, if any, in any Portion, priority in Allotments will be given in the following order:

- (i) Individual Portion
- (ii) Non-Institutional Portion and Resident Indian individuals and Hindu undivided families through the Karta applying who apply for NCDs aggregating to a value exceeding ₹5 lakhs;
- (iii) Institutional Portion
- (iv) on a first come first serve basis.

Within each Portion, priority in Allotments will be given on a first-come-first-serve basis, based on the date of upload of each Application into the electronic system of the Stock Exchange.

For each Portion, all Applications uploaded in to the electronic book with the Stock Exchange would be treated at par with each other. Allotment would be on proportionate basis, where Applications uploaded into the Platform of the Stock Exchange on a particular date exceeds NCDs to be allotted for each Portion respectively.

Minimum allotment of 10 NCD and in multiples of 1 (one) NCD thereafter would be made in case of each valid Application.

- (b) Allotments in case of oversubscription:

In case of an oversubscription, Allotments to the maximum extent, as possible, will be made on a first-come first-serve basis and thereafter on proportionate basis, i.e. full Allotment of NCDs to the valid Applicants on a first come first serve basis for forms uploaded up to 5 pm of the date falling 1 (one) day prior to the date of oversubscription and proportionate allotment of NCDs to the valid Applicants on the date of oversubscription (based on the date of upload of the Application on the Stock Exchange Platform, in each Portion). In case of over subscription on date of opening of the Issue, the Allotment shall be made on a proportionate basis. Applications received for the NCDs after the date of oversubscription will not be considered for Allotment.

In view of the same, the Investors are advised to refer to the Stock Exchange website at www.bseindia.com for details in respect of subscription.

- (c) Proportionate Allotments: For each Portion, on the date of oversubscription:

- (i) Allotments to the Applicants shall be made in proportion to their respective Application size, rounded off to the nearest integer;
- (ii) If the process of rounding off to the nearest integer results in the actual allocation of NCDs being higher than the Issue Size, not all Applicants will be allotted the number of NCDs arrived at after such rounding off. Rather, each Applicant whose Allotment size, prior to rounding off, had the highest decimal point would be given preference;

Financial Year	Summary of Reservations/Qualifications/Adverse Remarks	Impact on the Financial statements and financial position of the Issuer	Corrective steps taken and proposed to be taken
	In order to facilitate functioning of branches and corporate office in an efficient manner, the Company has entered into an agreement to acquire fixed assets comprising land and buildings which is presently being occupied by the Company as tenant for the functioning of its Corporate Office and branches, for a total consideration of Rs21,900.00 lakhs. The Company has paid an aggregate amount of ₹20,000.00 lakhs as part of purchase consideration and has taken possession of the assets. Since substantial part of the consideration has been paid and assets have been put to use by the Company, the amount paid has been capitalized in the books of the company as fixed assets (Land and Building).		subsequently due to fall in property prices on account of demonetization and taking into account the observations of RBI during their inspection in November 2016, the Company took a fresh valuation of the property purchased and the difference in the valuation amounting to ₹9,000.00 lakhs was brought back to the books of accounts of the Company. To such extend the Fixed Assets valued have been reduced.

We are a non-deposit taking (which does not accept public deposits), systemically important, NBFC. As such, our business activities are regulated by RBI regulations applicable to non-public deposit accepting NBFCs (“**NBFC-ND**”).

As of November 22, 2019, the RBI has issued an updated Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016, dated September 1, 2016 as amended, (“**Master Directions**”) applicable to all NBFC-NDSI’s.

Following are the regulations governing an NBFC in India:

Regulations governing NBFCs

As per the RBI Act, a financial institution has been defined as a company which includes a non-banking institution carrying on as its business or part of its business the financing activities, whether by way of making loans or advances or otherwise, of any activity, other than its own and it is engaged in the activities of loans and advances, acquisition of shares/stock/bonds/debentures/securities issued by the Government of India or other local authorities or other marketable securities of like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of carrying out any agricultural or industrial activities or the purchase or sale of any goods or providing of any service or the sale/purchase/construction of immovable property.

As per the prescribed law any company that carries on the business of a non-banking financial institution as its ‘principal business’ is to be treated as an NBFC. The term ‘principal business’ has not been defined in any statute; however, RBI has clarified through a press release (Ref. No. 1998-99/1269) issued in 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide a company’s principal business. The company will be treated as an NBFC if its financial assets are more than 50% of its total assets (netted off by intangible assets) and income from financial assets should be more than 50% of the gross income. Both these tests are required to be satisfied in order to determine the principal business of a company.

With effect from 1997, NBFCs were not permitted to commence or carry on the business of a non-banking financial institution without obtaining a Certificate of Registration (“**CoR**”). Further, with a view to imparting greater financial soundness and achieving the economies of scale in terms of efficiency of operations and higher managerial skills, the RBI has raised the requirement of minimum net owned fund (“**NoF**”) from ₹25 lakhs to ₹200 lakhs for the NBFC which commences business on or after April 21, 1999. Also, it was mandatory for all NBFCs to attain a minimum NoF of ₹200 lakhs by the end of 1 April 2017. NBFCs failing to maintain NOF of ₹200 lakhs are not eligible to hold a certificate of registration as an NBFC.

Regulation of NBFC registered with RBI

NBFCs are primarily governed by the RBI Act and the RBI Master Directions. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time.

Types of Activities that NBFCs are permitted to carry out

Although by definition, NBFCs are permitted to operate in similar sphere of activities as banks, there are a few important and key differences. The most important distinctions are:

- (i) an NBFC cannot accept deposits repayable on demand – in other words, NBFCs can only accept fixed term deposits. Thus, NBFCs are not permitted to issue negotiable instruments, such as cheques which are payable on demand; and
- (ii) NBFCs do not form part of the payment and settlement system and cannot issue cheques drawn on itself.

Types of NBFCs

Section 45-IA of the RBI Act makes it mandatory for every NBFC to get itself registered with the RBI in order to be able to commence any of the aforementioned activities.

Further, an NBFC may be registered as a deposit accepting NBFC (“**NBFC-D**”) or as a non-deposit accepting NBFC (“**NBFC-ND**”). NBFCs registered with RBI are further classified as:

The RBI has recently harmonised the categories of NBFCs into: (i) investment and credit companies (which erstwhile consisted of asset finance companies, investment companies, and loan companies); (ii) infrastructure finance companies; (iii) infrastructure debt funds; (iv) NBFC – micro finance institutions; and (v) NBFC – factors.

Our Company has been classified as an NBFC-ND-SI.

Systemically Important NBFC-NDs

As per the NBFC Master Directions, the revised the threshold for defining systemic significance for NBFCs-ND in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakh and above as per the last audited balance sheet. Moreover, as per this amendment, all NBFCs-ND with assets of ₹50,000 lakh and above, irrespective of whether they have accessed public funds or not, shall comply with prudential regulations as applicable to NBFCs-ND-SI. NBFCs-ND-SI is required to comply with conduct of business regulations if customer interface exists.

All systemically important NBFCs are required to maintain a minimum Capital to Risk-Weighted Assets Ratio of 15 per cent.

Rating of NBFCs

Pursuant to the RBI Master Directions, all NBFCs with an asset size of ₹50,000 lakh are required to, as per RBI instructions to, furnish information about downgrading or upgrading of the assigned rating of any financial product issued by them within 15 days of a change in rating.

Provisioning Requirements

An NBFC-ND, after taking into account the time lag between an account becoming non-performing, its recognition, the realisation of the security and erosion overtime in the value of the security charged, shall make provisions against sub-standard assets, doubtful assets and loss assets in the manner provided for in the Master Directions.

In the interests of counter cyclical and so as to ensure that NBFCs create a financial buffer to protect them from the effect of economic downturns, RBI vide their circular no. DNBS.PD.CC. No.207/ 03.02.002 /2010-11 dated January 17, 2011, introduced provisioning for Standard Assets by all NBFCs. NBFCs are required to make a general provision at 0.25 per cent of the outstanding standard assets. RBI vide their circular no. DNBR (PD) CC

No. 037/03.01.001/2014-15 dated June 11, 2015 raised the provision for standard assets to 0.40 per cent to be met by March 2018. The provisions on standard assets are not reckoned for arriving at Net NPAs. The provisions towards Standard Assets are not needed to be netted from gross advances but shown separately as 'Contingent Provisions against Standard Assets' in the balance sheet. NBFCs are allowed to include the 'General Provisions on Standard Assets' in Tier II Capital which together with other 'general provisions/ loss reserves' will be admitted as Tier II Capital only up to a maximum of 1.25 per cent of the total risk-weighted assets.

Capital Adequacy Norms

Every systemically important NBFC-ND is required to maintain, a minimum capital ratio consisting of Tier I and Tier II Capital of not less than 15 per cent of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items is required to be maintained. Also, the total of the Tier II Capital of a NBFC-MFI shall not exceed 100 per cent of the Tier I Capital.

Tier-I Capital, has been defined as, owned funds as reduced by investment in shares of other NBFCs and in shares, debentures, bonds, outstanding loans and advances including hire purchase and lease finance made to and deposits with subsidiaries and companies in the same group exceeding, in aggregate, 10 per cent of the owned fund and perpetual debt instruments issued by a systemically important NBFC-ND in each year to the extent it does not exceed 15 per cent of the aggregate Tier I Capital of such company as on 31st March of the previous accounting year.

Owned Funds, has been defined as, paid-up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account; capital reserve representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of assets; less accumulated loss balance, book value of intangible assets and deferred revenue expenditure, if any.

Tier - II Capital includes the following (a) preference shares other than those which are compulsorily convertible into equity; (b) revaluation reserves at discounted rate of 55 per cent; (c) general provisions (including that for standard assets) and loss reserves to the extent these are not attributable to actual diminution in value or identifiable potential loss in any specific asset and are available to meet unexpected losses, to the extent of one-and-one-fourth per cent of risk weighted assets; (d) hybrid debt capital instruments; and (e) subordinated debt to the extent the aggregate does not exceed Tier - I capital; and (f) perpetual debt instrument issued by a systemically important NBFC-ND, which is in excess of what qualifies for Tier I Capital to the extent that the aggregate Tier-II capital does not exceed 15 per cent of the Tier -I capital.

Subordinated debt means a fully paid up capital instrument, which is unsecured and is subordinated to the claims of other creditors and is free from restrictive clauses and is not redeemable at the instance of the holder or without the consent of the supervisory authority of the NBFC. The book value of such instrument is subjected to discounting as prescribed.

Exposure Norms

In order to ensure better risk management and avoidance of concentration of credit risks, the RBI has, in terms of the Master Directions, prescribed credit exposure limits for financial institutions in respect of their lending to single/ group borrowers. Credit exposure to a single borrower shall not exceed 15% of the owned funds of the systemically important NBFC-ND, while the credit exposure to a single group of borrowers shall not exceed 25% of the owned funds of the systemically important NBFC-ND. Further, the systemically important NBFCs-ND may not invest in the shares of another company exceeding 15% of its owned funds, and in the shares of a single group of companies exceeding 25% of its owned funds. However, this prescribed ceiling shall not be applicable on a NBFC-ND-SI for investments in the equity capital of an insurance company to the extent specifically permitted by the RBI. Any NBFC-ND-SI not accessing public funds, either directly or indirectly may make an application to the RBI for modifications in the prescribed ceilings Any systemically important NBFC-ND classified as asset finance company by RBI, may in exceptional circumstances, exceed the above ceilings by 5% of its owned fund, with the approval of its Board of Directors. The loans and investments of the systemically important NBFC-ND taken together may not exceed 25% of its owned funds to or in single party and 40% of its owned funds to or in single group of parties. A systemically important ND-NBFC may, make an application to the RBI for modification in the prescribed ceilings.

Asset Classification

The Master Directions require that every NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- Standard assets;
- Sub-standard Assets;
- Doubtful Assets; and
- Loss assets

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation. At present every NBFC is required to make a provision for standard assets at 0.40 per cent.

Other stipulations

All NBFCs are required to frame a policy for demand and call loan that includes provisions on the cut-off date for recalling the loans, the rate of interest, periodicity of such interest and periodical reviews of such performance.

The Master Directions also specifically prohibit NBFCs from lending against its own shares.

Net Owned Fund

Section 45-IA of the RBI Act provides that to carry on the business of a NBFC, an entity would have to register as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹200 lakh. For this purpose, the RBI Act has defined “net owned fund” to mean:

Net Owned Fund - The aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance sheet of the company, after deducting (i) accumulated balance of losses, (ii) deferred revenue expenditure, (iii) deferred tax asset (net); and (iv) other intangible assets; and further reduced by the amounts representing,

- (i) investment by such companies in shares of (i) its subsidiaries, (ii) companies in the same group, (iii) other NBFCs; and
- (ii) the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with (i) subsidiaries of such companies; and (ii) companies in the same group, to the extent such amount exceeds 10 per cent of (a) above.

Further, in accordance with RBI Notification No DNBR.007/CGM (CDS) 2015 dated 27 March 2015 which provides that a non-banking financial company holding a certificate of registration issued by the RBI and having net owned fund of less than ₹200 lakh may continue to carry on the business of non-banking financial institution, if such company achieves net owned fund of:

- (i) ₹100 lakh before April 1, 2016; and
- (ii) ₹200 lakh before April 1, 2017

Reserve Fund

In addition to the above, Section 45-IC of the RBI Act requires NBFCs to create a reserve fund and transfer therein a sum of not less than 20% of its net profits earned annually before declaration of dividend. Such a fund is to be created by every NBFC irrespective of whether it is a ND NBFC or not. Such sum cannot be appropriated by the NBFC except for the purpose as may be specified by the RBI from time to time and every such appropriation is required to be reported to the RBI within 21 days from the date of such appropriation.

Detailed Rationale & Key Rating Drivers

The rating assigned to the proposed Non-Convertible Debenture issue of Muthoottu Mini Financiers Limited (MMFL) factor in the Strong brand recognition of the group and the long track record of the promoters in the gold loan business, comfortable capitalization levels, stable asset quality levels and adequate liquidity position.

The rating is constrained by geographical concentration of loan portfolio, moderate profitability, concentrated resource profile, concentration in a single asset class which is exposed to market risk related to gold and intense competition in the gold loan business and significant investment in fixed assets.

Going forward, the ability of the company to maintain asset quality and improve profitability levels while increasing the scale of operations, improve regulatory compliance and any change in the regulatory scenario are the key rating sensitivities.

Rating Sensitivities

Positive Factors:

- Improvement in the scale of operations with improvement in geographical concentration
- Improvement in profitability on a sustained basis

Negative Factors:

- Further moderation in profitability
- Deterioration in asset quality
- Deterioration in capital adequacy levels

Detailed description of the key rating drivers

Key Rating Strengths

Strong brand value and experienced promoters

The 'Mini Muthoot' group has been in the gold loan business for more than six decades and has consequently established strong brand value in the market. Over the years, the company has expanded its branch network across South India. Promoters of the group have rich experience in gold loan business and day-to-day operations are looked after by a team of professionals who have extensive experience in banking and finance.

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

Adequate risk management systems

MMFL has put in place the strong appraisal systems including the evaluation of the gold. Several tests for checking spurious gold including touchstone test and nitric acid test are conducted by the branches. The company has implemented systems for ensuring the gold security and reducing the custodial risks, including highly secured vaults with dual control and insurance. Further, surveillance cameras have been installed in all its branches. It also has internal audit system wherein the gold auditors inspect the branches every 30 days where the auditor verifies all the gold ornaments. All the branches of the company are subject to regular accounts internal audit once in three months.

Comfortable capital adequacy levels

The total CAR and Tier I CAR stood at 34.85% (PY: 33.90%) and 25.11% (PY: 22.33%) as on March 31, 2019 and 25.89% and 22.33% as on December 31, 2019 respectively. Overall gearing was around 2.53x times as on March 31, 2019 and 3.28x as on December 31, 2019 as against 3.00x as on March 31, 2018.

Stable Asset Quality

The loans are backed by the gold jewelry that is a liquid and safe security. The loans are for a period of up to 9 months. In case the borrowers fail to repay the loans within the stipulated time period, the company reserves the right to auction the gold jewelry kept as security. Collecting interest payments monthly helps in reducing losses on auctions as the gap between scrap values of gold kept as collateral and obligation of the borrower is minimized.

GNPA and NNPA stood at 2.16% and 1.39% as on March 31, 2019 as against 2.09% and 1.58% as on March 31, 2018. GNPA and NNPA as on December 31, 2019 stood at 3.35% and 2.57% respectively. The ability of the company to maintain asset quality and reduce under-recovery on auctions remains a key rating sensitivity.

Key Rating Weaknesses

High product and geographical concentration

The loan portfolio is concentrated towards South India. As on March 31, 2019, Tamil Nadu constituted around 42% (PY: 45%) of the Gold loan portfolio, followed by Karnataka with 22% (PY: 18%) and Kerala with 11% (PY: 10%). The 5 south Indian states constituted around 95% of the gold loan portfolio as on March 31, 2019 and December 31, 2019.

The company has been making consistent efforts to increase the loan portfolio by way of expanding the branch network and addition of new branches in the new geographies. However, the portfolio is expected to remain concentrated in South India over the medium term.

The company earns a major portion of the income from the lending of loans against the gold jewelry. Though the risk is mitigated to an extent as the loans are backed by gold jewelry which is highly liquid in nature, the company is exposed to a price risk associated with the gold which could have a bearing on the full recoverability of principal and interest portion. However, offering lower LTV loans and of total loan tenure of 9 months will help in reducing under-recovery to an extent. As on March 31, 2019, gold loans accounted for 97% of the loan portfolio and rest are Micro Finance Loans. The proportion of gold loans to the total loan portfolio expected to remain higher in the medium term.

Moderate profitability

NIM has marginally improved from 6.30% in FY18 to 6.85% in FY19 with improvement in the capital structure. Operating expenses to average total assets remained stable at 5.53% in FY19 (PY:5.41%). ROTA improved to 1.10% during FY19 from 0.67% during FY18. During 9MFY20, the company reported a PAT of Rs.14 crore on a total income of Rs.218 crore and ROTA of 0.96%.

Concentrated resource profile

The resource profile is concentrated towards retail debentures which constitutes around 54% of the total borrowings as on March 31, 2019 as against 69% as on March 31, 2018. Share of bank borrowings has increased from 31% as on March 31, 2018 to 46% as on March 31, 2019. During H1FY20, the company has again started raising retail NCDs. The company has raised Rs.132 crore during Q3FY20 and Rs.176 crore during Q4FY20 through public issue of NCDs.

Significant exposure to fixed assets

MMFL made significant investments in fixed assets during FY16 from related parties. However, with equity infusion post that and revaluation in the value of fixed assets purchased, Fixed assets to net worth has reduced and stood at 43% as on December 31, 2019.

Intense competition in the gold loan business

Geographically, the gold loan financing industry is predominantly placed in the southern India with an active interest of both the South India-based banks and the large NBFCs operating out of this region. MMFL faces increasing competition from large players including banks and other NBFCs offering gold loans in the regions where the company operate.

Industry Prospects

The NBFC sector has witnessed superior growth rates in the three years ended FY18, mainly driven by slowdown in credit flow from the banks as they grapple with asset quality challenges and capital constraints. The NBFC sector has demonstrated asset-class specific expertise with sophisticated credit underwriting methods, increased use of data analytics, multi-channel origination, and faster turnaround times helping them gain market share in both retail and wholesale asset classes. Comfortable capitalization levels and liquidity management continue to provide comfort to the credit profile of NBFCs. The same, however, is being put to test under the prevailing liquidity tightness and changed sentiment towards NBFCs since September 2018.

The sector witnessed a liability-side disruption post September 2018, leading to sharp increase in spreads and drying up of the short-term commercial paper (CP) market. NBFCs running a negative asset-liability gap in the shorter time buckets had to react to the situation by dipping into their liquidity reserves and/or resorting to portfolio sales to banks to generate liquidity. The changed scenario on the liability front is likely to impact the portfolio growth as well as profitability of the NBFCs in the medium term. NBFCs having presence in the wholesale and real-estate lending space are likely to be impacted more vis-à-vis their retail counterparts. Asset quality, liquidity and profitability will be the key monitorables for the sector going forward.

Liquidity: Adequate

ALM as on December 31, 2019 remains comfortable as there are no cumulative mismatches in any of the buckets upto 1 year. This is due to longer tenure of the borrowings as compared to that of loans disbursed which is of short term in nature. MMFL also has cash and cash equivalents of around Rs.140 crore as on December 31, 2019.

Analytical approach: Standalone
